Chemistry (Teacher Guide) 2018-02-26 the art of war dell arte della guerra is one of the lesser read works of florentine statesman and political philosopher niccolò machiavelli the format of the art of war was in socratic dialogue the purpose declared by fabrizio machiavelli s persona at the outset to honor and reward virtù not to have contempt for poverty to esteem the modes and orders of military discipline to constrain citizens to love one another to live without factions to esteem less the private than the public good to these ends machiavelli notes in his preface the military is like the roof of a palazzo protecting the contents written between 1519 and 1520 and published the following year it was the only historical or political work printed during machiavelli s lifetime though he was appointed official historian of florence in 1520 and entrusted with minor civil duties many lorenzo have held and still hold the opinion that there is nothing which has less in common with another and that is so dissimilar as civilian life is from the military whence it is often observed if anyone designs to avail himself of an enlistment in the army that he soon changes not only his clothes but also his customs his habits his voice and in the presence of any civilian custom he goes to pieces for i do not believe that any man can dress in civilian clothes who wants to be quick and ready for any violence nor can that man have civilian customs and habits who judges those customs to be effeminate and those habits not conducive to his actions

nor does it seem right to him to maintain his ordinary appearance and voice who with his beard and cursing wants to make other men afraid which makes such an opinion in these times to be very true but if they should consider the ancient institutions they would not find matter more united more in conformity and which of necessity should be like to each other as much as these civilian and military for in all the arts that are established in a society for the sake of the common good of men all those institutions created to make people live in fear of the laws and of god would be in vain if their defense had not been provided for and which if well arranged will maintain not only these but also those that are not well established
