Theory and Practice of Specialised Online Dictionaries

2014-09-23

this book is the first comprehensive monograph on the function theory of lexicography which originated at the Aarhus School of Business Aarhus University. Function theory considers dictionaries to be tools that are constructed for assisting specific users with particular needs in specific usage situations e.g. communicative oriented situations and cognitive oriented situations. The book's main focus is on defending the independent academic status of lexicography and its corollary the process of designing, compiling and updating specialised online dictionaries. Needs a theoretical framework that addresses general and specific aspects. The former are common to all types of information tools. The latter are mainly dependent on the media for which the information tool is constructed and their specific target users. This book offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work e.g. how to convert an originally conceived polyfunctional online dictionary into several monofunctional usage based ones. The book illustrates that the theory and the methodology currently used by advocates of the function theory of lexicography offers better results than other approaches and therefore makes its case for proposing the function theory for terminological/terminographical work.

Nomenclature of Inorganic Chemistry

1990

chemical nomenclature has attracted attention since the beginning of chemistry because the need to exchange knowledge was recognised. From the early days the responsibility for providing nomenclature to the chemical community has been assigned to the International Union of Pure and Applied Chemistry whose rules for inorganic nomenclature have been published and revised in 1958 and 1970. Since then many new compounds have appeared particularly with regard to coordination chemistry and boron chemistry which were difficult to name. From the 1970 rules consequently the IUPAC Commission on Nomenclature in Inorganic Chemistry decided to thoroughly revise the last edition of the Red Book because many of the new fields of chemistry are very highly specialised and need complex types of name. The revised edition will

appear in two parts part 1 will be mainly concerned with general inorganic chemistry part 2 with more specialised areas such as strand inorganic polymers and polyoxoanions this new edition represents part 1 in it can be found rules to name compounds ranging from the simplest molecules to oxoacids and their derivatives coordination compounds and simple boron compounds

Relationships in the Organization of Knowledge

2013-04-17

relationships abound in the library and information science lis world those relationships may be social in nature as for instance when we deal with human relationships among library personnel or relationships i e public relations between an information center and its clientele the relationships may be educational as for example when we examine the relationship between the curriculum of an accredited school and the needs of the work force it is preparing students to join or the relationships may be economic as when we investigate the relationship between the cost of journals and the frequency with which they are cited many of the relationships of concern to us reflect phenomena entirely internal to the field the relationship between manuscript collections archives and special collections the relationship between end user search behavior and the effectiveness of searches the relationship between access to and use of information resources the relationship between recall and precision the relationship between various bibliometric laws etc the list of such relationships could go on and on the relationships addressed in this volume are restricted to those involved in the organization of recorded knowledge which tend to have a conceptual or semantic basis although statistical means are sometimes used in their discovery

Constructing the Subject

1994-01-28

constructing the subject traces the history of psychological research methodology from the nineteenth century to the emergence of currently favored styles of research in the second quarter of the twentieth century kurt danziger considers methodology to be a kind of social practice

rather than simply a matter of technique therefore his historical analysis is primarily concerned with such topics as the development of the social structure of the research relationship between experimenters and their subjects as well as the role of the methodology in the relationship of investigators to each other in a wider social context the book begins with a historical discussion of introspection as a research practice and proceeds to an analysis of diverging styles of psychological investigation there is an extensive exploration of the role of quantification and statistics in the historical development of psychological research the influence of the social context on research practice is illustrated by a comparison of american and german developments especially in the field of personality research in this analysis psychology is treated less as a body of facts or theories than a particular set of social activities intended to produce something that counts as psychological knowledge under certain historical conditions this perspective means that the historical analysis has important consequences for a critical understanding of psychological methodology in general

Naming the Mind

1997-05-06

intelligence motivation personality learning stimulation behaviour and attitude are just some of the categories that map the terrain of psychological reality these are the concepts which among others underpin theoretical and empirical work in modern psychology and yet these concepts have only recently taken on their contemporary meanings this fascinating work is a persuasive explanation of how modern psychology found its language kurt danziger develops an account that goes beyond the taken for granted quality of psychological discourse to offer a profound and broad ranging analysis of the recent evolution of the concepts and categories on which it depends danziger explores this process and shows how its conse

