paperback and cds although a major language in itself urdu has borrowed words from three major languages of the world namely persian arabic and english with various loan

morphological and phonological features there have been very few studies on this phenomenon and many features are still unexplored this study focuses on loanword morphology and looks at the nature of loanwords borrowed from these three languages the book begins by examining the morphological adaptation of loanwords secondly parallels and differences are explored between the relatively recent adaptation of english loans and the older adaptation of words from arabic and persian the descriptive content of the book covering as it does not only english loanwords but those from arabic and persian as well in addition to examining native urdu structures is refreshingly broad the study itself is primarily descriptive carefully teasing apart the sometimes complex interactions between syntax semantics and linguistic function relative to loanword adaptation however even beyond the question of loanword adaptation there is much to recommend itself descriptively here with regard to the morphological structures of urdu including endocentric exocentric copulative postpositional and verbal compounds in addition to such derivational processes this study also considers various inflectional issues such as gender number and case morphology the pluralisation of english nominal loans and the adaptation of english verbs through the use of urdu dummy verbs the book offers a good foundation for a more in depth examination of the data against current morphological theory taken as a whole it not only presents a large quantity of interesting data in pursuing the immediate question of loanword adaptation in urdu but also provides a fruitful starting point for a wealth of further investigations into urdu and into loanword adaptation more generally have you ever been enchanted by the spoken cadence of an urdu couplet but wished you could fully understand its nuances have you wanted to engage with a ghazal more deeply but were daunted by its mystifying conventions are you confused between a qataa and a rubaai or a musadda and a marsiya in urdu poetry raza mir offers a fresh quirky and accessible entry point for neophytes seeking to enhance their enjoyment of this vibrant canon from the poems of legends like mir taqi mir and mirza ghalib to the lyrics of contemporary game changers like javed akhtar and gulzar raza mir s translation not only draws out the The History of Urdu Language

2014-10-14

although a major language in itself urdu has borrowed words from three major languages of the world namely persian arabic and english with various loan morphological and phonological features there have been very few studies on this phenomenon and many features are still unexplored this study focuses on loanword morphology and looks at the nature of loanwords borrowed from these three languages the book begins by examining the morphological adaptation of loanwords secondly parallels and differences are explored between the relatively recent adaptation of english loans and the older adaptation of words from arabic and persian the descriptive content of the book covering as it does not only english loanwords but those from arabic and persian as well in addition to examining native urdu structures is refreshingly broad the study itself is primarily descriptive carefully teasing apart the sometimes complex interactions between syntax semantics and linguistic function relative to loanword adaptation however even beyond the question of loanword adaptation there is much to recommend itself descriptively here with regard to the morphological structures of urdu including endocentric exocentric copulative postpositional and verbal compounds in addition to such derivational processes this study also considers various inflectional issues such as gender number and case morphology the pluralisation of english nominal loans and the adaptation of english verbs through the use of urdu dummy verbs the book offers a good foundation for a more in depth examination of the data against current morphological theory taken as a whole it not only presents a large quantity of interesting data in pursuing the immediate question of loanword adaptation in urdu but also provides a fruitful starting point for a wealth of further investigations into urdu and into loanword adaptation more generally
