this book provides step by step illustrated descriptions of diverse vocal fold injection techniques including some not previously described the aim is to provide laryngologists in general and especially those who are less experienced with the detailed understanding and guidance needed in order to achieve optimal outcomes highly experienced experts describe approaches via the transoral transnasal and transcutaneous routes and offer guidance on indications injection materials pre and postoperative care and the management of complications special considerations that must be borne in mind when employing different vocal fold injection techniques in different settings are also carefully explained in offering comprehensive up to date information on this minimally invasive and cost effective procedure vocal fold injection will be an essential aid for practitioners animal identification and recording serves multiple purposes in a country s livestock sector it is a prerequisite to establish and operate any genetic improvement programme it also contributes to animal traceability and disease control as well as to deterring stock theft traceability of animals and their products helps to ensure the safety and quality of animal products and contributes to enhance market access and to generate larger incomes for producers and other players in the value chain animal recording systems are therefore not just an information system but a powerful tool for livestock development and for contributing to global demands for food security and poverty alleviation to make animal recording systems effective they must be supported by appropriate public and private policies and a legal and institutional framework these multiple uses of animal identification and recording highlight the need to adopt multipurpose systems that integrates animal identification and recording

registration animal traceability animal health information and performance recording the fao guidelines for development of integrated multipurpose animal recording systems have been prepared with the objective of helping countries to design and implement such systems and to maximize the chances that they will be sustained these guidelines put performance recording in a more general context and hence to complement rather than replace the previous fao guidelines these guidelines focus primarily upon the process rather than the methods and the technology e g details of the equipment and measurements since the latter is sufficiently covered by other guidelines where necessary the guidelines are formulated to suit low or medium input production environments this book discusses the aging voice one of the interesting issues related to aging population aging is an issue in most developed countries where both physicians and specialists are required to improve clinical and scientific practice for elderly adults in particular the need for expertise in the diagnosis and treatment of aging voice pathologies is increasing continually new developments in regenerative medicine have taken care for the aging voice to new level and the contributors to this book use their wealth of experience in the field of the aging voice to present the latest advances in this field this book is a unique resource providing new perspectives for physicians clinicians and health care workers who are interested in the aging voice this unique book addresses iran s extremely rich soil diversity and resources which have developed under various climatic conditions ranging from dry to humid conditions featuring contributions by a group of respected experts on iranian soils and agriculture it provides comprehensive information on the management approaches needed for sustainable soil utilization and conservation under such conditions and the attendant challenges as such it offers a valuable resource for anyone interested in soils and agriculture in iran but also in other middle east and north african countries with similar climatic conditions

the book contains 14 chapters which illustrate the long history of indigenous knowledge and soil research climate geology and geomorphology vegetation cover soil forming factors and processes major soils properties and their classification furthermore it presents past climate change and paleosols agroecological zones soil fertility soil biology and biotechnology human induced land degradation and soil management in space and time in the end major challenges facing the soil resources of the country are defined and recommendations are made to face the future challenges this well illustrated book provides step by step guidance on the various techniques microlaryngoscopic fiberoptic endoscopic and transcutaneous that can be employed for the purpose of injection laryngoplasty a surgical procedure in which a foreign material is injected into the vocal fold the anatomy and function of the region are first explained with identification of the causes and means of evaluation of glottic and neoglottic insufficiency advice is then provided on the choice of material for injection laryngoplasty including absorbable and long lasting options on the basis of careful analysis that takes into account both the recent literature and the authors own experiences detailed descriptions of the surgical indications and different procedures follow and for ease of reference clear flow charts on diagnosis and indications are also included the book concludes with chapters on the use of injection laryngoplasty specifically in the pediatric population and on postoperative care and speech therapy following the procedure injection laryngoplasty will provide valuable assistance to all surgeons wishing to perform this kind of surgery this book includes papers presented at the 2017 joint meeting of fodder crops and amenity grasses section and protein crops working group of eucarpia oil and protein crops section the theme of the meeting breeding grasses and protein crops in the era of genomics has been divided into six parts 1 utilisation of genetic resources and pre breeding 2 genetic improvement of quality and agronomic traits 3 breeding for