The Winning Way

2014-04-15

by definition winning means that you competed and you came out ahead human nature requires us to compete in order to survive therefore winning and survival have the element of success in common to ascend to a winning position you need a goal a desire to achieve it and the

qualities of discipline perseverance and action to attain it having your goal and setting yourself up to achieve your goal is the first step in the process you adjust your mindset and begin to plan diligently goals may be as different as dna but methodologies have much in common furthermore your plans and expectations will need adjustments as you go along that is why the knowledge shared by the celebrityexperts r in this book will be of importance to you the advice and suggestions of these celebrityexperts r are based on their experiences both their accomplishments and their shipwrecks the knowledge they share will allow you to make plans that can propel you in the right direction that is the function of a mentor to guide you where you are going and to advise what to avoid if you wish to develop the winning way to your goals read on you will never win if you never begin helen row

The Form of Information in Science

1988-12-31

does discourse have a structure harris s revolution in linguistics as a freshman back in 1947 i discovered that within the various academic divisions and subdivisions of the university of pennsylvania there existed a something it was not a department but a piece of the anthropology department called linguistic analysis i was an untalented but enthusiastic student of greek and a slightly more talented student of german as well as the son of a translator so the idea of linguistic analysis attracted me sight unseen and i signed up for a course it turned out that linguistic analysis was essentially a graduate program i and another undergraduate called noam chomsky were the only two undergraduates who took courses in linguistic analysis and also that it was essentially a one man show a professor named zellig harris taught all the courses with the aid of graduate teaching fellows and possibly i am not sure one assistant professor the technicalities of linguistic analysis were formidable and i never did master them all but the powerful intellect and personality of zellig harris drew me like a lodestone and although i majored in philosophy i took every course there was to take in linguistic analysis from then until my graduation what linguistics was like before zellig harris is something not many people care to remember today

Management Philosophy

2000-03-15

this book opens a new field within business science management philosophy it presents an uncompromising picture of the real leader through a set of leadership virtues focusing on human duties not on human rights the book demonstrates that only through philosophy it is possible to establish a genuine science of management overcoming the pressures of functionalism opportunism and pragmatism inherent in the hyper modern corporation shaped by high tech and information advantages

Object-oriented System Development

1993

with this book software engineers project managers and tool builders will be able to better understand the role of analysis and design in the object oriented oo software development process this book presents a minimum set of notions and shows the reader how to use these notions for oo software construction the emphasis is on development principles and implementation

Discourse, Interaction and Communication

1998-02-28

presents a small but representative sample of the main papers considered at the may 1995 colloquium which focused on four themes social action and cooperation cognitive approaches in discourse processing models of information in communication systems and the scope and limits of cognitive simulation papers range from the extremely abstract to the extremely specific among the topics contextual domains formal semantics geometry and mind collective goals and cooperation a logical approach to reasoning about uncertainty and building a collaborative interface agent annotation copyrighted by book news inc portland or

Shaping Written Knowledge

1988

the forms taken by scientific writing help to determine the very nature of science itself in this closely reasoned study charles bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings examining such works as the early philosophical transactions and newton s optical writings as well as physical review bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists the rhetoric of science is bazerman demonstrates an embedded part of scientific activity that interacts with other parts of scientific activity including social structure and empirical experience this book presents a comprehensive historical account of the rise and development of the genre and views these forms in relation to empirical experience

The Sceptical Chymist

2020-07-30

this important cultural analysis tells two stories about food the first depicts good food as democratic foodies frequent hole in the wall ethnic eateries appreciate the pie found in working class truck stops and reject the snobbery of fancy french restaurants with formal table service the second story describes how food operates as a source of status and distinction for economic and cultural elites indirectly maintaining and reproducing social inequality while the first storyline insists that anybody can be a foodie the second asks foodies to look in the mirror and think about their relative social and economic privilege by simultaneously considering both of these stories and studying how they operate in tension a delicious sociology of food becomes available perfect for teaching a broad range of cultural sociology courses

Foodies

europa private law explore and analyse the legal translation praxis within eu legislative institutions appropriate for the purpose of legal harmonization and examine both the potential and limitations of legal translation in the context of the developments of a single but multilingual eu legal language

Forest Ecology

1998-02-24

research in science education is now an international activity this book asks for the first time does this research activity have an identity it uses the significant studies of more than 75 researchers in 15 countries to see to what extent they provide evidence for an identity as a distinctive field of research it considers trends in the research over time and looks particularly at what progression in the research entails it provides insight into how researchers influence each other and how involvement in research affects the being of the researcher as a person it addresses the relation between research and practice in a manner that sees teaching and learning in the science classroom as interdependent with national policies and curriculum traditions about science it gives graduate students and other early researchers an unusual overview of their research area as a whole established researchers will be interested in and challenged by the identity the author ascribes to the research and by the plea he makes for the science content itself to be seen as problematic

