Matema10k 2013 this book includes 18 peer reviewed papers from nine countries originally presented in a shorter form at tsg 25 the role of history of mathematics in mathematics education as part of icme 13 during it also features an introductory chapter by its co editors on the structure and main points of the book with an outline of recent developments in exploring the role of history and epistemology in mathematics education it serves as a valuable contribution in this domain by making reports on recent developments in this field available to the international educational community with a special focus on relevant research results since 2000 the 18 chapters of the book are divided into five interrelated parts that underlie the central issues of research in this domain 1 theoretical and conceptual frameworks for integrating history and epistemology in mathematics in mathematics education 2 courses and didactical material design implementation and evaluation 3 empirical investigations on implementing history and epistemology in mathematics education 4 original historical sources in teaching and learning of and about mathematics 5 history and epistemology of mathematics interdisciplinary teaching and sociocultural aspects this book covers all levels of education from primary school to tertiary education with a particular focus on teacher education additionally each chapter refers to and or is based on empirical research in order to support illuminate clarify and evaluate key issues main questions and conjectured theses raised by the authors or in the literature on the basis of historical epistemological or didactical cognitive arguments

Mathematics, Education and History 2018-03-30 the first sourcebook on nordic research in mathematics education norway sweden iceland denmark and contributions from finland provides the first comprehensive and unified treatment of historical and contemporary research trends in mathematics education in the nordic world the book is organized in sections co ordinated by active researchers in mathematics education in norway sweden iceland denmark and finland the purpose of this sourcebook is to synthesize and survey the established body of research in these countries with findings that have influenced ongoing research agendas informed practice framed curricula and policy the sections for each country also include historical articles in addition to exemplary examples of recently conducted research oriented towards the future the book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside the nordic countries

The First Sourcebook on Nordic Research in Mathematics Education 2010-09-01 this book presents the main research veins developed within the framework of the anthropological theory of the didactic atd a paradigm that originated in french didactics of mathematics while a great number of publications on atd are available in french and spanish working with the anthropological theory of the didactic in mathematics education is the first directed at english speaking international audiences written and edited by leading researchers in atd the book covers all aspects of atd theory and practice including teaching applications the chapters feature the most relevant and recent investigations presented at the 6th international conference on the atd offering a unique opportunity for an international audience interested in the study of mathematics teaching and learning to keep in touch with advances in educational research the book is divided into four sections and the contributions explore key topics such as the core concept of praxeology including its development and functionalities the need for new teaching praxeologies in the paradigm of questioning the world the impact of atd on the teaching profession and the education of teachers this is the second volume in the new perspectives on research in mathematics education this comprehensive casebook is an indispensable resource for researchers teachers and graduate students around the world

Working with the Anthropological Theory of the Didactic in Mathematics Education 2019-10-23 interdisciplinarity has become increasingly important for emergent professions of the 21st century yet there is a dearth of systematic studies aimed at implementing it in the school and university curricula the mathematics and its connections to the arts and sciences macas group places mathematics as a vehicle through which deep and meaningful connections can be forged with the arts and the sciences and as a means of promoting interdisciplinary and transdisciplinary thinking traits amongst students the third international symposium held by the macas group in moncton canada in 2009 included numerous initiatives and ideas for interdisciplinarity that are implementable in both the school and university setting the chapters in this book cover interdisciplinary links with mathematics found in the domains of culture art aesthetics music cognition history philosophy engineering technology and science with contributors from canada u s denmark germany mexico iran and poland amongst others

Matematik A på hhx, htx og stx 2009 this book starts with the premise that beauty can be an engine of transformation and authentic engagement in an increasingly complex world it presents an organized picture of highlights from the 13th european science education research association conference esera 2019 held in bologna

italy the collection includes contributions that discuss contemporary issues such as climate change multiculturalism and the flourishing of new interdisciplinary areas of investigation including the application of cognitive neuroscience artificial intelligence and digital humanities to science education research it also highlights learners difficulties engaging with socio scientific issues in a digital and post truth era the volume demonstrates that deepening our understanding is the preferred way to address these challenges and that science education has a key role to play in this effort in particular the book advances the argument that the deep and novel character of these challenges requires a collective search for new narratives and languages an expanding knowledge base and new theoretical perspectives and methods of research the book provides a contemporary picture of science education research and looks to the theoretical and practical societal challenges of the future