animal identification and recording serves multiple purposes in a country's livestock sector it is a prerequisite to establish and operate any genetic improvement programme it also contributes to animal traceability and disease control as well as to deterring stock theft traceability of animals and their products helps to ensure the safety and quality of animal products and contributes to enhance market access and to generate larger incomes for producers and other players in the value chain animal recording systems are therefore not just an information system but a

powerful tool for livestock development and for contributing to global demands for food security and poverty alleviation to make animal recording systems effective they must be supported by appropriate public and private policies and a legal and institutional framework these multiple uses of animal identification and recording highlight the need to adopt multipurpose systems that integrates animal identification and registration animal traceability animal health information and performance recording the fao guidelines for development of integrated multipurpose animal recording systems have been prepared with the objective of helping countries to design and implement such systems and to maximize the chances that they will be sustained these guidelines put performance recording in a more general context and hence to complement rather than replace the previous fao guidelines these guidelines focus primarily upon the process rather than the methods and the technology e g details of the equipment and measurements since the latter is sufficiently covered by other guidelines where necessary the guidelines are formulated to suit low or medium input production environments

this book discusses the aging voice one of the interesting issues related to aging population aging is an issue in most developed countries where both physicians and specialists are required to improve clinical and scientific practice for elderly adults in particular the need for expertise in the diagnosis and treatment of aging voice pathologies is increasing continually new developments in regenerative medicine have taken care for the aging voice to new level and the contributors to this book use their wealth of experience in the field of the aging voice to present the latest advances in this field this book is a unique resource

providing new perspectives for physicians clinicians and health care workers who are interested in the aging voice

this well illustrated book provides step by step guidance on the

various techniques microlaryngoscopic fiberoptic endoscopic and transcutaneous that can be employed for the purpose of injection laryngoplasty a surgical procedure in which a foreign material is injected into the vocal fold the anatomy and function of the region are first explained with identification of the causes and means of evaluation of glottic and neoglottic insufficiency advice is then provided on the choice of material for injection laryngoplasty including absorbable and long lasting options on the basis of careful analysis that takes into account both the recent literature and the authors own experiences detailed descriptions of the surgical indications and different procedures follow and for ease of reference clear flow charts on diagnosis and indications are also included the book concludes with chapters on the use of injection laryngoplasty specifically in the pediatric population and on postoperative care and speech therapy following the procedure injection laryngoplasty will provide valuable assistance to all surgeons wishing to perform this kind of surgery

this book describes how genomics has revolutionized our understanding of agriculturally important plant associated fungi it

illustrates some fundamental discoveries about these eukaryotic microbes with regard to the overall structure of their genomes their lifestyles and the molecular mechanisms that form the basis of their interactions with plants genomics has provided new insights into fungal lifestyles and led to practical advances in plant breeding and crop protection such as predictions about the spread and evolution of new pathogens this volume focuses on fungi that are important cereal and other monocot plant pathogens and includes *pyrenophora tritici repentis* *cochliobolus sp colletotrichum sp fusarium graminearum* *mycosphaerella graminicola* and *mycosphaerella fijiensis* *magnaporthe oryzae* *blumeria graminis* and *puccinia graminis*

a provocative and urgent essay collection that asks how we can live with hope in an age of ecocide paul kingsnorth was once an activist an ardent environmentalist he fought against rampant development and the depredations of a corporate world that seemed hell bent on ignoring a looming climate crisis in its relentless pursuit of profit but as the environmental movement began to focus on sustainability rather than the defense of wild places for their own sake and as global conditions worsened he grew disenchanted with the movement that he once embraced he gave up what he saw as the false hope that residents of the first

world would ever make the kind of sacrifices that might avert the severe consequences of climate change full of grief and fury as well as passionate lyrical evocations of nature and the wild confessions of a recovering environmentalist gathers the wave making essays that have charted the change in kingsnorth s thinking in them he articulates a new vision that he calls dark ecology which stands firmly in opposition to the belief that technology can save us and he argues for a renewed balance between the human and nonhuman worlds this iconoclastic fearless and ultimately hopeful book which includes the much discussed uncivilization manifesto asks hard questions about how we ve lived and how we should live
