## **Coming Apart**

2012-01-31

new york times bestseller a fascinating explanation for why white america has become fractured and divided in education and class from the acclaimed author of human diversity i ll be shocked if there s another book that so compellingly describes the most important trends in american society david brooks new york times in coming apart charles murray explores the formation of american classes that are different in kind from anything we have ever known focusing on whites as a way of driving home the fact that the trends he describes do not break along lines of race or ethnicity drawing on five decades of statistics and research coming apart demonstrates that a new upper class and a new lower class have diverged so far in core behaviors and values that they barely recognize their underlying american kinship divergence that has nothing to do with income inequality and that has grown during good economic times and bad the top and bottom of white america increasingly live in different cultures murray argues with the powerful upper class living in enclaves surrounded by their own kind ignorant about life in mainstream america and the lower class suffering from erosions of family and community life that strike at the heart of the pursuit of happiness that divergence puts the success of the american project at risk the evidence in coming apart is about white america its message is about all of america

## **Concepts of Earth Science & Chemistry Parent Lesson Plan**

2013-08-26

concepts of earth and chemistry course description this is the suggested course sequence that allows one core area of science to be studied per semester you can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility semester 1 earth blending a creationism perspective of history with

definitions of terms and identification of famous explorers scientists etc this book gives students an excellent initial knowledge of people and places encouraging them to continue their studies in depth semester 2 chemistry chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper this book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers find out why pure gold is not used for jewelry or coins join humphry davy as he made many chemical discoveries and learn how they shortened his life see how people in the 1870s could jump over the top of the washington monument exploring the world of chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information
