in this second chronicle about deborah she faces an enemy whose sole purpose is to kill every human being in the universe the location of the enemy s home planets is unknown this enemy has unlimited ships and no concern about the high losses to their personnel the initial evaluation is that the enemy may not even be human they are given the name grays a creature like the grays seems rather harmless compared to what fiction shows you the grays went unchallenged only because they looked so weak and fragile no one saw them as a serious threat i can only think of the army ants on the march no one takes an ant seriously however an army of ants will devastate an area and kill every living creature the grays are the same type of threat to mankind as the grays are building up their fleets and personnel deborah desperately searches the known universe for additional personnel in this search she even goes to primitive nations the united states strips its military forces to provide as many personnel as possible despite this effort there are still not enough personnel deborah s scientists are working around the clock to not only upgrade her weapons but also provide her with new types of weapons ramah and the united states are making a maximum effort to prepare for the upcoming battle with the grays in this battle either the humans or the grays will become extinct

intended to support the national initiative to strengthen learning in areas of science technology engineering and mathematics this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers advisory and programming a versatile and multi faceted guide best stem resources for nextgen scientists

the essential selection and user's guide serves as a reader's advisory and collection development resource for youth services and school librarians seeking to bring STEM-related titles into their collections and introduce teachers and young readers to them. This book not only guides readers to hundreds of the best STEM-related titles (fiction and non-fiction), printed materials as well as apps, DVDs, websites, and games, it also includes related activities or programming ideas to help promote the use of the collection to patrons or students in storytime, afterschool programs, or passive library programs. After a detailed discussion of the importance of STEM and the opportunities librarians have for involvement, the book lists and describes the best STEM resources for young learners. Resources are organized according to the reading audiences for which they are intended, from toddlers through teens, and the book includes annotated lists of both fiction and non-fiction STEM titles as well as graphic novels, digital products, and online resources. In addition, the author offers a selection of professional readings for librarians and media specialists who wish to further expand their knowledge.
