a step by step guide for teachers to the benefits of visual note taking and how to incorporate it in their classrooms we ve come a long way from teachers admonishing students to put away their drawings and take traditional long form notes let s be honest note taking is boring and it isn t always the most effective way to retain information this book is a guide for teachers about getting your students drawing and sketching to learn visually whether in elementary school or high school neuroscience has shown that visual learning is a very effective way to retain information the techniques in this book will help you work with your students in novel ways to retain information visual note taking can be used with diverse learners all ages and those who have no drawing experience teachers are provided with a library of images and concepts to steal tweak and use in any way in their classrooms the book is liberally illustrated with student examples from elementary and high school students alike

Study Guide for CTET Paper 2 (Class 6 – 8 Teachers) Social Studies/ Social Science with Past Questions 5th Edition

2019-10-21

while active learning classrooms or alcs offer rich new environments for learning they present many new

challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed the importance of learning how to use these classrooms well and to capitalize on their special features is paramount the potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls this book provides an introduction to alcs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively among the questions this book addresses are how can instructors mitigate the apparent lack of a central focal point in the space what types of learning activities work well in the alcs and take advantage of the affordances of the room how can teachers address familiar classroom management challenges in these unfamiliar spaces if assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point how do instructors balance group learning with the needs of the larger class how can students be held accountable when many will necessarily have their backs facing the instructor how can instructors evaluate the effectiveness of their teaching in these spaces this book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create alcs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces
