this book highlights the relationship between disasters and development through a socio cultural study of human geography and governance institutions it studies the cause context and consequences of disasters in one of the most fragile himalayan regions in india the book establishes the fact that disaster management is built within the framework of good governance

without which it has no meaning for lack of effective and responsive governance development has lagged behind and even though the frequency of disasters has been increasing little is being done to redesign developmental frameworks to prevent ensuing losses besides the near absence of governmental support during recurrent disasters communities have cumulatively become reservoirs of innovations to cope up with disasters the resilience plans need not follow implanted models but may be cost effective only if they apply a bottom up approach just as the region is culturally diverse so are the challenges encountered by local communities in terms of generating resilience to every disaster despite more than a decade of the disaster management act dma of 2005 most of the states in this northeastern fringe of india continue to wait for its implementation beyond mere structures and offices the book suggests that urgent action is required in accordance with the dma 2005 towards inter agency coordination proactive participation of local governance mobilization of community based organizations cbos and curriculum based training in every academic and technical institution governments of these northeastern states of india should establish accountability of state disaster management authorities and inspire them to participate proactively with communities for an effective resilience building in the region

disability studies scholars and activists have long criticized and critiqued so termed charitable approaches to disability where the capitalization of individual disabled bodies to invoke pity are historically socially and politically circumscribed by paternalism disabled individuals have long advocated for civil and human rights in various locations throughout the globe yet contemporary human rights discourses problematically co opt disabled bodies as evidence of harms done under capitalism war and other forms of conflict while humanitarian non governmental organizations often use disabled bodies to generate resources for their humanitarian projects it is the connection between civil rights and human rights and this concomitant relationship between national and global which foregrounds this groundbreaking book s contention that disability studies productively challenge such human rights paradigms which troublingly eschew disability rights in favor of exclusionary humanitarianism it relocates disability from the margins to the center of academic and activist debates over the vexed relationship between human rights and humanitarianism these considerations thus productively destabilize able bodied assumptions that undergird definitions of personhood in civil rights and human rights by highlighting intersections between disability race gender ethnicity and sexuality as a way to interrogate the possibilities and limitations of human rights as a politicized regime
