A Dictionary of Moroccan Arabic 2004

effectiveness efficiency excellence these words and concepts permeate current literature courses and discussions they are defined in nearly as many different ways as the number of people who write and talk about them for practical purposes the definitions seem to boil down to these effectiveness doing the right things efficiency doing things right excellence efficiently meeting effective goals both short term and long range we believe that this book can help you improve the effectiveness efficiency and excellence of your system for managing loss control and for quality production and cost control in essence it can help improve your management system improved quality production and cost control go hand in hand with improved loss control and they all depend on how the system is managed the idea that excellence in safety and production go hand in hand is not new as early as 1928 the american engineering council based on an engineering and statistical study demonstrated that an organization with decreasing injury rates is eleven times more likely to show increased production than an unsafe one

we believe that the book's concepts practices techniques and tools reflect what leading organizations around the free world have done and are doing to get their results spanning more than three decades we have had the good fortune to work with tens of thousands of leaders in hundreds of organizations to distill the contents of this book the ideas and applications are tried tested and proven put them to work and they will work for you

police citizen relations are in the public spotlight following outbursts of anger and violence such clashes often happen as a response to fatal police shootings racial or ethnic discrimination or the mishandling of mass protests but even in such cases citizens assessment of the police differs considerably across social groups this raises the question of the sources and impediments of citizens trust and support for police why are police citizen relations much better in some countries than in others are police minority relations doomed to be strained and which police practices and policing policies generate trust and legitimacy research on police legitimacy has been centred on us experiences and relied on procedural justice as the main theoretical approach this book questions whether this approach is suitable and sufficient to understand public attitudes towards the police across different countries and regions of the world this volume shows that the impact of macro level conditions of societal cleavages and of state and political institutions on police citizen relations has too often been neglected in contemporary research building on empirical studies from around the world as well as cross national comparisons this volume considerably expands current perspectives on the sources of police legitimacy and citizens trust in the police combining the analysis of micro level interactions with a perspective on the contextual framework and varying national conditions the contributions to this book illustrate the strength of a broadened perspective and lead us to ask how specific national frameworks shape the experiences of policing
