the cities of refuge or the name of jesus is a historical work by the revered john ross macduff the work is a sunday sermon about the cities of refuge a phenomenon in the israeli culture of ancient times the cities of refuge gave shelter to people who caused someone s accidental death although they were considered unguilty they could suffer the revenge of victims relatives yet they received lifelong protection from revenge in the cities of refuge the first global and comparative study of litigation in which refugees seek protection from a place of ostensible refuge how states deny the full potential of refugees as people and perpetuate social inequality as the world confronts the largest refugee crisis since world war ii wealthy countries are being called upon to open their doors to the displaced with the assumption that this will restore their prospects for a bright future refuge follows syrians who fled a brutal war in their homeland as they attempt to rebuild in countries of resettlement and asylum their experiences reveal that these destination countries are not saviors they can deny newcomers potential by failing to recognize their abilities and invest in the tools they need to prosper heba gowayed spent three years documenting the strikingly divergent journeys of syrian families from similar economic and social backgrounds during their crucial first years of resettlement in the united

states and canada and asylum in germany all three countries offer a legal solution to displacement while simultaneously minoritizing newcomers through policies that fail to recognize their histories aspirations and personhood the united states stands out for its emphasis on self sufficiency that integrates refugees into american poverty which by design is populated by people of color and marked by stagnation gowayed argues that refugee human capital is less an attribute of newcomers than a product of the same racist welfare systems that have long shaped the contours of national belonging centering the human experience of displacement refuge shines needed light on how countries structure the potential of people new arrivals or otherwise within their borders impossible refuge brings the perspectives of refugees into rapidly emerging dialogues about contemporary situations of mass forced migration asking what does it mean to be displaced based on multi sited ethnographic research conducted with refugees from central africa living in situations of protracted asylum in uganda and resettlement in australia the book provides a unique comparative analysis of global humanitarian systems and the experiences of refugees whose lives are interwoven with them the book problematises the solutions that are currently in place to resolve the displacement of refugees considering that since displacement cannot be reduced to a politico legal problem but is an experience that resonates at an existential level it cannot be assumed that politico legal solutions to displacement automatically resolve what is fundamentally an existential state of being impossible refuge therefore offers a new theoretical foundation through which to think about the experiences of refugees as well as the

systems in place to manage and resolve their displacement the book argues that the refuge provided to refugees through international humanitarian systems is conditional requiring that they conform to lifestyles that benefit the hegemonic future horizons of the societies that host and receive them impossible refuge calls for new ways of approaching displacement that go beyond the exceptionality of refugee experience to consider instead how the contestation and control of possible futures makes displacement a general condition of our time as such it will appeal to scholars across the social sciences with interests in migration and refugees humanitarianism and violence sovereignty and citizenship cosmology and temporality and african studies broadly this timely gift book offers a moving new perspective on the nativity story evoking the struggle of mary joseph and baby jesus as refugees traveling in a strange land seeking the protection and kindness of strangers everyone may already know the story of how jesus was humbly born in a manger but refuge is a lyrical depiction of what came next the new family s travels through the desert fleeing herod s soldiers in order to find a safe place to welcome their son into the world a poetic and refreshing look at the classic christmas story that s never been more relevant refuge asks readers to consider the modern day implications of being forced to flee your home country a country of refuge is a poignant thought provoking and timely anthology of writing on asylum seekers from some of britain and ireland s most influential voices compiled and edited by human rights activist and writer lucy popescu this powerful collection of short fiction memoir poetry and essays explores what it really means to be a refugee to flee from conflict

poverty and terror to have to leave your home and family behind and to undertake a perilous journey only to arrive on less than welcoming shores these writings are a testament to the strength of the human spirit the contributors articulate simple truths about migration that will challenge the way we think about and act towards the dispossessed and those forced to seek a safe place to call home taking an interdisciplinary approach and focusing on the social and psychological resources that promote resilience among forced migrants this book presents theory and evidence about what keeps refugees healthy during resettlement the book draws on contributions from cultural psychiatry anthropology ethics nursing psychiatric epidemiology sociology and social work concern about immigrant mental health and social integration in resettlement countries has given rise to public debates that challenge scientists and policy makers to assemble facts and solutions to perceived problems since the 1980s refugee mental health research has been productive but arguably overly focused on mental disorders and problems rather than solutions social science perspectives are not well integrated with medical science and treatment which is at odds with social reality and underlies inadequacy and fragmentation in policy and service delivery research and practice that contribute to positive refugee mental health from canada and the u s show that refugee mental health promotion must take into account social and policy contexts of immigration and health care in addition to medical issues despite traumatic experiences most refugees are not mentally ill in a clinical sense and those who do need medical attention often do not receive appropriate care as recent studies show social and cultural

