Evolutionary Game Dynamics

2011-10-27

this volume is based on lectures delivered at the 2011 ams short course on evolutionary game dynamics held january 4 5 2011 in new orleans louisiana evolutionary game theory studies basic types of social interactions in populations of players it combines the strategic viewpoint of classical game theory independent rational players trying to outguess each other with population dynamics successful strategies increase their frequencies a substantial part of the appeal of evolutionary game theory comes from its highly diverse applications such as social dilemmas the evolution of language or mating behaviour in animals moreover its methods are becoming increasingly popular in computer science engineering and control theory they help to design and control multi agent systems often with a large number of agents for instance when routing drivers over highway networks or data packets over the internet while these fields have traditionally used a top down approach by directly controlling the behaviour of each agent in the system attention has recently turned to an indirect approach allowing the agents to function independently while providing incentives that lead them to behave in the desired way instead of the traditional assumption of equilibrium behaviour researchers opt increasingly for the evolutionary paradigm and consider the dynamics of behaviour in populations of agents employing simple myopic decision rules

Theoriae causalitatis principia mathematica

2021-08-03

this is the second edition of my book theoriae causalitatis principia mathematica it is an excellent book for self study and a pragmatic help for researchers too the formal proofs a lot of exercises and figures plus unusually detailed solutions will help the reader especially in medical and other biosciences this book is designed to provide both a new mathematical methodology for making causal inferences from experimental and nonexperimental data and the underlying philosophical theory this monograph will continue to be of great importance the reader will enjoy reading this book

The Political Economy of De-liberalization

2018-11-02

this book explores the politics behind de liberalization defined as policy reforms that constrain markets and their underlying mechanisms by offering a comparative study on the governmental reform strategies and policy choices of austria germany and switzerland it demonstrates that de liberalization processes are a common reform option for governments utilizing a novel dataset on liberalization covering policy reform trajectories in 38 industrialized countries between 1973 and 2013 it shows that governments often draw on strategies of de liberalization in the fields of social welfare and labor market policy where they can be used as compensation for the electorate in the context of liberalizing reforms as such the book makes an important contribution to the field of political economy by capturing the turning of the tide in scholarly and policy attention away from liberalization and towards a re embedding and re regulation of economic activity

Walking on the Grammaticalization Path of the Definite Article

2020-04-15

this volume focuses on the grammaticalization of the definite article in german it contains eight empirically based papers which examine individual stages of the grammaticalization path from its beginnings as a demonstrative to the definite article and beyond focusing on cognitive pragmatic semantic and syntactic factors the contributions not only address the development from pragmatic to semantic definiteness but also deal with functional and formal changes starting as soon as the linguistic unit has acquired the function of marking semantic definiteness based on corpora spanning the entire history of the german language from old high german 750 1050 to present day german the analyses challenge the traditional linear model of grammaticalization and provide alternative pathways what all the contributions have in common is the idea that the main grammaticalization path is accompanied or crossed by several side roads which lead to different destinations such as preposition article clitics generic usages or onymic articles

A Comparative Analysis of German and Australian Climate Change Coverage in Quality Newspapers

2020-01-01

in 2010 germany and australia had to deal with extreme floods was climate change considered as cause of these weather events in the media in 2009 a conservative alliance committed to tackle climate change won the german election in 2007 the australian labor party claimed that climate change is the greatest moral challenge of our time and won the election but how was climate change covered by the media in the context of these two elections this work answers these two questions comparing the climate change coverage of two german and two australian quality newspapers n 1 012 articles as theoretical foundation entman s 1993 framing approach and the extended sphere model which provides a framework for the explanation of the differences in the coverage were applied with a hierarchical cluster analysis seven frames were identified moreover six actor groups were differentiated and possible influencing factors were compiled the results show that the differences in terms of climate change coverage in quality newspapers are rather low between the two countries some of the observed differences could be explained by the proposed model but the most striking results are certainly the similarities in the coverage common media standards in terms of climate change coverage could however not be identified in this work

