keep getting codes for injectors 4 5 and 6 the engine runs answered by a verified technician i have a truck with fault codes 525 fmi 6 injector dirver circuit fault m and 534 fmi 4 idm relay voltage low it doesnt show symptoms of a fault but it has the engine light on it turns on and runs fine i have checked the voltage to the idm relay and its getting 12 4 the part number will need to be the same however injector trim codes will be different highly recommend getting the trim code updated to the new injector otherwise it ll probably run rough an icp pressure sensor code will fool the engine computer with an incorrect reading which will derate the engine working with high pressures causes problems and seeks out all of the weak spots with emissions the goal is to create high pressure fuel injection so combustion is cleaner reducing carbon and soot
