Fault Lines 2015-05-01

earth's fractured geology is visible in its fault lines it is along these lines that earthquakes occur sometimes with disastrous effects these disturbances can significantly influence urban development as seen in the aftermath of two earthquakes in Messina Italy in 1908 and in the Belice Valley Sicily in 1968 following the history of these places before and after their destruction this book explores plans and developments that preceded the disasters and the urbanism that emerged from the ruins these stories explore fault lines between rural and urban backwardness and development and before and after shedding light on the role of environmental forces in the history of human habitats

Breue discorso metheorologico de' terremoti, con la cronologia di tutti quelli che si sono sentiti in Roma dalla creatione del mondo sin al recente occorso sotto il regnante Pontefice Clemente 11. sulle due della notte meno un quarto il di quattordici gennaro 1703 1703

Craig Martin takes a careful look at how Renaissance scientists analyzed and interpreted rain wind and other natural phenomena like meteors and earthquakes and their impact on the great thinkers of the Scientific Revolution Martin argues that meteorology was crucial to the transformation that took place in science during the early modern period by examining the conceptual foundations of the subject Martin links Aristotelian meteorology with the new natural philosophies of the seventeenth century he argues that because meteorology involved conjecture and observation and forced attention to material and efficient causation it paralleled developments in the natural philosophies of Descartes and other key figures of the Scientific Revolution although an inherently uncertain endeavor forecasting the weather was an extremely useful component not just of scientific study but also of politics courtly life and religious doctrine Martin explores how natural philosophers of the time participated in political and religious controversies by debating the meanings causes and purposes of natural disasters and other weather phenomena through careful readings of an impressive range of texts Martin situates the history of meteorology within the larger context of Renaissance and early modern science the first study on Renaissance theories of weather in five decades Renaissance meteorology offers a novel understanding of traditional natural philosophy and its impact on the development of modern science

Renaissance Meteorology 2011-11-01

this book contains peer reviewed papers from the Second World Landslide Forum organised by the International Consortium on Landslides ICL that took place in September 2011 the entire material from the conference has been split into seven volumes this one is the fifth 1 landslide inventory and susceptibility and hazard zoning 2 early warning instrumentation and monitoring 3 spatial analysis and modelling 4 global environmental change 5 complex environment 6 risk assessment management and mitigation 7 social and economic impact and policies

Landslide Science and Practice 2013-09-02

emotions and architecture forging Mediterranean cities between the Middle Ages and early modern time explores architecture as a medium to arouse or conceal emotions to build consensus through shared values or to reconnect the urban community to its alleged ancestry the chapters in this edited collection outline how architectonic symbols images and structures were codified and sometimes recast to match or to arouse emotions awakened by wars political dominance pandemic and religion as signs of spiritual and political power these elements were embraced and modulated locally providing an endorsement to authorities and

rituals for the community this volume provides an overview of the phenomenon across the italian region stressing the transnationality of selected symbols and their various declinations in local contexts it deepens the issue of refitting symbols artworks and structures to arouse emotions by carefully analysing specific cases such as the septizodium in rome the holy house of loreto in venice and the reconstruction of l aquila the collection through its variegated contributions offers a comprehensive view of the phenomenon exploring the issue from political social religious and public health perspectives and seeking to propose a new definition of architecture as a visual emotional language together the chapters show how the representation of virtues and emotions through architecture was part of a symbolic practice shared by many across the italian context this book will be of interest to researchers and students studying architectural history the history of emotions and the history of art

Emotions and Architecture 2023-12-19

e comodo definirsi scrittori da parte di chi non ha arte né parte i letterati che non siano poeti cioè scrittori stringati si dividono in narratori e saggisti e facile scrivere c era una volta e parlare di cazzate con nomi di fantasia in questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che spesso sono gli stessi che ti condannano meno facile è essere saggisti e scrivere c è adesso e parlare di cose reali con nomi e cognomi impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del potere in generale che per logica ti perseguitano per farti cessare di scrivere devastante è farlo senza essere di sinistra quando si parla di veri scrittori ci si ricordi di dante alighieri e della fine che fece il primo saggista mondiale le vittime vere o presunte di soprusi parlano solo di loro inascoltati pretendendo aiuto io da vittima non racconto di me e delle mie traversie ascoltato e seguito parlo degli altri vittime o carnefici che l aiuto cercato non lo concederanno mai chi non conosce la verità è uno sciocco ma chi conoscendola la chiama bugia è un delinquente aforisma di bertolt brecht bene tante verità soggettive e tante omertà son tasselli che la mente corrompono io le cerco le filtro e nei miei libri compongo il puzzle svelando l immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali rappresentare con verità storica anche scomoda ai potenti di turno la realtà contemporanea rapportandola al passato e proiettandola al futuro per non reiterare vecchi errori perché la massa dimentica o non conosce denuncio i difetti e caldeggio i pregi italici perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare tutelare e promuovere quello che abbiamo ereditato dai nostri avi insomma siamo bravi a farci del male e qualcuno deve pur essere diverso

