drawing on the experiences of grassroots political activists from different socio economic and ethnic backgrounds green shoots of democracy explores how self identified progressives manage or fail to manage to work within a big city political machine although the book focuses on the work of progressives to foster democracy and transparency within the philadelphia democratic party lessons gleaned from their experiences are applicable beyond philadelphia americans have long had a history of volunteerism however grassroots partisan politics is often not considered a worthy volunteer endeavor

not as worthy as for example working in a homeless shelter or a literacy center green shoots of democracy argues for a more democratic transparent party structure one that is sorely needed to counter the widespread perception that electoral politics is dirty business rather than an honorable civic project

this book explores how london society responded to the dilemma of the rampant spread of the pox among the poor some have asserted that public authorities turned their backs on the foul and only began to offer care for venereal patients in the enlightenment an exploration of hospitals and workhouses shows a much more impressive public health response london hospitals established foul wards at least as early as the mid sixteenth century reconstruction of these wards shows that far from banning paupers with the pox hospitals made treating them one of their primary services not merely present in hospitals venereal patients were omnipresent yet the foul comprised a unique category of patient the sexual nature of their ailment guaranteed that they would be treated quite differently than all other patients class and gender informed patients experiences in crucial ways the shameful nature of the disease and the gendered notion of shame itself meant that men and women faced quite different circumstances there emerged a gendered geography of london hospitals as men predominated in fee charging hospitals while sick women crowded into workhouses patients frequently desired to conceal their infection this generated innovative services for elite patients who could buy medical privacy by hiring their own doctor however the public scrutiny that hospitalization demanded forced poor patients to be creative as they sought access to medical care that they could not afford thus venereal disease hospitals and the urban poor offers new insights on patients experiences of illness and on london s health care system itself kevin siena is assistant professor of history at trent university
