in every country across europe at some point or other during the last five hundred years cheap printed materials were the staple diet of ordinary people providing a rich array of entertainment education and information they came in various forms but were usually variations on the theme of single sheets or simple booklets and they were carried far and wide in pedlars packs and sold in the streets at fairs and markets and wherever crowds gathered as well as in backstreet shops their content was as broad as can be imagined news and scandal crimes and last dying confessions of murderers divinations instructional works wonder stories miracles folktales and legends love stories celebrations of national victories and lamentations for the good old days they were often couched in the form of poetry or song and included pictures in the form of woodcuts and engravings to add to their appeal in every country

European governments and local and religious authorities tried at times to suppress or control these cheap printed materials. Sometimes too the authorities would adopt the format of cheap print to spread their own moral and conformist messages. The educated elites almost always treated cheap print with disdain but the people continued to buy these items in their tens of thousands and the printers knew exactly what they wanted. Neglected and reviled for centuries, cheap print shines a light on the culture and lives of ordinary people. This is the first volume to take a pan-European perspective with each chapter detailing the experience of a particular country or region, offering the reader the opportunity to progress from the particular to a continent-wide overview. This combination of the ubiquity of the materials and overarching themes with the variations wrought by local circumstances can be summed up in the phrase: always the same but everywhere different.

This book highlights the close interactions between plants, plant knowledge, politics, and social life in Padua during the age of revolution. It explores the lives and thoughts of two brothers: the lawyer Andrea Meneghini and the botanist Giuseppemeneghini, illustrating the unspoken dreams of progress and a new social order but also sheds light on the ambiguous relationship between the Paduan elite and Austrian rule before the 1848 revolution. A closer look at park designs, gardening associations, and networks, flower exhibitions, agricultural societies, organicist metaphors, and botanical research on the organization of living bodies opens up unexpected parallels between actors and ideas of two apparently distant areas: botany and political economy.

witchcraft and magic are topics of enduring interest for many reasons the main one lies in their extraordinary interdisciplinarity anthropologists folklorists historians and more have contributed to build a body of work of extreme variety and consistence of course this also means that the subjects themselves are not easy to assess in a very general way we can define witchcraft as a supernatural means to cause harm death or misfortune while magic also belongs to the field of supernatural or at least esoteric knowledge but can be used to less dangerous effects e g divination and astrology in western civilization however the witch hunt has set a very peculiar perspective in which diabolical witchcraft the invention of the sabbat the persecution of many thousands of mostly female and sometimes male presumed witches gave way to a phenomenon that is fundamentally different from traditional witchcraft this special issue of religions dedicated to witchcraft demonology and magic features nine articles that deal with four different regions of europe england germany hungary and italy between late medieval and modern times in different contexts and social milieus far from pretending to offer a complete picture they focus on some topics that are central to the research in those fields and fit well in the current cumulative concept of western witchcraft that rules out all mono causality theories investigating a plurality of causes
