in recent years there has been a growing awareness that native clients who suffer from substance abuse often face challenges that are distinct from those experienced by the mainstream population for a number of years i have been involved in research involving native alcoholism and i have recently published a book on the subject titled the path of handsome lake a model of recovery for native people my book argues that many different native cultures in america and elsewhere face similar challenges and disruptions because their cultures are often under great stress and or because people are alienated from their heritage the dysfunctional responses of many different native people are similar because they are subjected to similar pressures in a nutshell due to contact with the outside world native cultures often experience disruptive transitions and in some instances entire cultures or ways of life may face extinction under such circumstances the culture loses the ability to support people and help them cope with the pressures of life cultural decline itself often causes additional trauma combined these pressures can trigger dysfunction within the native community the obvious antidote for such maladies is to help native substance abusers to reconnect with their heritage in positive and constructive ways my earlier book and this one are inspired by the life and work of nineteenth century iroquois leader handsome lake who developed a method to help native people embrace their heritage as they recovered from substance abuse because my earlier book was scholarly and not focused on practitioner issues using it within a therapeutic

context may be difficult here i adapt my ideas so they can be applied to therapy in a systematic and productive manner the total program of therapy is presented in three volumes the first is a short overview of the program that has been written at about a 10th grade reading level my goal is to provide a wide range of clients as well as those who pursue self help work with an easily understood description of the program the second document is a consumable workbook designed to be used with the reader the workbook can be used both within the context of therapy and by those seeking strategies of self help the volume you are reading is a guide for therapists to consult when using this method to help native clients it is hoped that all three of these texts will play a significant role in the therapy and recovery of native substance abusers

Stepping Out of Denial Into Gods Grace

alcoholism major depression debilitating shyness or extreme anxiety may all lead to personal failings and even moral wrongdoing that we can neither explain nor ignore how are we to deal with these failings in our own pasts how should we think about agency or responsibility in other people who suffer from such difficulties what does morality require of us in living with these people in this original and eloquent work norman s care addresses these questions from both theoretical and personal

perspectives just as john rawls s a theory of justice offered a set of principles by which the members of a society might reconcile themselves to their own and others failings along the way care challenges the idea that individuals are masters of their own fate discusses the persona moralism that enables us to blame ourselves and others and considers in a positive way the famous twelve step alcoholics anonymous program interesting because it acknowledges that recovery may not occur for some alcoholics who attempt to follow it living with one s past will be of interest not only to philosophers psychologists health care and social service providers but also to anyone whose life has been affected by his or her own or others moral failings

addiction is a national mental and medical health crisis responsible for untold costs to society and severe suffering to innumerable people yet addiction treatment

as it is now practiced fails half the time the current treatment approach has changed little in the last 80 years and is a hodgepodge of often shady treatment approaches this book presents a radically different addiction treatment paradigm based on science evidence and best practices and has a success rate approaching 100 when followed closely this model should profoundly upend the current addiction treatment industry nearly every addict lives in a social system a family workplace or community that enables and supports often unconsciously the addict's addiction instead of the current addict focused approach this model extends treatment to the entire support system starting treatment with the concerned family members this model also proposes a single provider the family recovery therapist who manages treatment for the addict and the family from the first phone call through the first year of continuous sobriety this book offers simple recommendations to both addiction treatment providers and family members impacted by this disease it serves as a beacon of hope for families
