the ocean covers over 70 percent of our planet's surface and accounts for 97.99 percent of the liveable biosphere she is the cradle of our existence and the heart of our blue home a vast living and breathing superorganism the ocean is alive is first and foremost a celebration of the ocean in all her living splendour it takes the reader on a fascinating and informative voyage of discovery into the blue heart our planet from the ocean's formation more than four billion years ago and the emergence of life deep below her surface to the incredible diversity and exuberance we know today but much more than this it is a journey of discovery into ocean consciousness through the evolution of the senses the emergence of sentient behaviour and finally an intriguing exploration of what the author calls ocean mind in telling the ocean's story glenn edney draws on his thirty years experience as an ocean ecologist underwater naturalist and professional diver to take us beyond the science and into the depths of what it is like to be an ocean being using a combination of personal experience stories and insights from others along with guided visualizations the author weaves a highly readable and thought provoking tale of an ocean alive to itself and alive to anyone willing to take the plunge but no contemporary story of the ocean would be complete without investigating the current threats to the ocean's wellbeing in addressing these issues the author presents a compelling case for recognition of the ocean as a living being with intrinsic value far beyond the benefits she provides humanity and offers a new vision for our relationship with the living ocean

while much has been written about civilian military teams in vietnam and most recently in iraq and afghanistan the subject has not been addressed in a single comprehensive publication containing historical context and reflecting a broad diversity of views it is the intention of the coeditors of unity of mission to fill this gap the authors are convinced that without unity among military and civilian actors long term mission success is difficult at best they believe the essays contained in this volume attest to this assertion they are also fully aware that civilian military teams are not a silver bullet rather at best such teams serve as a useful tool in a more comprehensive security framework nevertheless in an age of budgetary constraints the need to coordinate military and civilian resources hard kinetic and soft power is clear it is the opinion of the coeditors that civilian military teams are critical to achieving the goals of sustainable peace stability and security
