Old Car Auction Bible 2013-11-04 the 4.6 and 5.4 liter modular Ford engines are finally catching up with the legendary 5.0L in terms of aftermarket support and performance. Parts availability having a lot of parts to choose from is great for the enthusiast but it can also make it harder to figure out what parts and modifications will work best. Building 4.6 5.4L Ford horsepower on the dyno takes the guesswork out of modification and parts selection by showing you the types of horsepower and torque gains expected by each modification. Author Richard Holdener uses over 340 photos and 185 back-to-back dyno graphs to show you which parts increase horsepower and torque and which parts don't deliver on their promises. Unlike sources that only give you peak numbers and gains, building 4.6 5.4L Ford horsepower on the dyno includes complete before and after dyno graphs so you can see where in the RPM range these parts make or lose the most horsepower and torque. Holdener covers upgrades for 2, 3, and 4 valve modular engines with chapters on throttle bodies and inlet elbows, intake manifolds, cylinder heads, camshafts, nitrous oxide, supercharging, turbocharging, headers, exhaust systems, and complete engine buildups.

Aviation Week 1950 geotextiles from design to applications presents valuable information on the high performance fabrics used in soil separation, drainage, filtration, reinforcement, and cushioning. These polymeric materials offer solutions for geoenvironmental and other civil engineering specialties due to their advanced physical, mechanical, hydraulic, and endurance properties. This important book offers comprehensive coverage of the manufacture, functions, properties, designs, and applications of geotextiles. Part one begins with a chapter on the history of geotextiles followed by chapters giving detailed reviews of the types of fabrics and their manufacturing processes from resin type to fiber extrusion to textile fabrication. Part two covers the properties, behavior, and testing of geotextiles with part three focusing on applications dealing with the specific primary functions of geotextiles. In part four, chapters offer numerous general applications of geotextiles including those in waste containment, marine engineering, walls, slopes,

Lloyd's Register of British and Foreign Shipping 1890 interest in understanding the biological role of carbohydrates has increased significantly over the last 20 years the use of structural techniques to understand carbohydrate protein recognition is still a relatively young area but one that is of emerging importance the high flexibility of carbohydrates significantly complicates the determination of high quality structures of their complexes with proteins specialized techniques are often required to understand the complexity of carbohydrate recognition by proteins in this research topic we will focus on structural and computational approaches to understanding carbohydrate recognition by proteins involved in immunity and infection particular areas of focus include cancer immunotherapeutics carbohydrate lectin interactions glycosylation and glycosyltransferases
