**Waiting For The Wild Beasts To Vote** 2022-01-24 this book is the first treatise on magic by Éliphas Lévi and one of his fundamental works in this book he criticizes magic as a collection of methods and rituals instead he says magic is a universal power and attribute of a man an eternal religion that existed before christianity and other religions according to his theory proper magic as an attribute of a human is a combination of psychic force will and imagination he calls the ordinary miracles attributed to

unnecessary magic exaggerations yet the access to the true magic is constricted only to a narrow circle of selected people or magi those who go through the initiation to magi acquire force to alter human wills his works became quickly popular as their publication coincided with the interest in magic and occultism in the second half of the 19th and the beginning of the 20th century it also greatly influenced the magic of the hermetic order of the golden dawn also in this text Éliphas Lévi for the first time pointed out that a pentagram or five pointed star with one point down and two points up represents evil while a pentagram with one end up and two points down represent the good

**Knowledge, Power and Dissent** 1999-11-26 this first full scale account of leviticus by a world renowned anthropologist presents the biblical work as a literary masterpiece seen in an anthropological perspective leviticus has a mystical structure which plots the book into three parts corresponding to the three parts of the desert tabernacle both corresponding to the parts of mount sinai this completely new reading transforms the interpretation of the purity laws the pig and other forbidden animals are not abhorrent they command the same respect due to all god s creatures boldly challenging several traditions of bible criticism mary douglas claims that leviticus is not the narrow doctrine of a crabbed professional priesthood but a powerful intellectual statement about a religion which emphasizes god s justice and compassion

*Leviticus as Literature* 2018-08-08 we think we know what healers do they build on patients irrational beliefs and treat them in a symbolic way if they get results it s thanks to their capacity to listen rather than any influence on a clinical level at the same time we also think we know what modern medicine is a highly technical and rational process but one that scarcely listens to patients at all in this book ethnopsychiatrist tobie nathan and philosopher isabelle stengers argue that this commonly posed opposition

between traditional and modern medicine is misleading they show instead that healers are interesting precisely because they don't listen to patients using techniques of divination rather than diagnosis healers construct genuine therapeutic strategies by identifying the origins of symptoms in external forces outside of the mind of the sufferer modern medicine for its part is characterized by empiricism rather than rationality what appears to be the pursuit of rationality is ultimately only a means to dismiss and exclude other forms of treatment blurring the distinctions between traditional and modern practices and drawing on perspectives from across the globe this ethnopsychiatric manifesto encourages us to think in radically new ways about illness challenging accepted notions on the relationship between sufferer and symptom

**Astronomy Across Cultures** 1988 with unflinching gaze and uncompromising intensity julius evola analyzes the spiritual and cultural malaise at the heart of western civilization and all that passes for progress in the modern world as a gadfly evola spares no one and nothing in his survey of what we have lost and where we are headed at turns prophetic and provocative revolt against the modern world outlines a profound metaphysics of history and demonstrates how and why we have lost contact with the transcendent dimension of being the revolt advocated by evola does not resemble the familiar protests of either liberals or

conservatives his criticisms are not limited to exposing the mindless nature of consumerism the march of progress the rise of technocracy or the dominance of unalloyed individualism although these and other subjects come under his scrutiny rather he attempts to trace in space and time the remote causes and processes that have exercised corrosive influence on what he considers to be the higher values ideals beliefs and codes of conduct the world of tradition that are at the foundation of western civilization and described in the myths and sacred literature of the indo europeans agreeing with the hindu philosophers that history is the movement of huge cycles and that we are now in the kali yuga the age of dissolution and decadence evola finds revolt to be the only logical response for those who oppose the materialism and ritualized meaninglessness of life in the twentieth century through a sweeping study of the structures myths beliefs and spiritual traditions of the major western civilizations the author compares the characteristics of the modern world with those of traditional societies the domains explored include politics law the rise and fall of empires the history of the church the doctrine of the two natures life and death social institutions and the caste system the limits of racial theories capitalism and communism relations between the sexes and the meaning of warriorhood at every turn evola challenges the reader s most cherished assumptions about fundamental aspects of modern life a controversial scholar philosopher and social thinker julius evola 1898 1974 has only recently become known to more than a handful

**Kaïdara** 1991 this volume is the first critical edition of a medieval almanac

from the arabian peninsula it presents the arabic text an english translation and a detailed analysis of a thirteenth century agricultural almanac dated by internal evidence to a h 670 71 a d 1271 compiled by the yemeni sultan al malik al ashraf umar ibn yusuf the third sultan of the rasulid dynasty 13th 15th cent this almanac comprises one chapter of al ashraf s scientific treatise kitab al tabsira fi ilm al nujum instruction in the science of astronomy and astrology al ashraf s is the earliest and most detailed of eight extant rasulid almanacs the almanac as a literary and scientific genre in arab tradition has received little scholarly attention although hundreds of manuscripts exist this study of almanac information draws the reader across the arbitrary boundaries of disciplines into the full array of medieval science and esoterica al ashraf s almanac contains information on astronomy astrology time keeping meteorology plants and animals agriculture including tax periods health and navigation not only for yemen but for other parts of the medieval world as well it is the earliest source to document the dates of the indian ocean sailing periods to and from the port of aden the almanac provides a view of a medieval trading network extending from north africa and southern europe to the indian ocean and china information in the almanac is derived from both the general islamic almanac tradition and ethnographic knowledge of local practice and folklore although the almanac is not meant to be a descriptive record of the agricultural cycle for example it is obvious that most of the information is based on observation of actual practices and on

knowledge of folklore details of the yemeni agricultural cycle primarily for the coastal region and the southern highlands are extremely valuable and supplement discussions in extant rasulid agricultural and tax treatises varisco s extensive commentary explains how the terminology and concepts of al ashraf s text are related to those of earlier and contemporaneous scientific texts throughout the islamic world and uses his own ethnographic research on yemeni rural economy and folklore to enhance his interpretation of the almanac one of the rewarding aspects of studying the yemeni almanacs is that many of the agricultural activities mentioned can still be observed and documented the study of a medieval almanac as part of a living tradition can be accomplished in yemen better perhaps than anywhere else in the arab world the older generation still retains much of the accumulated agricultural and environmental lore from scores of previous generations not only would it be impossible to understand some of the almanac terminology without knowledge of present day yemeni dialects but ethnographic study of traditional agriculture and folk science despite changes over time helps in the interpretation of old written sources because al ashraf s almanac addresses a wide range of subjects readers from diverse disciplines will find this volume of value not only will it be a basic reference for anyone interested in yemen both ancient and modern but it has much to offer scholars of medieval economy science and technology varisco s textual approach of combining historical and contextual analysis with
