web learn what a web application is how it works and what benefits it offers find out how aws can help you build host and scale web applications with its services and solutions

what is a app a beginner s guide hubspot blog Mar 07 2024

a web app is a type of app that can be accessed through a web browser while a mobile app is a type of app that is built for a specific platform and download

application wikipedia *Feb 06 2024*

in earlier computing models like client server the processing load for the application was shared between code on the server and code installed on each client locally in other words an application had its own pre compiled client program which served as its user interface and had to be separately installed on each user s personal computer an upgrade to the server side code of the application would typically also require an upgrade to the client side code installed on each