determinants of health may play a larger role in refugee health and adaptation outcomes than do biological factors or pre migration experiences this book's goal therefore is to broaden the refugee mental health field with social and cultural perspectives on resilience and mental health refugee in a moving world draws together more than thirty contributions from multiple disciplines and fields of research and practice to discuss different ways of engaging with and responding to migration and displacement the volume combines critical reflections on the complexities of conceptualizing processes and experiences of forced migration with detailed analyses of these experiences in contemporary and historical settings from around the world through interdisciplinary approaches and methodologies including participatory research poetic and spatial interventions ethnography theatre discourse analysis and visual methods the volume documents the complexities of refugees and migrants journeys this includes a particular focus on how people inhabit and negotiate everyday life in cities towns camps and informal settlements across the middle east and north africa southern and eastern africa and europe betts and collier offer innovative insights into how to more effectively meet this challenge with an important new focus on international solidarity and refugee empowerment kofi annan refugees and policy makers need practical answers to what is now a global crisis this valuable book represents the kind of can do thinking that we need to see david miliband an eye opening account of the migrant crisis which shows why our global refugee regime is broken and how it can be fixed europe is facing its greatest refugee crisis since the second world war yet the institutions responding to

it remain virtually unchanged from those created in the post war era as neighbouring countries continue to bear the brunt of the syrian catastrophe european governments have enacted a series of ill considered gestures from shutting their borders to welcoming refugees without a plan for their safe passage or integration upon arrival with a deepening crisis and a xenophobic backlash in europe it is time for a new vision for refuge going beyond the scenes of desperation which have become all too familiar in the past few years alexander betts and paul collier show that this crisis offers an opportunity for reform if international policy makers focus on delivering humane effective and sustainable outcomes both for europe and for countries that border conflict zones refugees need more than simply food tents and blankets and research demonstrates that they can offer tangible economic benefits to their adopted countries if given the right to work and education an urgent and necessary work refuge sets out an alternative vision that can empower refugees to help themselves contribute to their host societies and even rebuild their countries of origin new formulations of globalisation have radically altered how people conceptualize the movement of people ideas and capital throughout the globe with questions of securitisation and transnational sentiment re shaping long standing western concepts of asylum and human rights questioning the manner in which the reception of sanctuary in modern australia changes migrants sense of belonging this interdisciplinary volume focuses on the disjuncture between receiving sanctuary and feeling secure in one s self and community with emphasis on the formation and expression of migrant and refugee cultures the book deliberately blurs the distinction between

migrants and refugees in order to engage more directly with the subjectivities of lived experience and social networks presenting research from the fields of sociology media studies politics international relations and history cultures in refuge places explores the manner in which notions of asylum and refuge affect the processes of articulating and negotiating identities how to assess and deal with the claims of millions of displaced people to find refuge and asylum in safe and prosperous countries is one of the most pressing issues of modern political philosophy in this timely volume fresh insights are offered into the political and moral implications of refugee crises and the treatment of asylum seekers the contributions illustrate the widening of the debate over what is owed to refugees and why it is assumed that national state actors and the international community owe special consideration and protection among the specific issues discussed are refugees rights and duties refugee selection whether repatriation can be encouraged or required and the ethics of sanctuary policies in the spring of 1983 terry tempest williams learned that her mother was dying of cancer that same season the great salt lake began to rise to record heights threatening the bear river migratory bird refuge and the herons owls and snowy egrets that williams a poet and naturalist had come to gauge her life by one event was nature at its most random the other a by product of rogue technology terry s mother and terry herself had been exposed to the fallout of atomic bomb tests in the 1950s as it interweaves these narratives of dying and accommodation refuge transforms tragedy into a document of renewal and spiritual grace resulting in a work that has become a classic this work has been selected by scholars as being culturally

how states deny the full potential of refugees as people and perpetuate social inequality as the world confronts the largest refugee crisis since world war ii wealthy countries are being called upon to open their doors to the displaced with the assumption that this will restore their prospects for a bright future refuge follows syrians who fled a brutal war in their homeland as they attempt to rebuild in countries of resettlement and asylum their experiences reveal that these destination countries are not saviors they can deny newcomers potential by failing to recognize their abilities and invest in the tools they need to prosper heba gowayed

spent three years documenting the strikingly divergent journeys of syrian families from similar economic and social backgrounds during their crucial first years of resettlement in the united states and canada and asylum in germany all three countries offer a legal solution to displacement while simultaneously minoritizing newcomers through policies that fail to recognize their histories aspirations and personhood the united states stands out for its emphasis on self sufficiency that integrates refugees into american poverty which by design is populated by people of color and marked by stagnation gowayed argues that refugee human capital is less an attribute of newcomers than a product of the same racist welfare systems that have long shaped the contours of national belonging centering the human experience of displacement refuge shines needed light on how countries structure the potential of people new arrivals or otherwise within their borders

