AQA GCSE English Language: AQA GCSE English Language Student Book 1 2015-01-01 learning a complex new language is no easy task especially when it s an object

oriented computer programming language like java you might think the problem is your brain it seems to have a mind of its own a mind that doesn't always want to take in the dry technical stuff you're forced to study the fact is your brain craves novelty it's constantly searching scanning waiting for something unusual to happen after all that's the way it was built to help you stay alive it takes all the routine ordinary dull stuff and filters it to the background so it won't interfere with your brain's real work recording things that matter how does your brain know what matters it's like the creators of the head first approach say suppose you're out for a hike and a tiger jumps in front of you what happens in your brain neurons fire emotions crank up chemicals surge that's how your brain knows and that's how your brain will learn java head first java combines puzzles strong visuals mysteries and soul searching interviews with famous java objects to engage you in many different ways it's fast it's fun and it's effective and despite its playful appearance head first java is serious stuff a complete introduction to object oriented programming and java you'll learn everything from the fundamentals to advanced topics including threads network sockets and distributed programming with rmi and the new second edition focuses on java 5.0 the latest version of the java language and development platform because java 5.0 is a major update to the platform with deep code level changes even more careful study and implementation is required so learning the head first way is more important than ever if you've read a head first book you know what to expect a visually rich format designed for the way your brain works if you haven't you're in for a treat you'll see why people say it's unlike any other java book you've ever read by exploiting how your brain works head first java compresses the time it takes to learn and retain complex information its unique approach not only shows you what you need to know about java syntax it teaches you to think like a java programmer if you want to be bored buy some other book but if you want to understand java this book's for you

A/AS Level English Language for AQA Student Book 2015-06-04 a historical event does not look the same to everyone it often depends on one's perspective in the viewpoints and perspectives series more advanced readers will come to understand different viewpoints by learning the context significance and details of key historical events through the eyes of three different people while engaging with text through questions sparking critical thinking books include timeline glossary and index

Head First Design Patterns 2004-10-25 help your students prepare and pass their assessment with accessible science content presented at the right level a new edition that completely covers the most recent specification with up to date past paper questions written by best selling authors with substantial examining experience at both foundation and higher level for ccea builds up your students knowledge with key word definitions throughout enables practise for assessment with test yourself sections and exam practice questions ensures students understanding with easy and accessible content written at the correct level

Teaching Probability 2016-08-04 this text provides students with a wide understanding of what communication means how we as humans communicate what affects communication and ways of communicating effectively students will find this text to be an essential tool in helping them become better communicators

both in school and society