IL TERREMOTO E ... 2016-09-13

in 2009 after seismic tremors struck the italian mountain town of l aquila survivors were subjected to a second earthquake invasive media attention and a relief effort that left them in a state of suspended citizenship as they were forcibly resettled and had to envision a new future in citizens without a city jan jonathan bock reveals how a disproportionate government response exacerbated survivors sense of crisis divided the local population and induced new types of political action italy s disenfranchising emergency reaction relocated citizens to camps and sites across a ruined townscape without a plan for restoration or return through grassroots politics arts and culture commemoration rituals architectural projects and legal avenues local people now sought to shape their hometown s recovery bock combines an analysis of the catastrophe s impact with insights into post disaster civic life urban heritage the politics of mourning and community fragmentation a fascinating read for anyone interested in urban culture disaster and politics citizens without a city illustrates how survivors battled to retain a sense of purpose and community after the l aquila earthquake

Citizens without a City 2022-02-01

this book focuses on new research challenges in intelligent information filtering and retrieval it collects invited chapters and extended abstracts from the 2017 workshop on information filtering and retrieval held in pisa italy on december 10 2014 the 8th international workshop on information filtering and retrieval

artificial intelligence the main focus of *Art and Artificial Intelligence* was to discuss and compare suitable novel solutions based on intelligent techniques and applied to real world contexts the chapters of this book present a comprehensive review of related works and the current state of the art the contributions from both practitioners and researchers have been carefully reviewed by experts in the area who also gave useful suggestions to improve the quality of the book

Information Filtering and Retrieval 2016-10-08

la dimensione eccezionale dei terremoti che hanno recentemente squassato e continuano a colpire i centri urbani e i borghi del cosiddetto cratere ci spingono a ripensare il tema della ricostruzione del patrimonio edilizio storico specialmente nel caso degli insediamenti praticamente rasi al suolo che rischiano l'abbandono da parte delle comunità in favore di nuove collocazioni territoriali il primo interrogativo che ci si pone riguarda l'aggregato urbano come affrontarne la ricostruzione il secondo interrogativo riguarda le modalità costruttive necessarie a rimettere in sicurezza i fabbricati nella giornata di lavoro questi temi sono stati affrontati da rappresentanti delle istituzioni coinvolte nella gestione dei terremoti della tutela da rappresentanti delle università delle imprese di restauro e dei professionisti che partecipano alla ricostruzione

Dopo il terremoto... come agire? Giornata di lavoro sui recenti eventi sismici 2018-02-01

described as the perfect baroque city the southeastern sicilian city of noto was totally destroyed by an earthquake in 1693 and then rebuilt by ambitious citizens eager to match italian achievements the genesis of noto traces the complex history of noto s foundation and growth as a grid planned renaissance baroque utopia described as the perfect baroque city the southeastern sicilian city of noto was totally destroyed by an earthquake in 1693 and then rebuilt by ambitious citizens eager to match italian achievements the genesis of noto traces the complex history of noto s foundation and growth as a grid planned renaissance baroque utopia

Il terremoto di Israele 2007

this is a study on the long lasting consequences of a disastrous earthquake that hit the city of messina sicily in 1908 the quake killed about 86 000 people and destroyed one of the most important port cities of the mediterranean the book investigates both the forces that shaped that event and made it possible firstly urban speculation processes at the end of the nineteenth century and the role of that occurrence in creating a complex event that on the one hand accelerated trends and tendencies that were already in motion and on the other produced an entirely new social space based on social separation and the raise of a widespread marginal class such a class developed within urban borders and spaces that over the decades grew according to the same logic and directions that followed the reconstruction especially the shacks still a visible presence in the city represent the lieu of reproduction both of a class and the whole of the social relations stemming from the disaster it shows how key concepts in contemporary scientific analysis such as shock economy and economy of disaster can be aptly backdated above all this study broadens the normal analyses of disasters by showing the stratification of institutional techniques and economic forces that over the decades intervened and re shaped the site of a disaster and its social structure

The Genesis of Noto 1982-01-01

marco armiero is senior researcher at the italian national research council and marie curie fellow at the institute of environmental sciences and technologies universitat aut noma de barcelona he has published extensively on italian environmental history and edited views from the southern environmental studies from the mediterranean world

