the importance of supply chain management has increased over the last few decades today entire supply chains are competing with each other instead of individual companies as such supply chain management has become a way for companies to set themselves apart from competing companies and their supply chains interestingly supply chain management mainly focuses on efficiency oriented topics rather than effectiveness driven issues in particular the design of supply chains

from manufacturing sites downstream instead of upstream from the customer the supply chain differentiation guide offers a modern approach to supply chain management while for many years one size fits all approaches to supply chain management were very common the current efforts of managers and academics alike focus on the simultaneous management of multiple supply chains despite the interest of the business sector in the management of multiple supply chains academia has largely neglected this topic to date the supply chain differentiation guide addresses this shortcoming introducing both established and cutting edge management methods to the context of supply chain differentiation and providing inspirations for how to improve corporate operations
