this book approaches hegel from the standpoint of what we might call the question of knowledge hegel of course had no theory of knowledge in the narrow and abstract sense in which it has come to be understood since locke and kant the examination of knowledge he holds can only be carried out by an act of knowledge and to seek to know before we know is as absurd as the wise resolution of scholasticus not to venture into the water until he had learned to swim while hegel wrote no treatise exclusively devoted to epistemology his entire philosophy is nonetheless a many faceted theory of truth and thus our title beyond epistemology is meant to suggest a return to the classical meaning and relation of the terms episteme and logos i had originally planned to include a lengthy introduction for these essays setting out hegel s general view of philosophic truth but as the papers came in it became clear that i had chosen my contributors too well indeed they have all but put me out of business in any case it gives me great pleasure to have been able to gather this symposium of outstanding hegel scholars to provide for them a forum on a common theme of great importance and especially thanks to arnold miller to have hegel himself among them frederick g weiss charlottesville va the logic of hegel trans from the etu yclopaedta by william wallace 2nd ed

1952

examining the science of stream restoration rebecca lave argues that the neoliberal emphasis on the privatization and commercialization of knowledge has fundamentally changed the way that science is funded organized and viewed in the united states stream restoration science and practice is in a startling state the most widely respected expert in the field dave rosgen is a private consultant with relatively little formal scientific training since the mid 1990s many academic and federal agency based scientists have denounced rosgen as a charlatan and a hack despite this rosgen s natural channel design approach classification system and short course series are not only accepted but are viewed as more legitimate than academically produced knowledge and training rosgen s methods are now promoted by federal agencies including the environmental protection agency the u s forest service the u s fish and wildlife service and the natural resources conservation service as well as by resource agencies in dozens of states drawing on the work of pierre bourdieu lave demonstrates that the primary cause of rosgen s success is neither the method nor the man but is instead the assignment of a new legitimacy to scientific claims developed outside the academy concurrent with academic scientists decreasing ability to defend their turf what is at stake in the rosgen wars argues lave is not just the ecological health of our rivers and streams but the very future of environmental science

daniel jefferies was always happy even though he led a challenging life it was not so much that danny was bothered by his troubles rather life was hard on those who loved and cared about him at a very young age it became clear that danny was a special person whether that was special in a good way or special in a bad way was in the eye of the beholder danny was neither a square or round peg so he never fit into the spaces that were laid out for him the only thing for sure was that daniel jefferies had an unmistakable effect on everyone around him and since danny was a happy person it made sense that he would make those around him feel better but all that changed one day when researchers believed that they could harness his gift in doing so they unwittingly unleashed daniel jefferies to become something that was not meant to be unleashed brain storm is a story so real that you wonder when not if it is going to happen
