~~the italian peninsula and the venetian colonies during the~~
early modern period 1494 to 1559 drawing on over 100
contemporary chronicles and diaries the fifty eight volumes
of marin sanudo s diplomatic dispatches mercantile letters
and commentary and 586 collective supplications scattered
through archival sources from towns and villages in the grand
duchy of milan samuel k cohn jr places these incidents and
their patterns in comparative perspectives first with the
late medieval heyday of popular revolt and then with regions
north of the alps cohn finds new developments during the
early modern period such as an increase in women rebels
mutinies of soldiers and new tactics of revolts such as shop
closures peaceful demonstrations of strength and use of
religious processions for discussions of tactics and
strategies for obtaining logistic advantage at the same time
these protests show convergences with the medieval italian
past with leaders coming almost exclusively from the ranks of
nonelites religious ideology playing a surprisingly minor
role and the majority of revolts centring overwhelming in
towns and cities finally this study demonstrates that
democracies do not just die under the duress of military
occupation and growing powers of autocratic regimes ideals of
representation and equality not only persisted they could
emerge in new forms and with greater sophistication

this book analyses the relationship between fascist italy and
the league of nations in the interwar years by uncovering the
traces of those italians working in the organization this
volume investigates fascist italy s membership of the league
and explores the dynamics between nationalism and
internationalism in geneva the relationship between fascist
italy and the league of nations was contradictory shifting
from active collaboration to open disagreement previous
literature has not reflected this oscillation in policy
focusing disproportionally on the problems italy caused for
the league such as the ethiopian crisis yet fascist italy
remained in the league for more than fifteen years and was
the third largest power within the institution how did a
fascist dictatorship fit into an organization espousing
principles of liberal internationalism by using archival
sources from four countries elisabetta tollardo shows that
fascist italy was much more concerned with and involved in
the league than currently believed

space matters it situates our history structures our daily lives and often determines what we can and cannot do borders are central to this reality tools and symbols of separation power and identity they bring people together as much as they set them apart this book explores how borders were understood made and encountered at the end of the middle ages and what they can tell us about the spatial fabric of society at the threshold of modernity it shows that pre modern borders were nothing like the fuzzy lines they are typically made out to be that border making was rarely a top down process and should instead be studied as an interactive endeavour and that space was shaped by communities far more than states in this period at its core borders and the politics of space in late medieval italy is the account of a frontier which would mark the italian peninsula for centuries that between the territories of the duchy of milan and those of the republic of venice but it is also a study of how rulers and subjects alike defined spaces they could call their own luca zenobi combines methods from several disciplines and applies them to a range of evidence from twenty different libraries and archives including theoretical treatises and pragmatic records written chronicles and cartographic visualisations private documents and official correspondence the cast of characters is equally eclectic featuring influential thinkers and pragmatic statesmen zealous factions and clumsy bureaucrats hopeless beggars and ambitious princes on the border their stories intersect and reveal their part in a shared history

conspiracy has been a political phenomenon throughout history relevant to any form of power from antiquity to the post modern era this means of resistance against power was prevalent during the renaissance and the italian fifteenth century in particular can be regarded as an age of plots this book offers the first full length investigation of italian renaissance literature on the topic of conspiracy this literature covered a range of different genres and it enjoyed widespread diffusion during the second half of the fifteenth century when the development of this literary production was connected with the affirmation of centralized political thought and princely ideology in italian states the centrality of conspiracies also emerges in the sixteenth century in machiavelli s work where the topic is closely interlaced with problems of building political consensus and management of power this volume presents case studies of the most significant humanist texts representative of different states literary genres and of prominent authors alberti poliziano pontano and minor yet important literati and it also investigates machiavelli s political and historical works through interdisciplinary analysis this study traces the evolution of literature on plots in early renaissance italy it points out the key function of the classical tradition and the recurring narrative approaches the historiographical techniques and the ideological angles that characterize the literary transfiguration of the topic this volume also offers a reconsideration of the complex facets of humanist political literature that played a crucial role in the development of a new theory of statecraft
