Eagle Against the Sun 2020-11-03 the best book by far on the pacific war the new york times book review this classic one volume history of world war ii in the pacific draws on declassified intelligence files british american and japanese archival material and military memoirs to provide a stunning and complete history of the conflict this superbly readable insightful gripping washington post book world contribution to wwii history combines impeccable research with electrifying detail and offers provocative interpretations of this brutal forty four month struggle author and historian ronald h spector reassesses us and japanese strategy and shows that the dual advance across the pacific by macarthur and nimitz was more a pragmatic solution to bureaucratic doctrinal and public relations problems facing the army and navy than a strategic calculation he also argues that japan made its fatal error not in the midway campaign but in abandoning its offensive strategy after that defeat and allowing itself to be drawn into a war of attrition spector skillfully takes us from top secret strategy meetings in washington london and tokyo to distant beaches and remote asian jungles with battle weary gis he reveals that the us had secret plans to wage unrestricted submarine warfare against japan months before pearl harbor and shows that macarthur and his commanders ignored important intercepts of japanese messages that would have saved thousands of lives in papua and leYTE throughout spector contends that american decisions in the pacific war were shaped more often by the struggles between the british and the americans and between the army and the navy than by strategic considerations spector vividly recreates the major battles little known campaigns and unfamiliar events leading up to the deadliest air raid ever adding a new dimension to our understanding of the american war in the pacific and the people and forces that determined its outcome

Edinburgh Companion to Twentieth-Century British and American War Literature 2012-03-07 the surprising story of how george washington alexander hamilton john adams and thomas jefferson came to despair for the future of the nation they had created americans seldom deify their founding fathers any longer but they do still tend to venerate the constitution and the republican government that the founders created strikingly the founders themselves were far less confident in what they had wrought particularly by the end of their lives in fact most of them including george washington alexander hamilton john adams and thomas jefferson came to deem america s constitutional experiment an utter failure that was unlikely to last beyond their own generation fears of a setting sun is the first book to tell the fascinating and too little known story of the founders disillusionment as dennis rasmussen shows the founders pessimism had a variety of sources washington lost his faith in america s political system above all because of the rise of partisanship hamilton because he felt that the federal government was too weak adams because he believed that the people lacked civic virtue and jefferson because of sectional divisions laid bare by the spread of slavery the one major founder who retained his faith in america s constitutional order to the end was james madison and the book also explores why he remained relatively optimistic when so many of his compatriots did not as much as americans today may worry about their country s future rasmussen reveals the founders faced even graver problems and harbored even deeper misgivings a vividly written account of a chapter of american history that has received too little attention fears of a setting sun will change the way that you look at the american founding the constitution and indeed the united states itself
