Representing Modern Istanbul

2022-01-27

following the collapse of the ottoman empire istanbul would lose its position as capital yet remain a crucial urban centre in the new turkish republic since the 1950s it has undergone a metamorphosis from a mid sized city to a megapolis beyoglu historically represented as its most cosmopolitan district and home to european embassies and cultural institutions is a microcosm of these changes this book explores the urban history of beyoglu via a series of case studies which use previously unexamined archival material to tell the story of its local and international institutions from the german teutonia club and a centre point of turkey s cinema culture to influential francophone british and german schools which educated many of turkey s future elite the book charts the shifting identities of the residents of the district these case studies reveal the effects of changing political circumstances from the rise of nationalism to turkey s place in the cold war as well as critically examining beyoglu s legacy as a multicultural centre in the process the book reveals a picture of resilience cross cultural contact and provides an important contribution to our understanding of present day and historical istanbul and beyoglu

Encyclopaedia of German diatheses

2023-03-14

diathesis valency alternation is a sentence structure that reshapes the roles of a verb the prototypical example of such a diathesis is the well known passive however there are very many other such role remappings like antipassives applicatives causatives etc this book presents an encyclopaedic survey of diathesis in german the objective is to catalogue all diatheses that exist in this language currently almost 250 different german diatheses are described in this book some highly productive some only attested for a handful of verbs the main goal of this book is to present this wealth of grammatical possibility in a unified manner while at the same time attempting to classify and organise this diversity a summary of the about 80 most prominent diatheses is also provided including many newly minted german names because most these diatheses did not have a german name yet it might come as a surprise that there are so many different diatheses in german but my impression is that in this respect german is no exception among the world s languages i expect that all languages have a similar abundance of different ways in which to construe a sentence around a lexical predicate in a sense a diathesis allows for the expression of a distinct perspective on the event described something that is arguably a common desire of any language user except for diathesis this book also aims to completely catalogue its counterpart epithesis an epithesis is a derived sentence structure in which the marking of the verb roles remains constant basically these are the grammaticalised constructions expressing tense aspect mood evidentiality in german the list of major epitheses is also quite long about 40 constructions but it is quite a bit smaller than the list of major diatheses about 80 constructions this indicates that from a purely grammatical perspective diathesis grammaticalises more roles than epithesis

the information revolution changed the way state organized
disinformation campaigns are conducted the spreading of various
forms of propaganda confusing half truths and pure falsehoods
has accelerated and social media has made it possible to reach an
increasing number of people in a targeted fashion in an ever
shorter news cycle in the past disinformation actors mostly tried
to persuade an audience of a single made up story nowadays in
the so called post truth era disinformation actors rather attempt
to dissuade an audience of the evidence based story by
disseminating an unending number of alternative narratives at
the core of this research lays the question how to deal with

The History of German Literature on

Film 2023-06-15

this book tells the story of german language literature on film beginning with pioneering motion picture adaptations of faust in 1897 and early debates focused on high art as mass culture it explores analyzes and contextualizes the so called golden age of silent cinema in the 1920s the impact of sound on adaptation practices the abuse of literary heritage by nazi filmmakers and traces the role of german language literature in exile and postwar films across ideological boundaries in divided germany in new german cinema and in remakes and movies for cinema as well as television and streaming services in the 21st century having provided the narrative core to thousands of films since the late 19th century many of german cinema s most influential masterpieces were inspired by canonical texts popular plays and even children s literature not being restricted to german adaptations however this book also traces the role of literature originally written in german in international film productions which sheds light on the interrelation between cinema and key historical events it outlines how processes of adaptation are shaped by global catastrophes and the emergence of nations by materialist conditions liberal economies and capitalist imperatives political agendas the mobility of individuals and sometimes by the desire to create reflective surfaces and perhaps even art commercial cinema s adaptation practices have foregrounded economic interest but numerous filmmakers throughout cinema history have turned to german language literature not simply to entertain but as a creative contribution to the public sphere marking adaptation practice at least potentially as a form of active citizenship

Decolonizing Childhoods 2020-05-06

Liebel presents critical postcolonial and decolonial thought currents along with international case studies from countries in Africa, Latin America, and former British settler colonies to examine the complex and multiple ways that children throughout the global south continue to live with the legacy of colonialism. Building on the work of Cannella and Viruru, he explores how these children are affected by unequal power relations, paternalistic policies, and violence by state and non-state actors, before showing how we can work to ensure that children's rights are better promoted and protected globally.
