in the past century asian nations have experienced a wave of democratisation as countries in the region have gained independence or transitioned from authoritarian military rule towards more participatory politics at the same time there has been an expansion of judicial power in asia whereby new courts or empowered old ones emerge as independent constraints on governmental authority this is the first book to assess the judicial review of elections in asia it provides important insights into how asian courts can strategically engage with the political actors in their jurisdictions and contribute to a country s democratic discourse each chapter in the book sheds light on the judicial review of elections and the electoral process in a specific asian jurisdiction including common law asia namely hong kong india malaysia and singapore as well as jurisdictions in civil law asia namely indonesia japan the republic of korea taiwan and thailand it fills a gap in the literature by addressing a central challenge to democratic governance namely the problem of partisan self dealing in the electoral processes by exploring the constantly evolving role of the courts in addressing pivotal constitutional questions this book will be of interest to students and scholars of asian law governance and politics

a small book with great weight and urgency to it this is both a history of democracy and a clarion call for change without drastic adjustment this system cannot last much longer writes van reybrouck regarded today as one of europe s most astute thinkers if you look at the decline in voter turnout and party membership and at the way politicians are held in contempt if you look at how difficult it is to form governments how little they can do and how quickly populism technocracy and anti parliamentarianism are rising if you

look at how more and more citizens are longing for participation and how quickly that desire can tip over into frustration then you realize we are up to our necks not so very long ago the great battles of democracy were fought for the right to vote now van reybrouck writes it s all about the right to speak but in essence it s the same battle the battle for political emancipation and for democratic participation we must decolonize democracy we must democratize democracy as history van reybrouck makes the compelling argument that modern democracy was designed as much to preserve the rights of the powerful and keep the masses in line as to give the populace a voice as change agent against elections makes the argument that there are forms of government what he terms sortitive or deliberative democracy that are beginning to be practiced around the world and can be the remedy we seek in iceland for example deliberative democracy was used to write the new constitution a group of people were chosen by lot educated in the subject at hand and then were able to decide what was best arguably far better than politicians would have a fascinating and workable idea has led to a timely book to remind us that our system of government is a flexible instrument one that the people have the power to change

since the 2000 presidential election the united states has been embroiled in debates about electronic voting critics say the new technologies invite tampering and fraud advocates say they enhance the accuracy of vote counts and make casting ballots easier and ultimately foster greater political participation electronic elections cuts through the media spin to assess the advantages and risks associated with different ways of casting ballots and shows how e voting can be the future of american democracy elections by nature are fraught with risk michael alvarez and thad hall the handbook of financial modeling a practical approach to creating and implementing the range of past methods and the new technologies that have been created to try to minimize risk and accurately reflect the will of voters drawing upon a wealth of new data on how

different kinds of electronic voting machines have performed in recent elections nationwide they evaluate the security issues that have been the subject of so much media attention and examine the impacts the new computer based solutions is having on voter participation alvarez and hall explain why the benefits of e voting can outweigh the challenges and they argue that media coverage of the new technologies has emphasized their problems while virtually ignoring their enormous potential for empowering more citizens to vote the authors also offer ways to improve voting technologies and to develop more effective means of implementing and evaluating these systems electronic elections makes a case for how e voting can work in the united states showing why making it work right is essential to the future vibrancy of the democratic process

the 2000 election showed that the mechanics of voting such as ballot design can make a critical difference in the accuracy and fairness of our elections but as dennis f thompson shows even more fundamental issues must be addressed to insure that our electoral system is just thompson argues that three central democratic principles equal respect free choice and popular sovereignty underlie our electoral institutions and should inform any assessment of the justice of elections although we may all endorse these principles in theory thompson shows that in practice we disagree about their meaning and application he shows how they create conflicts among basic values across a broad spectrum of electoral controversies from disagreements about term limits and primaries to disputes about recounts and presidential electors to create a fair electoral system if thompson is right we must deliberate together about these principles and approach greater control of the procedures that govern our elections he demonstrates how applying the principles of justice to