Impossible Refuge 2017-10-16

impossible refuge brings the perspectives of refugees into rapidly emerging dialogues about contemporary situations of mass forced migration asking what does it mean to be displaced based on multi sited ethnographic research conducted with refugees from central africa living in situations of protracted asylum in uganda and resettlement in australia the book provides a unique comparative analysis of global humanitarian systems and the experiences of refugees whose lives are interwoven with them the book problematises the solutions that are currently in place to resolve the displacement of refugees considering that since

displacement cannot be reduced to a politico legal problem but is an experience that resonates at an existential level it cannot be assumed that politico legal solutions to displacement automatically resolve what is fundamentally an existential state of being impossible refuge therefore offers a new theoretical foundation through which to think about the experiences of refugees as well as the systems in place to manage and resolve their displacement the book argues that the refuge provided to refugees through international humanitarian systems is conditional requiring that they conform to lifestyles that benefit the hegemonic future horizons of the societies that host and receive them impossible refuge calls for new ways of approaching displacement that go beyond the exceptionality of refugee experience to consider instead how the contestation and control of possible futures makes displacement a general condition of our time as such it will appeal to scholars across the social sciences with interests in migration and refugees humanitarianism and violence sovereignty and citizenship cosmology and temporality and african studies broadly

Refuge 2016-10-18

this timely gift book offers a moving new perspective on the nativity story evoking the struggle of mary joseph and baby jesus as refugees traveling in a strange land seeking the protection and kindness of strangers everyone may already know the story of how jesus was humbly born in a manger but refuge is a lyrical depiction of what came next the new family s travels through the desert fleeing herod s soldiers in order to find a safe place to welcome their son into the world

a poetic and refreshing look at the classic christmas story that's never been more relevant. Refuge asks readers to consider the modern day implications of being forced to flee your home country.

A Country of Refuge 2016-06-02

A Country of Refuge is a poignant thought provoking and timely anthology of writing on asylum seekers from some of Britain and Ireland's most influential voices compiled and edited by human rights activist and writer Lucy Popescu. This powerful collection of short fiction, memoir, poetry and essays explores what it really means to be a refugee: to flee from conflict, poverty and terror; to have to leave your home and family behind; and to undertake a perilous journey only to arrive on less than welcoming shores. These writings are a testament to the strength of the human spirit. The contributors articulate simple truths about migration that will challenge the way we think about and act towards the dispossessed and those forced to seek a safe place to call home.

Refuge and Resilience 2014-06-05

Taking an interdisciplinary approach and focusing on the social and psychological resources that promote resilience among forced migrants, this book presents theory and evidence about what keeps refugees healthy during resettlement. The book draws on contributions from cultural psychiatry, anthropology, ethics, nursing, psychiatric epidemiology, sociology and social work. Concern about

immigrant mental health and social integration in resettlement countries has given rise to public debates that challenge scientists and policy makers to assemble facts and solutions to perceived problems since the 1980s refugee mental health research has been productive but arguably overly focused on mental disorders and problems rather than solutions social science perspectives are not well integrated with medical science and treatment which is at odds with social reality and underlies inadequacy and fragmentation in policy and service delivery research and practice that contribute to positive refugee mental health from canada and the u s show that refugee mental health promotion must take into account social and policy contexts of immigration and health care in addition to medical issues despite traumatic experiences most refugees are not mentally ill in a clinical sense and those who do need medical attention often do not receive appropriate care as recent studies show social and cultural determinants of health may play a larger role in refugee health and adaptation outcomes than do biological factors or pre migration experiences this book s goal therefore is to broaden the refugee mental health field with social and cultural perspectives on resilience and mental health

to welcoming refugees without a plan for their safe passage or integration upon arrival with a deepening crisis and a xenophobic backlash in europe it is time for a new vision for refuge going beyond the scenes of desperation which have become all too familiar in the past few years alexander betts and paul collier show that this crisis offers an opportunity for reform if international policy makers focus on delivering humane effective and sustainable outcomes both for europe and for countries that border conflict zones refugees need more than simply food tents and blankets and research demonstrates that they can offer tangible economic benefits to their adopted countries if given the right to work and education an urgent and necessary work refuge sets out an alternative vision that can empower refugees to help themselves contribute to their host societies and even rebuild their countries of origin