The Endless Reconstruction and Modern Disasters 2019-06-13

what does it really mean to reconstruct a city after a natural biological or man made disaster is the repair and reinstatement of buildings and infrastructure sufficient without the mending of social fabric the authors of this volume believe that the true measure of success should be societal after all a city without people is no city at all invisible reconstruction takes the view that effective disaster mitigation and recovery require interdisciplinary tactics historian lucia patrizio gunning and urbanist paola rizzi expand beyond the confines of individual disciplines or disaster studies to bring together academics and practitioners from a wide variety of disciplines comparing strategies and outcomes in different scenarios and cultures from south america europe and asia from cultural heritage and public space to education and participation contributors reflect on the interconnection of people culture and environment and on constructive approaches to strengthening the intangible ties to increase resilience and reduce vulnerability by bringing practical examples of how communities and individuals have reacted to or prepared for disaster the publication proposes a shift in public policy to ensure that essential physical reinforcement and rebuilding are matched by attention to societal needs invisible reconstruction is essential reading for policymakers academics and practitioners working to reduce the impact of natural biological and man made disaster or to improve post disaster recovery

Nature and History in Modern Italy 2010-08-31

gaetano salvemini 1873 1957 one of the most influential italian intellectuals of his generation was an historian a professor and a tireless anti fascist who mentored a new generation of young intellectuals and political activists such as piero gobetti ernesto rossi and carlo nello rosselli after losing his wife and children in the 1908 messina earthquake salvemini began a new family with his second wife fernande dauriac and her two children jean and ghita yet despite its marked influence on his life and politics salvemini s second family and its involvement with fascism has never been studied before by exploiting hitherto unused archival sources the inimical son explores an until now little known dimension of salvemini s life it uncovers the personal costs of his anti fascism including the tragic embrace of fascism by his stepson jean lucaire

Invisible Reconstruction 2022-12-06

this book examines reconstruction and resilience of historic cities and societies from multiple disciplinary and complementary perspectives and by doing so it helps researchers and practitioners alike among them reconstruction managers urban governance and professionals the book builds on carefully selected and updated papers accepted for the 2019 silk cities international conference on reconstruction recovery and resilience of historic cities and societies the third silk cities conference held in l aquila italy 10 12 july 2019 working with university of l aquila and ucl this multi scale and multidisciplinary book offers cross sectoral and complimentary voices from multiple stakeholders including academia urban governance ngos and local populations it examines post disaster reconstruction strategies and case studies from europe asia and latin america that provide a valuable collection for anyone who would like to get a global overview on the subject matter it thereby enables a deeper understanding of challenges opportunities and approaches in dealing with historic cities facing disasters at various geographical scales additionally it brings together historical approaches to the reconstruction of historical cities and those of more recent times thus it can be used as a reference book for global understanding of the subject matter

The Family of Gaetano Salvemini Under Fascisms 2022-08-26

demographic analysis selected concepts tools and applications presents basic definitions practical techniques and methods as well as examples of studies based on the usage of demographic analysis in various institutions and economic entities the volume covers studies related to population distribution urbanization migration population change and dynamics aging longevity population theories and population projections it is an asset to academic and professional communities interested in advancing knowledge on diverse populations in various contexts such as public policies public services education and labor markets the book aims to help students of demography as well as practitioners of other fields of social sciences and people in government business and nonprofit organizations

Historic Cities in the Face of Disasters 2021-09-13

this book provides an integrated approach to the assessment of seismic hazards the reduction of losses expected by future earthquakes is probably the most important contribution of seismology to society large earthquakes occurred in densely populated areas highlight the dramatic inadequacy of a massive portion of the buildings demonstrating the high risks of modern industrial societies building earthquake resistant structures and retrofitting old buildings on a national scale can be extremely expensive and can represent an economic challenge even for developed western countries earthquakes can cause also several psychological problems due to the fact that such kind of disasters will result in casualties collapsing of houses strategic buildings and facilities and deeply affect a community moreover in our society it is necessary to properly plan emergency responses and rescues taking into account any possible secondary effect in order to avoid more casualties

