this book constitutes the proceedings of the 17th asian symposium on programming languages and systems aplas 2019 held in nusa dua bali indonesia in december 2019 the 22 papers presented in this volume were carefully reviewed and selected from 50 submissions they were organized in topical sections named invited papers types program analysis semantics language design and implementation concurrency verification and logic and automata

## **Programming Languages and Systems**

2008-03-18

this book constitutes the refereed proceedings of the 17th european symposium on programming esop 2008 held in budapest hungary in march april 2008 as part of etaps 2008 the european joint conferences on theory and practice of software the 25 revised full papers presented together with the abstract of one invited talk and two tool presentations were carefully reviewed and selected from 104 submissions and address fundamental issues in the specification analysis and implementation of programming languages and systems the papers are organized in topical sections on static analysis security concurrency and program verification

## ***Cumulated Index Medicus***

1995

nelson fausto the greek myth of prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration it is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and prometheus by a patient laying on a properly prepared operating table the outcome of the procedure would not differ significantly from that described by greek poets yet few of us who work in the field have stopped long enough to ask where this myth originated did the poet observe a case of liver regeneration in a human being was it brilliant intuition or perhaps literally just a gut feeling of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed this book does not attempt to solve these historical issues it does instead cover in detail some of the major modern themes of research on liver regeneration injury and repair as indicated in dr n bucher's chapter the modern phase of experimental studies on liver regeneration started in 1931 with the publication by higgins and anderson of a method to perform a two thirds resection of the liver of a rat the technique described has 3 remarkable features 1 it is highly reproducible resulting in the removal of 68 of the liver 2 it has minimal if any mortality and 3 it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue

## **Liver Growth and Repair**

1997-12-31

macro regional strategies seek to improve the interplay of the eu with existing regimes and institutions and foster coherence of transnational policies

drawing on macro regional governance and europeanization this edited volume provides an overview of processes of macro regionalization in europe displaying evidence of their significant impact

## **A 'Macro-regional' Europe in the Making**

2015-10-19

the hermes european system of models is featured in this book this system was set up at the initiative of the commission of the european communities directorate general for science research and development it involves a series of medium term macrosectoral econometric models in which energy plays a special role as a production factor the different models are interlinked by a bilateral flow module which describes for each product the trade between all the community countries taken in twos the united states japan and five zones are represented in this by simplified versions of the commission s comet model this volume will help the reader to understand and interpret the numerous studies which have been undertaken with the help of the hermes system economists and researchers will find valuable information and figures with a common nomenclature on the economies of the different countries both on structural data and on economic operators

les avancées techniques requièrent une excellente maîtrise des matériaux utilisés le défi est de mieux comprendre leur comportement mécanique et plus  
 particulièrement les relations entre leurs micro structures et leurs propriétés à l échelle macroscopique cet ouvrage apporte les éléments pour relever ce  
 défi partant des mécanismes de déformation il remonte aux lois de comportement macroscopique en cherchant à établir des relations quantitatives en tout  
 cas à révéler les phénomènes physiques qui sous tendent les comportements rhéologiques les auteurs ont inclus les développements les plus récents  
 notamment sur les matériaux hétérogènes alliages métalliques polymères composites chacun des chapitres est consacré à une grande classe de  
 comportement élastique puis plastique dans ce premier volume comportement viscoélastique comportement viscoplastique endommagements dans le  
 second volume on y trouvera en outre des notions de mécanique de la rupture et de mécanique du contact les outils de base mécanique des milieux  
 continus cristallographie changements de phase sont décrits en annexes on trouvera également de nombreux exercices en fin de chapitres pour la bonne  
 compréhension des sujets traités une illustration abondante facilite la lecture de l ouvrage comportement mécanique des matériaux est le fruit du dea  
 mécanique et matériaux de la région parisienne il s adresse aussi aux élèves ingénieurs ingénieurs et chercheurs les développements mathématiques y  
 sont d un accès facile les réelles difficultés dont la maîtrise n est pas exempte d aspects passionnants résident dans les fréquents changements d échelle  
 et dans le sens physique auquel il est fait appel

this book offers detailed insights into new methods for high fidelity cfd and their industrially relevant applications in aeronautics it reports on the h2020 tilda project funded by the european union in 2015 2018 the respective chapters demonstrate the potential of high order methods for enabling more accurate predictions of non linear unsteady flows ensuring enhanced reliability in cfd predictions the book highlights industrially relevant findings and representative test cases on the development of high order methods for unsteady turbulence simulations on unstructured grids on the development of the les dns methodology by means of multilevel adaptive fractal and similar approaches for applications on unstructured grids and on leveraging existent large scale hpc networks to facilitate the industrial applications of les dns in daily practice furthermore the book discusses multidisciplinary applications of high order methods in the area of aero acoustics all in all it offers timely insights into the application and performance of high order methods for cfd and an extensive reference guide for researchers graduate students and industrial engineers whose work involves cfd and turbulence modeling

