in homo ludens the classic evaluation of play that has become a must read for those in game design dutch philosopher johan huizinga defines play as the central activity in flourishing societies like civilization play requires structure and participants willing to create within limits starting with plato huizinga traces the contribution of homo ludens or man the player through medieval times the renaissance and into our modern civilization huizinga defines play against a rich theoretical background using cross cultural examples from the humanities business and politics homo ludens defines play for generations to come a happier age than ours once made bold to call our species by the name of homo sapiens in the course of time we have come to realize that we are not so reasonable after all as the eighteenth century with its worship of reason and naive optimism though us hence moder fashion inclines to designate our species ashomo faber man the maker but though faber may not be quite so dubious as sapiens it is as a name specific of the human being even less appropriate seeing that many animals too are makers there is a third function howver applicable to both human and animal life and just as important as reasoning and making namely playing it seems to me that next to homo faber and perhaps on the same level as homo sapiens homo ludens man the player deserves a place in our nomenclature from the foreward by johan huizinga

chinese civil society groups have achieved iconic policy advocacy successes in the areas of environmental protection women s rights poverty alleviation and public health this book examines why some groups are successful in policy advocacy within the authoritarian context while others fail a mechanism of cultural resonance is introduced as an innovative theoretical framework to systematically compare interactions between chinese civil society and the government in different movements

it is argued that civil society advocacy results depend largely on whether advocates can achieve cultural resonance with policymakers and the mainstream public through their social performances the effective performance is the one in which advocates employ symbols embraced by the audience policymakers and the public in their actions and framings while many studies have tried to explain the phenomena of successful policy advocacy in china through institutional or organizational factors this book not only contains extensive empirical data based on field research but takes a cultural sociological turn to identify the meaning making process behind advocacy actions civil society in china will appeal to students and scholars of sociology political science social work and chinese and asian studies more broadly
