quality assurance qa in open and distance learning odl can be a contentious issue some argue that it should be

judged by the same criteria and methods as face to face education while others claim that it is so different in its organization enrolments and operations that conventional qa mechanisms cannot apply some advocate the use of specific guidelines and standards for e learning others believe that regardless of the technology the basic principles of quality teaching and learning should apply providers who have enjoyed freedom from external scrutiny may resist attempts at external regulation and auditing and look upon qa as yet another imposition of corporatization and bureaucracy on education others see it as a means of establishing a culture of quality self reflection and self improvement there is little research based literature to guide policy makers managers and practitioners in applying qa in education and training to ensure the right balance is found between accountability and autonomy as well as assuring quality for the time and costs involved in this respect quality assurance and accreditation in distance education and e learning is a book that is long overdue it explains what is involved in qa and accreditation in education it describes and analyzes applications of these practices in open distance dual mode and conventional universities throughout europe north america africa and the asia pacific looking at open schooling e learning in conventional schools non formal adult and community education and corporate and small to medium enterprises quality assurance and accreditation in distance education and e learning is edited and authored by experts with extensive international experience in odl e learning and qa who give careful consideration to the possibilities and challenges involved the book will be an invaluable guide for all policy makers managers practitioners and researchers in the field

in nineteenth century british society music and musicians were organized as they had never been before this organization was manifested in part by the introduction of music into powerful institutions both out of belief in music s inherently beneficial properties and also to promote music occupations and professions in society at large this book provides a representative and varied sample of the interactions between music and organizations in various locations in the nineteenth century british empire exploring not only how and why music was institutionalized but also how and why institutions became musicalized individual essays explore amateur societies that promoted music making institutions that played host to music making groups both amateur and professional music in diverse educational institutions and the relationships between music and what might be referred to as the institutions of state through all of the essays runs the theme of the various ways in which institutions of varying formality and rigidity interacted with music and musicians and the mutual benefit and exploitation that resulted from that interaction

this open access book sheds light on a range of complex interdependencies between adult education young adults in vulnerable situations and active citizenship adult education has been increasingly recognized as a means to engage and re engage young adults and facilitate their life chances and social inclusion thus contributing to an active citizenship within their societal contexts this collection of chapters dealing with issues of social inclusion of young people represents the first book to explicitly approach the complex interdependencies between adult education young adults in vulnerable situations and active citizenship from the european perspective social exclusion disengagement and disaffection of young adults have been among

the most significant concerns faced by eu member states over the last decade it has been increasingly recognised by a range of stakeholders that there is a growing number of young people suffering from the various effects of the unstable social economic and political situations affecting europe and its neighbouring countries young adults who experience different degrees of vulnerability are especially at risk of being excluded and marginalised engaging young adults through adult education has been strongly related to addressing the specific needs and requirements that would facilitate their participation in social economic and civic political life in their country contexts fostering the active citizenship of young people both directly and indirectly is an area where many ae programmes overlap and this has become a core approach to integration this book considers social economic and political dimensions of active citizenship encompassing the development of social competences and social capital civic and political participation and the skills related to the economy and labour market the cross national consideration of the notions of vulnerability inclusion and active citizenship underpins the complexity of translating these concepts into the national contexts of adult education programmes