## Economia Dell'allargamento Dell'Unione Europea

2003

a comprehensive and in depth look at exchange rate dynamics variations in the foreign exchange market influence all aspects of the world economy and understanding these dynamics is one of the great challenges of international economics this book provides a new comprehensive and in depth examination of the standard theories and latest research in exchange rate economics covering a vast swath of theoretical and empirical work the book explores established theories of exchange rate determination using macroeconomic fundamentals and presents unique microbased approaches that combine the insights of microstructure models with the macroeconomic forces driving currency trading macroeconomic models have long assumed that agents households firms financial institutions and central banks all have the same information about the structure of the economy and therefore hold the same expectations and uncertainties regarding foreign currency returns microbased models however look at how heterogeneous information influences the trading decisions of agents and becomes embedded in exchange rates replicating key features of actual currency markets these microbased models generate a rich array of empirical predictions concerning trading patterns and exchange rate dynamics that are strongly supported by data the models also show how changing macroeconomic conditions exert an influence on short term exchange rate dynamics via their impact on currency trading designed for graduate courses in international macroeconomics international finance and finance and as a go to reference for researchers in international economics exchange rate dynamics guides readers through a range of literature on exchange rate determination offering fresh insights for further reading and research comprehensive and in depth examination of the latest research in exchange rate economics outlines theoretical and empirical research across the spectrum of modeling approaches presents new results on the importance of currency trading in exchange rate determination provides new perspectives on long standing puzzles in exchange rate economics end of chapter questions cement key ideas

## Agrochimica

1988

the extraordinary cultural renaissance in the northern italian courts of the late 15th and early 16th centuries is the subject of this volume it starts with baldessar castiglione s book of the courtier 1528 which encapsulates this sense of renewal his experiences at court and their subsequent rewriting form the backbone of the work the author then addresses questions of biography gender genre and the varied roles of the courtier expanding the perspective of castiglione s text to include the lives and writings of other courtiers and patrons what was it like to be a courtier what were the problems associated with such a lifestyle the importance of women in court circles is also highlighted in studies of one of the most notable of female patrons isabella d este 1474 1539 and of the theoretical developments in writing about gender stimulated by such women stephen kolsky s analysis of both well known and comparatively obscure texts brings out the diversity of practices that constituted court society and their centrality to our understanding of the renaissance

## *Lengua, nación e identidad*

2008

this book is devoted to discussion of the views of pierre musso and starts with a central chapter written by musso entitled network ideology from saint simonianism to the internet pierre musso is a french philosopher and is one of the most original thinkers in the history of the network society his thought develops a critique of information and communication technologies through their imaginary and social representations and of the information society based on the network metaphor the main question on which musso has focused his attention is how the network metaphor is one of the most powerful ways of understanding the complex societies in which we live showing characteristic attention to detail and drawing on the history of ideas political philosophy and sociology musso traces the genealogy of the network imaginary and points out that it did not emerge with the internet he shows how its modern roots can be found in henri de saint simon and his disciples engineers and entrepreneurs such as michel de chevalier and barthélemy prosper enfantin who developed channel networks railroads and the telegraphic network in france in the nineteenth century in addition to the central piece written by musso the book includes a general introduction and six commentaries from experts on information technologies and networks it displays a wide range of perspectives from a diverse set of authors in terms of nationalities and universities as well as disciplinary backgrounds

## Élasticité et plasticité

2009-04-08

in august 2008 heads of state of the southern african development community adopted the ground breaking sadc protocol on gender and development this followed a concerted campaign by ngos under the umbrella of the southern africa gender protocol alliance by the 2013 heads of state summit 13 countries had signed and 12 countries had ratified the sadc gender protocol the protocol is now in force with two years to go time is ticking to 2015 when governments need to have achieved 28 targets for the attainment of gender equality in keeping with the alliance slogan yes we must this 2013 barometer provides a wealth of updated data against which progress will be measured by all those who cherish democracy in the region the sadc gender and development index sgdi introduced in 2011 complements the citizen score card csc that has been running for five years to benchmark progress

## **Abstracts**

1961

this book contains the papers presented at a nato advanced research institute on mediterranean marine ecosystems held at heraklion crete greece from september 23 27 1983 a workshop rather than a conference it was sponsored by the eco sciences special programme panel in cooperation with the marine science panel the third of its kind it was scheduled in the framework of a project on a multidisciplinary integrated approach to the study of the mediterranean this sea and the surrounding land was not only the cradle of many civilizations but is up to the present time one of the major world areas of marine traffic communication and exchanges fisheries and aquacultures inshore human activities and pollution to a certain degree it constitutes a gigantic natural laboratory where the fate of threatened aquatic and terrestrial eco systems including the human one is tested the mediterranean sea with its geological history and present day geographic hydrological and climatic conditions is believed to form an ecological entity important exchanges and mutual influences take place with the surrounding land area and the water masses naturally atlantic black sea or artificially red sea connected to the mediterranean therefore a better and in depth knowledge of the various ecosystems benthic planktonic and nektonic neritic or pelagic in the western or the eastern basin seems to be a pre requisite to any action in preserving upgrading and managing the natural resources of the area

## **Miscellaneous Tax Bills IV**

1980

this volume brings together new papers advancing contemporary debates in foundational conceptual and methodological issues in cognitive neuroscience the different perspectives presented in each chapter have previously been discussed between the authors as the volume builds on the experience of neural mechanisms nm online webinar series on the philosophy of neuroscience organized by the editors of this volume the contributed chapters pertain to five core areas in current philosophy of neuroscience it surveys the novel forms of explanation and prediction developed in cognitive neuroscience and looks at new concepts methods and techniques used in the field the book also highlights the metaphysical challenges raised by recent neuroscience and demonstrates the relation between neuroscience and mechanistic philosophy finally the book dives into the issue of neural computations and representations assembling contributions from leading philosophers of neuroscience this work draws upon the expertise of both established scholars and promising early career researchers
