a brilliant account of the politics of shit it will leave you speechless written in paris after the heady days of

student revolt in may 1968 and before the devastation of the aids epidemic history of shit is emblematic of a wild and adventurous strain of 1970s theoretical writing that attempted to marry theory politics sexuality pleasure experimentation and humor radically redefining dialectical thought and post marxist politics it takes an important and irreverent position alongside the works of such postmodern thinkers as foucault deleuze guattari and lyotard laporte s eccentric style and ironic sensibility combine in an inquiry that is provocative humorous and intellectually exhilarating debunking all humanist mythology about the grandeur of civilization history of shit suggests instead that the management of human waste is crucial to our identities as modern individuals including the organization of the city the rise of the nation state the development of capitalism and the mandate for clean and proper language far from rising above the muck laporte argues we are thoroughly mired in it particularly when we appear our most clean and hygienic laporte s style of writing is itself an attack on our desire for clean language littered with lengthy quotations and obscure allusions and adamantly refusing to follow a linear argument history of shit breaks the rules and challenges the conventions of proper academic discourse

the people's action party pap of singapore is among the longest ruling democratically elected political parties in the world in power continuously since singapore gained self rule in 1959 such longevity is the product of an institution that is itself dynamic and responsive but remarkably the story of the party as institution has not received the sustained study it deserves from either historians or political scientists this narrative history of the pap follows the story through decisions made by party leaders as they sought to respond to the changing demands and expectations of the singapore electorate over a thirty year period that saw singapore enter the ranks of developed nations the focus is on change in four dimensions in the communications methods and styles the party adopted the mechanisms it developed for managing institutional change the sometimes vexed question of party renewal and the evolution of economic and social policy drawing on internal party documents and multiple interviews with key leaders over the course of a decade this book provides a detailed portrait of a robust political institution and establishes a distinctive new narrative of singapore politics

this book takes a dramatically original approach to the history of humanity using objects which previous civilisations have left behind them often accidentally as prisms through which we can explore past worlds and the lives of the men and women who lived in them the book's range is enormous it begins with one of the earliest surviving objects made by human hands a chopping tool from the olduvai gorge in africa and ends with an object from the 21st century which represents the world we live in today neil macgregor's aim is not simply to describe these remarkable things but to show us their significance how a stone pillar tells us about a great indian emperor preaching tolerance to his people how spanish pieces of eight tell us about the beginning of a global currency or how an early victorian tea set tells us about the impact of empire each chapter immerses the reader in a past civilisation accompanied by an exceptionally well informed guide seen through this lens history is a kaleidoscope shifting interconnected constantly surprising and shaping our world today in ways that most of us have never imagined an intellectual and visual feast it is one of the most engrossing and unusual history books published in years

a literary history of our most influential book of all time by an oxford scholar and anglican priest in our culture the bible is monolithic it is a collection of books that has been unchanged and unchallenged since the earliest days of the christian church the idea of the bible as holy scripture a non negotiable authority straight from god has prevailed in western society for some time and while it provides a firm foundation for centuries of christian teaching it denies the depth variety and richness of this fascinating text in a history of the bible john barton argues that the bible is not a prescription to a complete fixed religious system but rather a product of a long and intriguing process which has inspired judaism and christianity but still does not describe the whole of either religion barton shows how the bible is indeed an important source of religious insight for jews and christians alike yet argues that it must be read in its historical context from its beginnings in myth and folklore to its many interpretations throughout the centuries it is a book full of narratives laws proverbs prophecies poems and letters each with their own character and origin stories barton explains how and by whom these disparate pieces were written how they were canonized and which ones weren't and how they were assembled disseminated and interpreted around the world and importantly to what effect ultimately a history of the

bible argues that a thorough understanding of the history and context of its writing encourages religious communities to move away from the bible's literal wording which is impossible to determine and focus instead on the broader meanings of scripture

this new work by gerald murnane is a fictionalised autobiography told in thirty sections each of which begins with the memory of a book that has left an image on the writer's mind the titles aren't given but the reader follows the clues recalling in the process a parade of authors the great the popular and the now forgotten the images themselves with their scenes of marital discord violence and madness or their illuminated landscapes that point to the consolations of a world beyond fiction give new intensity to murnane's habitual concern with the anxieties and aspirations of the writing life in the absence of religious belief a history of books is accompanied by three shorter pieces of fiction which play on these themes featuring the writer at different ages as a young boy a teacher and an old recluse

in 1939 a young vilém flusser faced the nazi invasion of his hometown of prague he escaped with his wife to brazil taking with him only two books a small jewish prayer book and goethe s faust twenty six years later in 1965 flusser would publish the history of the devil and it is the essence of those two books that haunts his own from that time his life as a philosopher was born while flusser would later garner attention in europe and elsewhere as a thinker of media culture the history of the devil is considered by many to be his first significant work containing nascent forms of the main themes that would come to preoccupy him over the following decades in the history of the devil flusser frames the human situation from a pseudo religious point of view the phenomenal world or reality in a general sense is identified as the devil and that which transcends phenomena or the philosophers and theologians reality is identified as god referencing wittgenstein s tractatus logico philosophicus in its structure flusser provocatively leads the reader through an existential exploration of nothingness as the bedrock of reality where phenomenon and

transcendence devil and god become fused and confused so radically confused in fact that flusser suggests we abandon the quotation marks from the terms devil and god at this moment of abysmal confusion we must make the existential decisions that give direction to our lives