Demographic Analysis 2021-11-03

volume 2 of history of construction cultures contains papers presented at the 7icch seventh international congress on construction history held at the lisbon school of architecture portugal from 12 to 16 july 2021 the conference has been organized by the lisbon school of architecture faul nova school of social sciences and humanities the portuguese society for construction history studies and the university of the azores the contributions cover the wide interdisciplinary spectrum of construction history and consist on the most recent advances in theory and practical case studies analysis following themes such as epistemological issues building actors building materials building machines tools and equipment construction processes building services and techniques structural theory and analysis political social and economic aspects knowledge transfer and cultural translation of construction cultures furthermore papers presented at thematic sessions aim at covering important problematics historical periods and different regions of the globe opening new directions for construction history research we are what we build and how we build thus the study of construction history is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind therefore history of construction cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures from ancient times to our century and all over the world

Il Giro di Boa 2021-01-19

waiting for the end of the world addresses the archaeological architectural historical and geological evidence for natural disasters in the middle ages between the 11th and 16th centuries this volume adopts a fresh interdisciplinary approach to explore the many ways in which environmental hazards affected european populations and in turn how medieval communities coped and responded to short and long term consequences three sections which focus on geotectonic hazards part i severe storms and hydrological hazards part ii and biophysical hazards part iii draw together 18 papers of the latest research while additional detail is provided in a catalogue of the 2023-10-04 significant disasters to have affected europe during the period these include earthquakes landslides tsunamis storms floods and outbreaks of infectious

kodi on your 2017 amazon fire stick

diseases spanning europe from the british isles to italy and from the canary islands to cyprus these contributions will be of interest to earth scientists geographers historians sociologists anthropologists and climatologists but are also relevant to students and non specialist readers interested in medieval archaeology and history as well as those studying human geography and disaster studies despite a different set of beliefs relating to the natural world and protection against environmental hazards the evidence suggests that medieval communities frequently adopted a surprisingly modern well informed and practically minded outlook

A Study of Recent Earthquakes 2015-09-28

from earthquakes to oil spills italy is recurrently affected by different kinds of disasters this book brings a critical perspective to post disaster reconstruction and recovery which can impact in both the short and long term upon society politics and organisations it is often assumed that disaster hit areas return to normality or even build back better thanks to the interventions of experts giuseppe forino considers the complexities of disaster recovery and the sometimes radical changes in individual and collective behaviours that persist following such events bringing together the impacts of natural hazards including climate change and the covid 19 pandemic this edited book will stimulate debate on policy and practice in disaster recovery

I MIEI TRE UOMINI 2 2021-07-08

this book collects selected high quality papers published in 2018 2020 to inaugurate the natural hazards section of the geosciences journal the topics encompass trends in publications at international level in the field of natural hazards research the role of big data in natural disaster management assessment of seismic risk through the understanding and quantification of its different components climatic hydro meteorological hazards and finally the scientific analysis and disaster forensics of recent natural hazard events the target audience includes not only specialists but also graduate students who wish to approach the challenging but also fascinating

Earthquakes and Their Impact on Society 2020-09-07

since the early 1980s the novel has been deemed by many italian women writers to be the most apt vehicle for creating positive images of the future of women the novel becomes the space for confession while at the same time allowing greater expressive freedom there is no longer one voice for the feminine role and by creating heroines who are also intellectuals these authors offer their readers models of alternative versions of self this study is a partial inventory of the new women s narrative and aims to provide a broad literary framework through which both the general reader and the student can appreciate the characteristics and innovations of contemporary italian women s fiction the writers chosen for this study ginerva bompiani edith bruck paola capriolo francesca durante rosetta loy giuliana morandini marta morazzoni anna maria ortese sandra petrignanni fabrizia ramondino elisabetta rasy and francesca sanvitale have achieved both critical acclaim and public recognition and their texts show the richness of voices topics and structures in italian women s writing today

History of Construction Cultures Volume 2 1891

this book collects some of the most significant articles by adriana belletti published over the last ten years or so offering readers a useful tool to see the mutual enrichment between linguistic theory and experimental studies on modes of language acquisition through her work the volume explores domains of theoretical morphosyntax in the generative tradition and theoretically guided studies on language acquisition an introduction specifically to the study of language acquisition within ongoing developments in the field part i presents studies inspired by the illuminating interchange between linguistic theory and experimentation

in the domain of language acquisition leading to the formulation of explicit research questions tested experimentally and guiding in the proper interpretation of the results part ii offers refined detailed theoretical analyses of domains in which peripheral positions in the clause structures are crucially involved to express discourse contents in sometimes not standard ways during development demonstrating how refined linguistic analyses play a crucial role in interpreting the peculiar shape of developmental data this book will be of interest to scholars in syntax language acquisition and theoretical linguistics