the key to the impact of international election support is credibility credible elections are less likely to turn violent so argues inken von borzyskowski in the credibility challenge in which she provides an explanation of why and when election support can increase or reduce violence von borzyskowski answers four major questions under what circumstances can election support influence election violence how can election support shape the incentives of domestic actors to engage in or abstain from violence does support help reduce violence or increase it and which type of support observation or technical assistance is better in each instance the credibility challenge pulls broad quantitative evidence and qualitative observations from guyana liberia kenya sierra leone and bangladesh to respond to these questions von borzyskowski finds that international democracy aid matters for election credibility and violence outside observers can exacerbate postelection violence if they cast doubt on election credibility and technical assistance helps

in november 2006 about 18 000 undervotes were reported in sarasota county in the race for florida s 13th congressional district following the contesting of the election results in the house of representatives the task force met and unanimously voted to seek gao s assistance in determining whether the voting systems contributed to the large undervote in sarasota county on june 14 2007 we met with the task force and agreed upon an engagement plan which included the following review objectives 1 what voting systems and equipment were used in sarasota county and what processes governed their use 2 what was the scope of the undervote in sarasota county in the general election 3 to what extent were tests conducted on the voting systems in sarasota county prior to the general election and what were the results of those tests and 4 considering the tests that were conducted on the voting systems from sarasota county after the general election are additional tests needed to determine whether the voting systems contributed to the undervote in our meetings with sarasota county we learned the entire process of configuring the election running the election and tallying the results and about the testing the county conducts on the voting systems such as the logic and accuracy testing in our meetings with the division of elections we discussed the conduct of certification testing in particular the testing conducted on the es s system used in sarasota county and the conduct of the state audit how decisions were made to conduct the audit and the processes used to conduct the audit in addition we have received and are reviewing practical approach 2023-10-11 documentation received from both sources creating and the submissions from the contestant and the contestee implementing valuation projection models

provided by the task force we have identified the voting systems and equipment used in sarasota county and verified that the systems were approved for use by the florida division of elections we know that nine different ballot styles were used on the ivotronic touchscreen voting systems and have an understanding of how the ballots were configured and loaded onto the machines further it was also explained to us how votes are tallied and certified including the conduct of the machine and manual recounts we have been analyzing the detailed ballot results from the election as well as the incident and technician logs from sarasota county to identify patterns in the undervote specifically we have examined the undervote by machine precinct and ballot style patterns in the undervote could provide us insight on specific conditions that could have caused the undervote however we have not yet noticed any apparent patterns but we are continuing our analysis from our analysis we have been able to verify that 1 499 ivotronic voting systems recorded votes in the 2006 general election and the vote counts for the contestant contestee and undervotes match the vote totals for election day early voting and provisional ballots in the florida 13 race a total of 17 846 undervotes were recorded in the florida 13 race out of the 119 919 ballots cast using the ivotronic voting systems corresponding to a 14 88 percent undervote rate while we have not yet completed our review of all of the testing efforts to determine whether they provide reasonable assurance that the machines properly reflect in their totals the selections made when the ballot is cast there are some preliminary observations we can make

why our belief in government by the people is unrealistic and what we can do about it democracy for realists assails the romantic folk theory at the heart of contemporary thinking about democratic politics and government and offers a provocative alternative view grounded in the actual human nature of democratic citizens christopher achen and larry bartels deploy a wealth of social scientific evidence including ingenious original analyses of topics ranging from abortion politics and budget deficits to the great depression and shark attacks to show that the familiar ideal of thoughtful citizens steering the ship of state from the voting booth is fundamentally misguided they demonstrate that voters even those who are well informed and politically engaged mostly choose parties and candidates on the basis of social identities and partisan loyalties not political issues they also show that voters adjust their policy views and even their perceptions of basic matters of fact to match those loyalties when parties are roughly evenly matched elections often turn on irrelevant or misleading considerations such as economic spurts or downturns beyond the incumbents control the outcomes are essentially random thus voters do not control the course of public policy even indirectly achen and bartels argue that democratic theory needs to be founded on identity groups and political parties not on the preferences of individual voters now with new analysis of the 2016 elections democracy for realists provides a powerful challenge to conventional thinking pointing the way toward a fundamentally different understanding of the realities and potential of democratic government
