product manual provides detailed instructions for setting up and using your rescuelogic fire
alarm receiving station and annunciator software what is rescuelogic rescuelogic is safety
made simple rescuelogic is software for fire alarm and security systems rescuelogic make it
easy to access all of the data from every alarm panel and smart device in your building all in
a single streamlined interface rescuelogic is easy to install and easy to set up with your
maps and floor plans you can even choose to send automatic email and text alerts about the

a complete facility fire brigade training solution the national fire protection association nfpa and the international association of fire chiefs iafo are pleased to bring you the second edition of facility fire brigade principles and practice a modern integrated teaching and learning system for four levels of a facility fire brigade these four levels are incipient facility fire brigade member advanced exterior facility fire brigade member interior structural facility fire brigade member facility fire brigade leader today s facility fire brigade members protect all types of facilities as they answer these calls it is imperative that no gaps in knowledge compromise their effectiveness or their safety in protecting who

they serve facility fire brigade members need up to date comprehensive training materials to thoroughly prepare for any situation that may arise current content this text addresses the 2018 edition of the nfpa 1081 standard for facility fire brigade member professional qualifications it also provides essential guidance for compliance with osha regulations 29 cfr 1910 156 as well as nfpa 600 standard on facility fire brigades dynamic features the features found in the text will help your students take that extra step toward becoming outstanding fire brigade members they include detailed case studies expanded skill drills advice and encouragement from veteran facility brigade leaders

the modern definition of firefighter no longer means putting the wet stuff on the red stuff emergency responders answer incidents ranging from fire alarm activations to elevator rescues and medical emergencies more often than full blown fires consequently responders increasingly interface with a wide array of building systems underscoring the changing role of firefighters fire protection systems and response presents the basic knowledge of the inner workings of fire safety fire protection systems and related equipment in buildings the author provides a straightforward overview of the functions and benefits of these systems and how they can assist with fire suppression code enforcement alarm response and elevator rescue the book s comprehensive discussion of elevators fire command centers emergency generators and lighting and hvac systems sets it apart from other fire protection books currently available the topics

covered prepare emergency response personnel for the challenges they face working with fire protection systems fire alarm systems and elevators logically organized clearly written and covering all systems in a single text this presentation of information streamlines fire service interaction with building features and fire protection systems providing an understanding of how systems are designed and installed the book is also a reference for troubleshooting fire protection problems in the field the information not only gives responders an appreciation knowledge of how the systems work but helps them use this knowledge to perform their job better

incidents involving rescue from road vehicles are dramatically increasing in frequency there are some 3500 deaths on the road each year with 35 000 serious injuries modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped the fire and rescue service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the uk this manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care each chapter forms an independent reference source but the publication as a whole forms a complete guide chapters cover vehicle design and construction dealing with incidents safety procedures operational procedures extrication equipment medical considerations and trauma care integrated personal development system i p d s appendices cover highways agency fire and rescue service memorandum of understanding training and general information and emergency services personnel esp aide m moire the cd rom vehicle extrication techniques is a multi media guide to rescue tool

there are three primary goals that this book wishes to achieve 1 herein is the most prevalent standardized electrical calculations for use in reducing redundancy in the work effort reducing repetitive errors and freeing up more time for productive and innovative and imaginative engineering solutions 2 providing a standardized checklist worksheet for field survey work of existing conditions to help facilitate obtaining all the necessary materials the first time around and without errors and omissions and 2 the maximum security achievable for our highly classified facilities that we are dependent upon for our survival four secondary goals we wish to achieve are 1 various methods for conserving energy and resources 2 the evaluation of life cycle of energy saving design techniques and equipment selection 3 the use of a standardized value engineering ve guide when performing value engineering workshops and 4 employing various a and e ve methods that can be employed for reducing first costs operating costs and life cycle costs lccs all the while conserving energy and resources
