tim marshall the new york times bestselling author of prisoners of geography offers a readable primer to many of the biggest problems facing the world daily express uk by examining the borders walls and boundaries that divide countries and their populations the globe has always been a world of walls from the great wall of china to hadrian s wall to the berlin wall but a new age of isolationism and economic nationalism is upon us visible in trump s obsession with building a wall on the mexico border in britain s brexit vote and in many other places as well china has the great firewall holding back western culture europe s countries are walling themselves against immigrants terrorism and currency issues south africa has heavily gated communities and massive walls or fences separate people in the middle east korea sudan india and other places around the world in fact more than a third of the world

s nation states have barriers along their borders understanding what is behind these divisions is essential to understanding much of what s going on in the world today written in tim marshall s brisk inimitable style the age of walls is divided by geographic region he provides an engaging context that is often missing from political discussion and draws on his real life experiences as a reporter from hotspots around the globe he examines how walls borders and barriers have been shaping our political landscape for hundreds of years and especially since 2001 and how they figure in the diplomatic relations and geo political events of today marshall is a skilled explainer of the world as it is and geography buffs will be pleased by his latest kirkus reviews accomplished well researched and pacey the age of walls is for anyone who wants to look beyond the headlines and explore the context of some of the biggest challenges facing the world today it is a fascinating and fast read city am uk

Government Employee Relations Report 1974

howard fineman is one of our best known and most trusted political journalists mixing vivid scenes and figures from the campaign trail with forays into four hundred years of american history fineman shows that every debate from our nation s founding to the present day is rooted in one of thirteen arguments that thankfully defy resolution it is the very process of never ending argument fineman explains that defines us inspires us and keeps us free at a time when most public disagreement seems shrill and meaningless fineman makes a cogent case for nurturing the real american dialogue shouting is not arguing fineman notes but often hot button topics media cross fires and blogs reflect the deepest currents in american life in an enlightening book that cuts through the din and makes sense of the headlines fineman captures the essential issues that have always compelled healthy and heated debate and must continue to do so in order for us to prosper in the twenty first century the thirteen american arguments run the gamut from issues of individual identity to our country s role in the world including who is a person the declaration of independence says everyone but it took a civil war and the civil rights and other movements to make that a reality presently what about human embryos and unlawful enemy combatants who is an american only a nation of immigrants could argue so much about who should become one there is currently added urgency when terrorists are at large in the world and twelve million undocumented aliens are in the country the role of faith no country is more legally secular yet more avowedly prayerful from thomas jefferson to terri schiavo we can never quite decide where god fits in government presidential power in a democracy leadership is all the more difficult and paradoxically all the more essential from george washington to george w bush we have always asked how much power should a president have america in the world uniquely we perpetually ask ourselves whether we have a moral obligation to change the world or alternatively whether we must try to change it to survive in it whether it s the environment international trade interpreting law congress vs the president or reformers vs elites these are the issues that galvanized the founding fathers and should still inspire our leaders thinkers and citizens if we cease to argue about these things we cease to be argument is strength not weakness says fineman as long as we argue there is hope and as long as there is hope we will argue

Freedom Is a Constant Struggle 2018-06-29

one of barack obama's recommended reads for summer a brave and necessary book anyone interested in the future of liberal democracy in the us or anywhere else should read this book anne applebaum a convincing humane and hopeful guide to the present and future by one of our foremost democratic thinkers george packer a rare thing an academic treatise that may actually have influence in the arena of practical politics passionate and personal joe klein new york times book review from one of our sharpest and most important political thinkers a brilliant big picture vision of the greatest challenge of our time how to bridge the bitter divides within diverse democracies enough for them to remain stable and functional some democracies are highly homogeneous others have long maintained a brutal racial or religious hierarchy with some groups dominating and exploiting others never in history has a democracy succeeded in being both diverse and equal treating members of many different ethnic or religious groups fairly and yet achieving that goal is now central to the democratic project in countries around the world it is yascha mounk argues the greatest experiment of our time drawing on history social psychology and comparative politics mounk examines how diverse societies have long suffered from the ills of domination fragmentation or structured anarchy so it is hardly surprising that most people are now deeply pessimistic that different groups might be able to integrate in harmony celebrating their differences without essentializing them but mounk shows us that the past can offer crucial insights for how to do better in the future there is

real reason for hope it is up to us and the institutions we build whether different groups will come to see each other as enemies or friends as strangers or compatriots to make diverse democracies endure and even thrive we need to create a world in which our ascriptive identities come to matter less not because we ignore the injustices that still characterize the united states and so many other countries around the world but because we have succeeded in addressing them the great experiment is that rare book that offers both a profound understanding of an urgent problem and genuine hope for our human capacity to solve it as mounk contends giving up on the prospects of building fair and thriving diverse democracies is simply not an option and that is why we must strive to realize a more ambitious vision for the future of our societies
