the scarcity of good quality irrigation water is a serious problem in arid and semiarid zones of the world which comprise one third of the earth fresh water resources which are very scarce forming only 3 of the total water reserves are overexploited and consequently have been tending to cause salinisation remaining 97 water in sea is excessively saline and generally not suitable for large scale exploitation in agriculture more than half of the world s ground water supplies are also saline although to cope with the increasing requirements of the accelerating population irrigated area in the world in last two centuries has increased from 8 mha 1800 to 220 mha 1990 but development of salinity on about half the irrigated land caused due to indiscriminate use of waters has been a serious constraint for optimum crop production in this context the rational use of irrigation waters without development of salinity is the most important challenging task and herein lies the value of scientific knowledge on the use of saline water in agriculture the first edition of this monograph was published in 1979 and second revised edition was published in 1990 the purpose of the present third revised edition was to update the relevant information so that the latest synthesised knowledge becomes easily accessible to research workers teachers postgraduate students extension people and planners who can utilise it profitably in the diagnosis and improvement of saline water irrigated agriculture although the book contains most of the research work pertaining to india but the principles and practices of the utilisation of saline waters

can be extended safely to many countries of the world confronted with the similar problems

## Land Use and Society, Revised Edition

2004-06-18

the first update to this key reference guide in over 15 years this revised edition contains a new format making it even easier to study for the dpr exams in addition to the review questions found at the end of each chapter this new edition contains knowledge expectations at the beginning of each chapter these brief statements describe what you are expected to learn after reading that chapter allowing you to study more effectively for dpr s pesticide applicator licensing qal qac exams these knowledge expectations are also highlighted in sidebars throughout each chapter providing a study roadmap so you know which sections of each chapter are most important also new updated pesticides table to reflect products available in california updated information on nematodes vertebrates and pathogens expanded information on environmental hazards expanded information on personal protective equipment including epa respirator criteria up to date information on worker protection standardsexpanded information on pesticide resistance updated compliance guidelines for pesticide use reporting as required by california law a dedicated chapter covering label reading including an updated label that reflects current regulations the safe and effective use of pesticides provides detailed information for selecting using handling storing and disposing of pesticides it emphasizes worker protection prevention of groundwater contamination protection of endangered species and wildlife and reduction of environmental problems this is a significant update to the 2nd edition so everyone will want to update their reference library with this new edition the principles described in this volume apply to all areas of pest control including agricultural structural landscape greenhouse and public health applications volume 1 in the pesticide application compendium this is recommended study material for all categories of the california department of pesticide regulation s dpr qualified pesticide applicator license qal and qualified pesticide applicator certificate qac exams