Interdisciplinarity for the 21st Century 2010-11-01 the book is based on the recently held symposium on mathematics and its connections to the arts and sciences namely the second mathematics and its connections to the arts and sciences macas2 symposium in odense denmark may 29 31 2007 the chapters are an eclectic collection of interdisciplinary research initiatives undertaken by mathematics educators with implications for practitioners concerned with teaching and learning processes the papers cover a wide genre of research domains within mathematics education cognition modelling problem solving teacher education ethnomathematics mathematical statistical literacy curricular and technological initiatives and research related to science education the major interdisciplinary themes of the papers in this book are 1 how can modelling activities be used to foster interdisciplinary projects in the school and university setting 2 how can the intricate connections between mathematics and physics be used to design and research interdisciplinary activities in schools and the university 3 how can research within the ethnomathematics domain of mathematics education be linked to critical mathematics education and interdisciplinary projects involving mathematics art and culture 4 how can the push for mathematical and statistical literacy be connected to other subjects in the school curricula and emphasized via interdisciplinary activities 5 what are concrete examples of classroom experiments with empirical data that demonstrate new and unusual connections relations between mathematics arts and the sciences with implications for pedagogy 6 what is the role of technology and new ict interfaces in linking communities of learners in interdisciplinary activities involving problem solving the book is an important contribution to the literature on educational initiatives in interdisciplinary education increasing vital for emerging professions of the 21st century

Engaging with Contemporary Challenges through Science Education Research 2021-09-24 denne bog er andet bind i serien gymnasie matematik vi lærer om vinkler ved cirklen specielle punkter i en trekant konstruktion med passer og lineal og meget mere god fornøjelse

Gyld. Gym. Mat. B2 Grundbog 2005 på baggrund af sin historiske indsats for kvinders rettigheder har danmark ry som foregangsland når det kommer til ligestilling nye internationale undersøgelser viser dog at danmark er faldet drastisk ned af ligestillingsranglisten denne bog analyserer hvorfor det er gået sådan og kommer med forslag til hvad vi kan gøre for at ændre tendensen baseret på 150 dybdegående interviews med mellem og topledere viser bogen hvordan kønsstereotyper bremser kvinders vej til ledelsesgangen og samtidigt gør det svært for mænd at vælge karrieren fra

Evaluering af Matematik C på stx og hhx 2007 de nylig overstaede olympiske lege er et godt eksempel på at vi alle er verdensborgere i det mindste alle vi der har kontakt med medierne og det er efterhånden det store flertal over hele verden artiklerne i dette nummer kommer rundt om en række forskellige aspekter af globaliseringen og de muligheder den giver sprogfagene for at opdyrke nye sider af deres praksis

Gyld. Gym. Mat. a Grundbog 2005 tværfaglighed er et populært begreb på uddannelsesinstitutioner i dagspressen og i forbindelse med reformer af uddannelsessystemet men hvad betyder tværfaglighed i et fagdidaktisk perspektiv hvordan kan tværfaglighed bidrage til elevers og studerendes fordybelse og læring i de enkelte fag og hvordan kan faglige samspil være med til at udvikle fagene i tværfaglighed og fagligt samspil giver en række fagdidaktikere svar på disse spørgsmål med udgangspunkt i empiriske eller teoretiske overvejelser de undersøger også tværfaglighedens rammer og tilsynekomster på forskellige uddannelsesstrin og bidrager dermed til diskussion og teoriudvikling inden for sammenlignende fagdidaktik tak til professor helle mathiasen for kritisk og faglig gennemlæsning af bogen

