a clear eyed look at how ai can complement rather than eliminate human jobs with real world examples from companies that range from netflix to walmart descriptions of ai's possible effects on businesses and their employees cycle between utopian hype and alarmist doomsaying this book from mit sloan management review avoids both these extremes providing instead a clear eyed look at how ai can complement rather than eliminate human jobs with real world examples from companies that range from netflix to walmart the contributors show that organizations can create business value with ai by cooperating with it rather than relinquishing control to it the smartest companies know that they don't need ai that mimics humans because they already have access to resources with human capability actual humans the book acknowledges the prominent role of such leading technology companies as facebook apple amazon netflix and google in applying ai to their businesses but it goes beyond the faang cohort to look at ai applications in many nontechnology companies including dhl and fidelity the chapters address such topics as retraining workers who may be more ready for change than their companies are the importance of motivated and knowledgeable leaders the danger that ai will entrench less than ideal legacy processes ways that ai could promote gender equality and diversity ai and the global loneliness epidemic and the benefits of robot human collaboration contributors cynthia m beath megan beck joe biron erik brynjolfsson jacques bughin rumman chowdhury paul r daugherty thomas h davenport chris debrusk berkeley j dietvorst janet foutty james r freeland r edward freeman julian friedland lynda gratton francis hintermann vivek kalyal david kiron frieda klotz jonathan lang barry libert paul michelman daniel rock sam ransbotham jeanne w ross eva sage gavin chad syverson monideepa tarafdar gregory unruh madhu vazirani h james wilson

In the years since the now classic *Pioneering Portfolio Management* was first published, the global investment landscape has changed dramatically, but the results of David Swensen's investment strategy for the Yale University endowment have remained as impressive as ever. Year after year, Yale's portfolio has trumped the marketplace by a wide margin, and with over 20 billion added to the endowment under his twenty-three year tenure, Swensen has contributed more to Yale's finances than anyone ever has to any university in the country. What may have seemed like one among many success stories in the era before the Internet bubble burst emerges now as a completely unprecedented institutional investment achievement. In this fully revised and updated edition, Swensen, author of the bestselling personal finance guide *Unconventional Success*, describes the investment process that underpins Yale's endowment. He provides lucid and penetrating insight into the world of institutional funds management, illuminating topics ranging from asset allocation structures to active fund management. Swensen employs an array of vivid real-world examples, many drawn from his own formidable experience, to address critical concepts such as handling risk, selecting advisors, and weathering market pitfalls. Swensen offers clear and incisive advice, especially when describing a counterintuitive path: conventional investing too often leads to buying high and selling low. Trust is more important than flash in the pan success; expertise, fortitude, and the long view produce positive results, where gimmicks and trend following do not. The original *Pioneering Portfolio Management* outlined a commonsense template for structuring a well-diversified equity-oriented portfolio. This new edition provides fund managers and students of the market an up-to-date guide for actively managed investment portfolios.

James Twitchell takes an in-depth look at the ads and ad campaigns and their creators that have most influenced our culture and marketplace in the twentieth century. P.T. Barnum's creation of buzz, Pepsodent and the magic of the preemptive claim, Listerine introducing America to the scourge of halitosis, Nike's "Just do it," Clairol's "Does she or doesn't she," Leo Burnett's invention of the Marlboro man, Revlon's "Charlie Girl," Coke's re-creation of Santa Claus, Absolut, and the art world: these campaigns are the signposts of a century of consumerism, our modern canon, understood, accepted, beloved, and hated, the world over.
