lots of strategies we can use to solve equations let s  
explore some different ways to solve equations and  
inequalities we ll also see what it takes for an  
equation to have no solution or infinite solutions what  
is a solution a solution is a value we can put in place  
of a variable such as x that makes the equation true  
example  $x^2 = 4$  when we put 6 in place of x we get  $6^2 = 4$   
which is true so x 6 is a solution how about other  
values for x for x 5 we get  $5^2 = 4$  which is not true so  
x 5 is not a solution type a math problem basic algebra