a new historical framework integrating islam into european and asian history islam emerged amid flourishing christian and jewish cultures yet students of antiquity and the middle ages mostly ignore it despite intensive study of late antiquity over the last fifty years even generous definitions of this period have reached only the eighth century whereas islam did not mature sufficiently to compare with christianity or rabbinic judaism until the tenth century before and after muhammad suggests a new way of thinking about the historical relationship between the scriptural monotheisms integrating islam into european and west asian history garth fowden identifies the whole of the

first millennium from augustus and christ to the formation of a recognizably islamic worldview by the time of the philosopher avicenna as the proper chronological unit of analysis for understanding the emergence and maturation of the three monotheistic faiths across eurasia fowden proposes not just a chronological expansion of late antiquity but also an eastward shift in the geographical frame to embrace iran in before and after muhammad fowden looks at judaism christianity and islam alongside other important developments in greek philosophy and roman law to reveal how the first millennium was bound together by diverse exegetical traditions that nurtured communities and often stimulated each other

Before and After Muhammad

2015-12-15

this book offers an inside look into the notoriously tumultuous professional relationship of two great minds karl popper and paul feyerabend it collects their complete surviving correspondence 1948 1967 and contains previously unpublished papers by both an introduction situates the correspondence in its historical context by recounting how they first came to meet and an extensive editorial apparatus provides a wealth of background information along with systematic mini biographies of persons named taken together the collection presents popper and feyerabend's controversial ideas against the background of the postwar academic environment it exposes key aspects of an evolving student mentor relationship that eventually ended amidst increasing accusations of plagiarism throughout readers will find in depth discussions on a wide range of intriguing topics

including an ongoing debate over the foundations of quantum theory and popper s repeated attempts to design an experiment that would test different interpretations of quantum mechanics the captivating exchange between feyerabend and popper offers a valuable resource that will appeal to scientists laymen and a wide range of scholars especially philosophers historians of science and philosophy and more generally intellectual historians

it has become commonplace to associate art and aesthetic experience with the category of ambiguity indeed when we talk about art we cannot do without the dynamic force of ambiguity just as the aesthetic itself cannot do without it the great efforts to disambiguate aesthetic practices and their associated theories and contexts would eliminate art s unique ability to reshape our knowledge of the world our sensory encounters with it and our moral or political positions in it the essays collected in this volume present different perspectives on this central category and develop interdisciplinary connections contributors include frau ke berndt joy h calico stephan kammer lutz koepnick verena kriegler richard langston rachel mader lily tonger erk gabriel trop and thomas wortmann

women and men in cinema are imaginary constructs created by filmmakers and their audiences the film psychoanalytic approach reveals how movies subliminally influence unconscious reception on the other hand the movie is embedded in a cultural tradition jean cocteau s film *la belle et la bete* 1946 takes up the classic motif of the animal groom from the story of cupid and psyche in apuleius the golden ass originally a tale about the stunning momentum of genuine female desire liberates it from its baroque educational moral a girl s virtue and prudence will help her to overcome her sexual fears and turns it into a boyhood story inside the ugly rascal there is a good but relatively boring prince at least in comparison to the monsters of film history in the seventy years since it was made *la belle et la bete* has inspired numerous interpretations and has been employed by theorists of all genres and interests

increasing concerns regarding the world s natural resources and sustainability continue to be a major issue for global development as a result several political initiatives and strategies for green or resource efficient growth both on national and international levels have been proposed a core

element of these initiatives is the promotion of an increase of resource or material productivity this dissertation examines material productivity developments in the oecd and brics countries between 1980 and 2008 by applying the concept of convergence stemming from economic growth theory to material productivity the analysis provides insights into both aspects material productivity developments in general as well potentials for accelerated improvements in material productivity which consequently may allow a reduction of material use globally the results of the convergence analysis underline the importance of policy making with regard to technology and innovation policy enabling the production of resource efficient products and services as well as technology transfer and diffusion
