with the emergence and structuring of the lucanian ethnos during the fourth century bc a network of cult places set apart from habitation spaces was created at the crossroads of the most important communication routes of ancient lucania these sanctuaries became centers of social and political aggregation of the local communities a space in which the community united for all the social manifestations that in urban societies were usually performed within the city space with a detailed analysis of the archaeological record this study traces the historical and archaeological narrative of lucanian cult places from their creation to the late republican age which saw the incorporation of southern italy into the roman state by placing the sanctuaries within their territorial political social and cultural context battiloro offers insight into the diachronic development of sacred architecture and ritual customs in ancient lucania the author highlights the role of material evidence in constructing the significance of sanctuaries in the historical context in which they were used and crucial new evidence from the most recent archaeological investigations is explored in order to define dynamics of contact and interaction between lucanians and romans on the eve of the roman conquest the seventh volume in the institute of classical archaeology s series on the rural countryside chora of metaponto is a study of the greek sanctuary at pantanello the site is the first greek rural sanctuary in southern italy that has been fully excavated and exhaustively documented its evidence a massive array of distinctive structural remains and 30 000 plus artifacts and ecofacts offers unparalleled insights into the development of extra urban cults in magna graecia from the seventh to the fourth centuries bc and the initiation rites that took place within the cults of particular interest are the analyses of the well preserved botanical and faunal material which present the fullest record yet of greek rural sacrificial offerings crops and the natural environment of southern italy and the greek world excavations from 1974 to 2008 revealed three major phases of the sanctuary ranging from the archaic to early hellenistic periods the structures include a natural spring as the earliest locus of the cult an artificial stream collecting basin for the spring s outflow archaic and fourth century bc structures for ritual dining and other cult activities tantalizing evidence of a late archaic doric temple atop the hill and a farmhouse and tile factory that postdate the sanctuary s destruction the extensive catalogs of material and special studies provide an invaluable opportunity to study the development of greek material culture between the seventh and third centuries bc with particular emphasis on votive pottery and figurative terracotta plaques per quanto incredibile ci possa sembrare le piante sono in grado di provare un ampia gamma di emozioni e come buona cucina scorri verso l alto e fai clic su acquista ora this brief outlines the state of art of the food industry within the indian sub continent providing a detailed insight into the current science of nutrition and industrial technology the hygiene integrity traceability and sharing hits strategy has been proposed recently as a coordinated and powerful tool to contextualize the plethora of different menaces for the food consumer the book examines this approach from eight different perspectives with a particular emphasis on the indian subcontinent topics such as food additives the importance of water in the food industry the use of antioxidants and novel food preservation methods are used to illustrate these points of view this book is particularly appealing as a guide for graduate and undergraduate courses covering food production food safety and the training of teachers working in these science areas foodways in roman republican italy explores the production preparation and consumption of food and drink in republican italy to illuminate the nature of cultural change during this period traditionally studies of the cultural effects of roman contact and conquest have focused on observing changes in the public realm that is changing urban organization and landscape and monumental construction foodways studies reach into the domestic realm how do the daily behaviors of individuals express their personal identity and how does this relate to changes and expressions of identity in broader society laura m banducci tracks through time the foodways of three sites in etruscia from about the third century bce to the first century ce populonia musarna and cetamura del chianti all were established etruscan sites that came under roman political control over the course of the third and second centuries bce the book examines the morphology and use wear of ceramics used for cooking preparing and serving food in order to deduce cooking methods and the types of foods being prepared and consumed change in domestic behaviors was gradual and regionally varied depending on local social and environmental conditions shaping rather than responding to an explicitly roman presence the papers of this volume focus on the sacred landscapes of ancient sicily religious and cultural dimensions of greek sanctuaries are assessed in light of the results of recent excavations and new readings of literary sources the material dimension of cult practices in ancient sanctuaries is the central issue of all contributions with a focus on the findings from ancient akragas great attention is also paid to past ritual activities which are framed in three complementary areas of enquiry firstly the architectural setting of sanctuaries is examined beyond temple buildings to assess the wider context of their structural and spatial complexity secondly the material culture of votive deposition and religious feasting is analysed in terms of performative characteristics and through the lens of anthropological approaches thirdly the significance of gender in cultic practice is investigated in light of the fresh data retrieved from the field the new findings presented in this volume contribute to close the existing research gaps in the study of sanctuaries in sicily as well as the wider practice of greek religion how people produced or acquired their food in the past is one of the main questions in archaeology everyone needs food to survive so the ways in which people managed to acquire it forms the very basis of human existence farming was key to the rise of human sedentarism once farming moved beyond subsistence and regularly produced a surplus it supported the development of specialisation speeded up the development of socio economic as well as social complexity the rise of towns and the development of city states in short studying food production is of critical importance in understanding how societies developed environmental archaeology often studies the direct remains of food or food processing and is therefore well suited to address this topic what is more a wealth of new data has become available in this field of research in recent years this