Waiting for the End of the World? 2024-01-16

the construction techniques and concepts of the cathedrals of pisa siena and florence are examined in detail based on new data and using a methodological architectural diagnostics approach new detailed surveys carried out using often advanced tools together with direct and in depth inspections to examine all parts of the buildings have enabled us to identify the building phases and the different construction techniques used over time the information thereby acquired also formed the basis for a new interpretation of the archival documents accordingly the problems encountered and the solutions adopted in the three cathedrals have been understood in pisa the construction of the elliptical dome above the rectangular crossing consisting of six thin pillars below in siena the design changes from the first system in the 13th century to the duomo nuovo and the structural adaptations following earthquakes the specific construction solutions adopted in florence during the instability encountered in the construction of the large vaults of the basilican body the comparison of the three buildings in terms of architectural and construction solutions also revealed unexpected relationships between the construction events of siena s duomo nuovo and the solutions then used in the large basilican body of santa maria del fiore the methodology employed has led to an understanding of the actual structure of the three cathedrals an essential basis for a correct evaluation of the state of conservation of the churches for any restoration work the book is aimed at scholars of architecture and ancient building structures graduate and postgraduate students and architects and engineers who plan architectural conservation and strengthening works for historical buildings

The South Italian Volcanoes 2021-02-22

the word conservation when used in the context of the preservation of built heritage implies an intrinsically complex concept that evolved over time since it has been influenced by the perception of history throughout time this volume emphasises why an understanding of the cultural evolution of the conservation approach must be considered a prerequisite for architects and engineers if they are to cooperate in full harmony with historic artistic culture for the preservation of global built heritage in particular the volume highlights how during the second half of the last century the preservation process also involved engineering the science of making practical applications of knowledge which for a long time made an uncritical use of techniques and materials and devised interventions on historical heritage that were heavily invasive the volume also devotes special attention to the problems related to seismic risk to which italy greece and portugal are particularly prone problems that emerge during the crisis and reconstruction phases are dealt with in detail as is scheduled maintenance as this latter approach always constitutes an improvement in the performance of the monument and is the most appropriate tool for the conservation of the built heritage finally the volume collects examples of building restoration with case studies of many outstanding monuments the work will appeal to professionals and academics in the broader fields of civil engineering both geotechnical and structural engineering architecture art history the history of architecture restoration and cultural heritage management this book will provide a critical reading of the history of conservation discuss materials and techniques of ancient architecture cover seismic vulnerability and preservation of the historic integrity of the monument advocate an approach based on programmed maintenance feature numerous case histories including st mark s basilica in venice and the complex restoration of the cathedral of notre dame in paris

Disasters and Changes in Society and Politics 1891

this book presents the evolution of italian administrative law in the context of the eu describing its distinctive features and comparing it with other experiences across europe it provides a comprehensive overview of administrative law in italy focusing on the main changes occurred over the last few decades although the respective chapters generally pursue a legal approach they also consider the influence of economic social cultural and technological factors on the evolution of public administration and administrative law the book is divided into three parts the first part addresses general issues e g procedures and organization of public administrations administrative justice the second part focuses on more specific topics e g public intervention in the economy healthcare management local government in the third part the evolution of italian administrative law is discussed in a comparative perspective

Inaugural Section Special Issue 2017-12-02

from the international bestselling author of gomorrah this is a deeply personal and candid portrait of italy today a place of trafficking and toxic waste where votes can be bought and sold where organized crime ravages both north and south yet also where many courageous individuals defy the system and millions work tirelessly for a better future saviano is a blazingly vivid and courageous writer independent a national hero umberto eco saviano has an astonishing ability to write luminously yet subtly about terrible things le parisien brave and passionate guardian one of the world s finest investigative journalists gq

The South Italian Volcanoes 2008

modern seismology has faced new challenges in the study of earthquakes and their physical characteristics this volume is dedicated to the use of new approaches and presents a state of the art in historical seismology selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis field observations of damage distribution and tectonic effects and modelling of seismic waveforms

Speculative Identities 2023-09-29

this volume derived from the 1999 international tsunami symposium presents a unique look at the state of tsunami research at the end of the 20th century it displays recent progress both in data recovery and reconstructions of historical tsunamis and in detail examination of recent disasters it shows the tsunami community using both traditional methods of data gathering searching archives and attempting to simulate past events and integrating modern technologies side scan sonar gps global communications supercomputers in the quest to understand tsunamis and improve mankind s ability to mitigate the disastrous consequences of these unpredictable and unstoppable events it chronicles recent advances in mitigation efforts while illuminating the continuing need for increased efforts the papers range from descriptive texts for the non specialists to fairly technical discussions for those familiar with tsunami research audience this book will be of interest to researchers and graduate students involved in natural hazards research physical oceanography seismology environmental impact assessment and risk assessment
