inflation is regarded by the many as a menace that damages business and can only make life worse for households keeping it low depends critically on ensuring that firms and workers expect it to be low so expectations of inflation are a key influence on national economic welfare this collection pulls together a galaxy of world experts including roy batchelor richard curtin and staffan linden on inflation expectations to debate different aspects of the issues involved the main focus of the volume is on likely inflation developments a number of factors have led practitioners and academic observers of monetary policy to place increasing emphasis recently

on inflation expectations one is the spread of inflation targeting invented in new zealand over 15 years ago but now encompassing many important economies including brazil canada israel and great britain even more significantly the european central bank the bank of japan and the united states federal bank are the leading members of another group of monetary institutions all considering or implementing moves in the same direction a second is the large reduction in actual inflation that has been observed in most countries over the past decade or so these considerations underscore the critical and largely underrecognized importance of inflation expectations they emphasize the importance of the issues and the great need for a volume that offers a clear systematic treatment of them this book under the steely editorship of peter sinclair should prove very important for policy makers and monetary economists alike

involved in setting monetary policy to meet a forward looking inflation target and in forming and communicating its judgements the mpc should promote understanding of these trade offs the remit continues to require an exchange of open letters between the governor of the bank of england and the chancellor of the exchequer if inflation moves away from the target by more than 1 percentage point in either direction the open letter from the governor should now be sent alongside the minutes of the mpc meeting that followed the publication of the cpi data the remit requests that the mpc provides in its august 2013 inflation report an assessment of the merits of using intermediate thresholds policy commitments conditional on future economic developments the remit also reflects the government s intention that the frameworks for monetary policy and macro prudential policy operated by the mpc and fpc of the bank of england respectively should be coordinated