Interdisciplinary Educational Research In Mathematics and Its Connections to The Arts and Sciences 2008-09-01 ud ad døren rundt om hjørnet ned ad trapperne nu når vi 2 sal 1 sal stuen ud ad døren uden at sige farvel til personalet hun bemærker dem ikke engang det eneste der fylder i hendes hoved er jeg vil dø jeg vil dø jeg vil dø der er aldrig nogen der kan hjælpe mig tårerne triller ned ad kinderne på hende solen skinner udenfor på en af sommerens

junidage men for hende kunne det lige så godt have været torden og lyn så havde det i det mindste stemt overens med det kaos hun følte indeni hun bemærker hurtigt det gode vejr og det irriterer hende hvorfor er vejret så godt hvordan kan vejret være godt verden er jo et forfærdeligt sted der er slet ingen mening med at leve hvorfor hvorfor skal solen skinne en svag stemme bringer hende et splitsekund tilbage til virkeligheden sammen med lyden af de hastende trin der følger hende signe hvad sker der det er hendes mor de har haft første samtale i psykiatrien og har fået at vide at de skal vente yderligere tre uger på den tid på dette tidspunkt har de allerede ventet en måned hun sætter bare tempoet op og ønsker sig langt væk herfra og det kommer hun senere dette er det eneste der får hendes hjerne til fortsat at sætte det ene ben foran det andet og ikke kollapse under hende i aften skal hun dø det har hun besluttet sig for og hun ved lige præcis hvordan det skal ske hun er klar eller rettere sagt hun har erkendt at verden ville være et bedre sted uden hende at der er ingen der kan hjælpe hende af med den her følelse så nu giver hun op datoen siger den 12 juni 2017 og dette bliver den sidste dag i hendes liv troede hun hende det er mig og dette er min historie om vejen tilbage til livet

Gyld. Gym. Mat. B1 Grundbog, 1. Udgave 2005 career and career guidance in the nordic countries explores what kind of context the nordic region offers for the pursuit of career how the development of careers are supported and how career guidance is enacted in this context

Har Du Styr På Din Matematik? 2008 it s a hot summer afternoon tension is in the air a gang of youths on bikes gathers outside a chip shop a teenage boy is stabbed and left bleeding on the street the boy s mother wonders how this could have happened to her son she is full of questions but when the answers lie so close to home are they really what she wants to hear

Gyldendals Gymnasiematematik B1 2010 i introductory articles 1 classification problems in the representation theory of finite dimensional algebras 2 noncommutative gröbner bases and projective resolutions 3 construction of finite matrix groups ii keynote articles 4 derived tubularity a computational approach 5 problems in the calculation of group cohomology 6 on a tensor category for the exceptional lie groups 7 non commutative gröbner bases and anick s resolution 8 a new existence proof of janko s simple group j4 9 the normalization a new algorithm implementation and comparisons 10 a computer algebra approach to sheaves over weighted projective lines 11 open problems in the theory of kazhdan lusztig polynomials 12 relative trace ideals and cohen macaulay quotients 13 on sims presentation for lyons simple group 14 a presentation for the lyons simple group 15 reduction of weakly definite unit forms 16 decision problems in finitely presented groups 17 some algorithms in invariant theory of finite groups 18 coxeter transformations associated with finite dimensional algebras 19 the 2 modular decomposition numbers of co2 20 bimodule and matrix problems

Temel matematik III 1970 temaet kritisk sprog og kulturpaedagogik praesenterer kritiske tilgange til sprog og kulturundervisning der er hentet fra dansk nordisk og international sammenhaeng i dag er der mange kritiske kultur og sprogpædagogikker der trækker på en vifte af teoretiske tilgange bl a cultural studies queer teori om køn og seksualitet og teori om empowerment som på forskellig vis sætter et kritisk perspektiv på sproglig og kulturel læring på tværs af alle forskelle er der også grundlæggende fælles temaer og problemstillinger fx om lige adgang til sprog om dannelse af kritisk sprog og kulturbevidsthed og om åbning af nye handlemuligheder for deltagerne

Gyld. Gym. Mat. C Grundbog, 2. Udg 2010 denne bog indeholder eksempler på anvendt matematik i form af temaopgaver vi skal beregne afstanden til solen spare sammen til en computer lære at vore sanser opfører sig logaritmisk og meget mere

Gyld. Gym. Mat. C Grundbog, 1. Udgave 2005 using a full color illustrated approach a guide to parental math tutoring looks at every aspect of the challenging subject from simple sums to simultaneous equations in a book with simple explanations and clear illustrations that parents can share with their children
