dams are constructed for economic development and their construction involves large investments of money and natural and human resources of the various types of dams constructed around the globe earth dams are the most common type and constitute the vast majority of dams when adam fails it culminates in the sudden release of artificially stored water which in turn becomes a potential menace to virtually everything downstream the dam failure may result in loss of life and property in recent years instances of dam failure in the world have been too many and the resulting loss too high as a result dam safety programs have been developed in most countries of the world since the beginning of the nineteenth eighties earth dams are more susceptible to failure than other types the cause of failure is often either overtopping or piping the modeling of dam breaching due to either or both of these causes is of fundamental importance to development of dam safety programs this book is therefore an attempt to present some aspects of earth dam breach modeling technology it is hoped that others will be stimulated to write more comprehensive texts on this subject of growing interest and importance the book is divided into eight chapters the first chapter is introductory and discusses some aspects of dams and dam failures in the world

governments of many countries consider the electrification of individual passenger transport as a suitable strategy to

decrease oil dependency and reduce transport related carbon dioxide co2 and air pollutant emissions however battery electric vehicles bevs and plug in hybrid electric vehicles phevs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of bevs and phevs in the short to mid term here the author seeks to obtain insight into the techno economic prospects of bevs and phevs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis the analysis captures the situation in germany between 2010 and 2016

## **Learning Rates of Electric Vehicles**

1977

fifteen years have passed since i was working at a dam site supervising grouting work that was not the first time that i had to carry out engineering geological investigations for several similar projects which always included testing programmes to find out the permeability of the rock and often i was in charge of grouting work it thus attracted my attention when this particular grouting programme did not run as intended most of the grout holes took only very little grout it could not be the aim of the invested work simply to drill holes and fill them again without bringing about any further improvement fortunately i had the chance to be engaged in many other grouting programmes in the following years and used all these examples to analyse as thoroughly as possible the permeability of the rocks being treated in view of their grout ability the more i studied the stronger my conviction grew that our rules which had decided the grouting of rock for many decades should be developed further and therefore i occupied my self with contributing some ideas for a new basis to investigation and judgment of permeability of rock and for a more adequate application of this technology

this is the first book to focus on international efforts to address syrian chemical weapons issues in an international law context it provides an overview of the process of control over syrian compliance non compliance with international obligations including the keys to success in eliminating syria s stockpiles and reasons for difficulties in handling multiple uses of toxic chemicals as weapons in domestic armed conflicts it also addresses collective and unilateral sanctions against syria outside of international institutional frameworks and their implications for subsequent cases supported by extensive analyses of developments within the opcw executive council and the un security council this book is recommended for readers seeking insight about chemical weapons issues and dynamism of international law

## **Mapping Innovation in India's Creative Industries**

2023-11-02

this is an open access book which focuses on different aspects of education employment and successful integration of migrants in three countries norway sweden and switzerland the chapters in this book reflect on these issues from micro meso and macro perspectives some are based on interviews with migrants and people who work with them others on documents and literature about migration there are different pathways for skilled migrants to vocations some start working in their previous vocations after arriving in the new environment some re enter their professions but on a lower

level some can re train themselves in a new vocation and some will go to further education as studies in different chapters of this book suggest common for successful integration seems to be several intertwined factors the target language competence strong motivation and agency supporting networks and supporting persons as well as structural opportunities of the new environment the book's editorial board takes an eclectic view hoping to start an academic debate about what successful integration means while discussions about the integration of migrants tend to focus on integration failures there are millions of migrants in different countries who have successfully integrated into their new societies

## **The Principle of Equality in Diverse States**

2022-06-28

this book presents an important discussion on land tenure rights for the effective implementation of sustainable soil management provisions it investigates a variety of aspects such as the clash of modern and traditional tenure concepts forms of illegal or illegitimate land acquisition and the preconditions for legal and legitimate investments in addition the book analyses the challenges to ensuring secure land tenure rights in africa and in germany lastly it provides information on the role of women in this context this fifth volume of the international yearbook of soil law and policy is divided into four parts the first of which deals with various aspects of the theme land tenure rights and sustainable soil management the second part covers recent international developments the third part presents regional and national reports and the fourth discusses overarching issues given the range of key topics covered the book offers an indispensable tool for all academics legislators and policymakers working in this field the international yearbook of soil law and policy series discusses central questions in law and politics with regard to the protection and sustainable management of soil and land at the international national and regional level

threat intelligence is a surprisingly complex topic that goes far beyond the obvious technical challenges of collecting modelling and sharing technical indicators most books in this area focus mainly on technical measures to harden a system based on threat intel data and limit their scope to single organizations only this book provides a unique angle on the topic of national cyber threat intelligence and security information sharing it also provides a clear view on ongoing works in research laboratories world wide in order to address current security concerns at national level it allows practitioners to learn about upcoming trends researchers to share current results and decision makers to prepare for future developments

## **Migration, Education and Employment**

2020-02-24

this book presents the health reform experiences over the past three decades of twelve small and medium sized nations that are not often included in international comparative studies in this field the major conclusion of the study is that despite many similarities in policy goals policy challenges and in the menu of policy options for countries that seek to offer universal coverage to their population the health reforms of the nations in this book did not converge into one direction or model however we found several widespread policy experiences that are relevant for others too for example user fees are unpopular everywhere governments often try to soften the consequences by exempting large groups of users thus largely defeating the very purpose of those fees as a second example the introduction of new payment modes for medical care like the shift from fee for service to case based payment took much longer than originally expected everywhere and also failed to deliver their promises of improved transparency or efficiency gains a third example is that proposals are for universal coverage often ignore the challenges of implementing new financing models that elsewhere took decades if not centuries to develop the conclusions contain both empirical findings and theoretical conclusions of interest to policy makers and scholars of international comparison it is accessible for academics healthcare managers and students as well as a wider audience of readers interested in the changes in healthcare across the world

## **International Yearbook of Soil Law and Policy 2020/2021**

2020-08-06

conflicts in western societies have been on the rise and not just since the financial crisis of 2008 this is generally explained in economic terms with growing disparities in wealth and income the left should benefit from this with its redistribution philosophy however the right is on the upswing even though its neoliberalism is fueling social conflicts how is that behind the economic tensions lies a deep crisis of meaning the right is exploiting this by offering simplistic set pieces of meaning with success because people strive for nothing so much as meaning in their own lives the example of the usa shows how neoliberalism destroys people and societies possible solutions also come from there