The Role of Legal Translation in Legal Harmonization

2012-07-18

tv cookery shows hosted by celebrity chefs meal prep kitchens online grocers and restaurant review sites competitive eating contests carnivals and fairs and junk food websites and blogs what do all of them have in common according to authors kathleen lebesco and peter naccarato they each serve as productive sites for understanding the role of culinary capital in shaping individual and group identities in contemporary culture beyond providing sustenance food and food practices play an important social role offering status to individuals who conform to their culture s culinary norms and expectations while also

providing a means of resisting them culinary capital analyzes this phenomenon in action across the landscape of contemporary culture the authors examine how each of the sites listed above promises viewers and consumers status through the acquisition of culinary capital and as they do so intersect with a range of cultural values and ideologies particularly those of gender and economic class

Defining an Identity

2004-04-30

briefly discusses the traditional mathematics formerly taught in american schools and views the language and weaknesses of the modern math curriculum

Culinary Capital

2013-07-18

this book provides a systematic survey of the theory and methods of dictionary making including the linguistic background what types of dictionary there are how different kinds of information are dealt with when compiling dictionaries how this information is presented to users and how dictionaries are actually used it refers throughout to both monolingual and bilingual dictionaries giving a full account of the writing of definitions as well as of the selection and presentation of equivalents the treatment of other types of information provided in dictionaries such as pronunciation inflection constructions collocations and idioms is described systematically in individual chapters the book also discusses dictionary structure illustrations the collection and selection of material the management of dictionary projects law and ethics in lexicographic work and dictionary criticism as well as looking at print lexicography the author discusses the role of the electronic corpora electronic dictionaries and compilation software used in dictionary making this is an important and practical guide to contemporary lexicography designed for lexicographers language students and teachers translators and academics

Successful Terminology Management in

Companies

2010

bridges the gap between the history and theory of twentieth century architecture and cultural theories of modernity in this exploration of the relationship between modernity dwelling and architecture hilde heyne attempts to bridge the gap between the discourse of the modern movement and cultural theories of modernity on one hand she discusses architecture from the perspective of critical theory and on the other she modifies positions within critical theory by linking them with architecture she assesses architecture as a cultural field that structures daily life and that embodies major contradictions inherent in modernity arguing that architecture nonetheless has a certain capacity to adopt a critical stance vis à vis modernity besides presenting a theoretical discussion of the relation between architecture modernity and dwelling the book provides architectural students with an introduction to the discourse of critical theory the subchapters on walter benjamin ernst bloch theodor adorno and the venice school tafuri dal co cacciari can be studied independently for this purpose

Chemistry in Space

1891

called brilliantly devastating in a starred review from kirkus reviews this award winning mesmerizing novel based on the chilling true story of the last execution in denmark s history asks a question that plagues a small danish town does a fifteen year old boy deserve to be put to death on february 22 1853 a fifteen year old niels nelson is prepared to be executed on gallows hill the master carpenter comes to measure niels for his coffin the master baker bakes bread for the spectators the messenger posts the notice of execution in the town square the poet prepares his best pen to record the events as they unfold a fly niels s only companion in the cell buzzes a dog hovers by his young master s window a young girl hovers too pitying the boy the executioner sharpens his blade this remarkable wrenching story is told with the alternating perspectives of eleven different bystanders one per hour as the clock ticks ever closer to the moment when the boy must face his fate niels nielson a young peasant was sentenced to death by beheading on the dubious charges of arson and murder does he have the right to live

despite what he is accused of that is the question the townsfolk ask as the countdown begins with strong social conscience piercing intellect and masterful storytelling jesper wung sung explores the age old question who determines who has the right to live or die

A Bibliography of Scandinavian Dictionaries

1984

vernacular architecture in general and earthen architecture in particular with their rich variety of forms worldwide are custodians of the material culture and identity of the peoples who built them in addition they are widely recognized as ancestral examples of sustainability in all their variants and interpretations and the architecture of the present ought to learn from these when designing the sustainable architecture of the future the conservation of these architectures seemingly simple yet full of wisdom is to be undertaken now given their intrinsic value and their status as genuine examples of sustainability to be learnt from and interpreted in contemporary architecture vernacular and earthen architecture conservation and sustainability will be a valuable source of information for academics and professionals in the fields of environmental science civil engineering construction and building engineering and architecture