allows synthesising research with a regional and diachronic approach indeed most of the papers in this volume offer studies on subsistence and surplus production with a wide geographical perspective the research areas vary considerably ranging from the american mid south to turkey the range in time periods is just as wide from c 7000 bc to the 16th century ad topics covered include foraging strategies the combination of domestic and wild food resources in the neolithic water supply crop specialisation the effect of the roman occupation on animal husbandry town country relationships and the monastic economy with this collection of papers and the theoretical framework presented in the introductory chapter we wish to demonstrate that the topic of subsistence and surplus production remains of interest and promises to generate more exciting research in the future the volume collects papers presented at the international conference greek medical papyri text context hypertext held at the university of parma on november 2 4 2016 as the final event of the erc project digmedtext aimed primarily at creating an online textual database of the greek papyri dealing with medicine the contributions authored by outstanding papyrologists and historians of the ancient medicine deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts the first part

devoted to medical texts contains some new reflections on important sources such as the *anonymus londinensis* and the *hippocratic corpus* as well as on specific themes like the pharmacological vocabulary the official medical reports the medical care in the roman army the second part collects papers about the doctors context providing highlights from broader viewpoints like the analysis of the writing supports the study of the ostraka from the eastern desert the evidence of inscriptions and philosophical texts the third part is entirely focused on the *digmedtext* project itself the team members present some relevant key issues raised by the digitisation of the medical papyri gli esseni sono da sempre riconosciuti quali terapeuti dell'anima e del corpo eredi di una tradizione millenaria portano avanti tutt'oggi la loro opera di guarigione dell'umanità e della terra le terapie essene vedono nell'uomo l'essere globale abitato dal divino e mirano al ristabilirsi dell'armonia totale della persona olivier manitara maestro esseno ci offre in questo testo indicazioni preziose per ottenere la guarigione globale dell'essere iniziando dal risveglio della coscienza e dall'armonia del pensiero e ci fornisce numerosi esercizi terapeutici di guarigione attraverso la concentrazione la meditazione e le preghiere agli angeli in un futuro vagamente ucronico dal sapore anni settanta david ha perso la memoria e per lui la realtà si ridotta ad un incubo di frammenti spezzati e davvero pazzo come dicono o qualcos'altro qualcuno lo sta aiutando ad uscire dal labirinto per portarlo verso un altro livello di realtà ma la scoperta non sarà piacevole amandla un romanzo a cavallo tra *sf* e narrativa di anticipazione che si muove tra l'afrika e le suggestioni virtuali di *p k dick* e di *matrix* tra i *beatles* e *nelson mandela* il primo capitolo di amandla apparso sulla rivista *online inciquid* n 7 2005 this book explores the traditional use of *ilex paraguariensis* a plant that is widely distributed in south america thanks to its purported properties it has been used for centuries in the form of teas with a variety of names including *yerba mate* argentina *chimarrão* brazil and others *ilex paraguariensis* and its teas also referred to as *mate* teas are well known because of their alleged pharmacological effects in numerous common conditions including obesity osteoporosis constipation arthritis and hypertension these effects are generally ascribed to *yerba mate* teas because the botanical species contains bioactive and stimulating substances like caffeine originally dubbed *mateine* various alkaloids and several phenolic acids interestingly the chemical profiles of these teas can fluctuate over time creating serious production problems as a result it is difficult to reliably determine their safety and health effects on humans in response to the global interest in these products this book offers a reference guide to *yerba mate* *chimarrão* teas it analyzes their chemical profiles discusses their bioactive features and addresses their safety and health effects in addition since the cultural heritage of *yerba mate* has greatly contributed to its international success the book also provides information on its historical legacy regulatory aspects and the global market this book reconstructs political history from the spatial organization of ancient society challenging the approach favored by classicists *l'analisi linguistica e letteraria* è una rivista internazionale di linguistica e letteratura peer reviewed ha una prospettiva sia sincronica che diacronica e accoglie ricerche di natura teorica e applicata seguendo un orientamento spiccatamente interdisciplinare si propone di approfondire la comprensione dei processi di analisi testuale in ambito letterario come anche in ambito linguistico la rivista è organizzata in tre sezioni la prima contiene saggi e articoli la seconda presenta discussioni e analisi d'opera relative alle scienze linguistiche e letterarie la terza sezione ospita recensioni e una rassegna di brevi schede bibliografiche riguardanti la linguistica generale e le linguistiche delle singole lingue francese inglese russo tedesco la rivista pubblica regolarmente articoli in francese inglese italiano e tedesco e occasionalmente anche in altre lingue nel 2010 ad esempio ha pubblicato un volume tematico interamente in russo *as periodical of the international academy of the history of medicine* this *clio medica* volume contains 19 papers this book presents a series of papers in honour of *sandro salvatori* divided into three main sections reflecting his long years of work in middle asia his time in italy as an officer of the archaeological superintendency ministry of cultural heritage and finally his studies on the prehistory of north eastern africa the book is concerned principally with geobotanical mapping geobotany is a broad science that deals with the study of species and of vegetation communities in relation to the environment it includes other perhaps more familiar sciences such as plant geography plant ecology and chorology and phytosociology plant sociology geobotanical cartography is a field of thematic cartography that deals with the interpretation and representation in the form of maps of those spatial and temporal phenomena that pertain to flora vegetation vegetated landscapes vegetation zones and phytogeographical units the production of a geobotanical map represents the last stage in a cognitive process that begins with observations in the field and continues with the collection of sample data interpretation of the phenomena observed and their appropriate cartographic representation geobotanical cartography is closely tied to the concepts and scope of geobotany in general
