we don't yet know where the current battle is headed but puri's first cut will help us greatly in fathoming how we got here patrick porter professor of international security university of birmingham when vladimir putin invaded ukraine on 24 february 2022 many in the west were left stunned at his act of brutal imperialism to those who had been paying attention however the warning signs of the bloodshed and slaughter to come had been there for years tracing the relationship between the two countries from the breakup of the soviet union in 1991 to putin's invasion in 2022 what emerges from this gripping and accessible book is a portrait of a nation caught in a geopolitical tug of war between russia and the west while russia is identified as the sole aggressor we see how western bodies such as the eu and nato unrealistically raised ukraine's expectations of membership before dashing them leaving ukraine without formal allies and fatally exposed to russian aggression as a former international observer samir puri was present for several of the major events covered in this book he uses this experience to ask honestly how did we get here why does vladimir putin view ukraine as the natural property of russia did the west handle its dealings with these countries prudently or did it inflame the tensions left amidst the ruins of the soviet union were there any missed opportunities to avert the war and how might this conflict end

we study the impact of technology on the reaction of financial markets to information focusing on the foreign exchange market we contrast the thin skinned view that technological improvements cause markets to react more to new information with the thick skinned view that they react less we pinpoint exogenous technological changes using the timing of the connection of countries via the submarine fiber optic cables used for electronic trading cable connections dampen the response of exchange rates to macroeconomic news consistent with the thick skinned hypothesis this is in line with the view that technology eases access to information and reduces trend following behavior according to our estimates cable connections reduce the reaction of exchange rates to u s monetary policy news by 50 to 80 percent
