The Art of Experimental Economics 2021-08-26

why the global recession is in danger of becoming another great depression and how we can stop it when the united states stopped backing dollars with gold in 1968 the nature of money changed all previous constraints on money and credit creation were removed and a new economic paradigm took shape economic growth ceased to be driven by capital accumulation and investment as it had been since before the industrial revolution instead credit creation and consumption began to drive the economic dynamic in the new depression the breakdown of the paper money economy richard duncan introduces an analytical framework the quantity theory of credit that explains all aspects of the calamity now unfolding its causes the rationale for the government's policy response to the crisis what is likely to happen next and how those developments will affect asset prices and investment portfolios in his previous book the dollar crisis 2003 duncan explained why a severe global economic crisis was inevitable given the flaws in the post bretton woods international monetary system and now he's back to explain what's next the economic system that emerged following the abandonment of sound money requires credit growth to survive yet the private sector can bear no additional debt and the government's creditworthiness is deteriorating rapidly should total credit begin to contract significantly this new depression will become a new great depression with disastrous economic and geopolitical consequences that outcome is not inevitable and this book describes what must be done to prevent it presents a fascinating look inside the financial crisis and how the new depression is poised to become a new great depression introduces a new theoretical construct the quantity theory of credit that is the key to understanding not only the developments that led to the crisis but also to understanding how events will play out in the years ahead offers unique insights from the man who predicted the global economic breakdown alarming but essential reading the new depression explains why the global economy is teetering on the brink of falling into a deep and protracted depression and how we can restore stability

Contemporary Issues in Business and Economics 2020-07-01

this pioneering 1997 study examines the economic development of the british paper industry between 1860 and 1914 an era in which it is often claimed that the origins of britain s relative economic decline are first witnessed for paper making this was also a period in which an array of important new forces including inter alia the development of new raw materials and the move to ever larger scales of production came on the scene gary bryan magee looks at the effect of these changes and assesses how effectively the industry coped with the new pressures drawing upon an extensive range of quantitative and archival sources from britain america and other countries along the way dr magee addresses issues central to the understanding of industrial competitiveness such as technological change entrepreneurship productivity trade policy and industrial relations

Shipping Economics 1975-06-18

this volume brings together those papers of mine which may be of interest not only to various specialists but also to philosophers many of my writings in mathematics were motivated by epistemological considerations some papers originated in the critique of certain views that at one time dominated the discussions of the vienna circle others grew out of problems in teaching fundamental ideas of mathematics still others were occasioned by personal relations with economists hence a wide range of subjects will be discussed epistemology logic basic concepts of pure and applied mathematics philosophical ideas resulting from geometric studies mathematical didactics and finally economics the papers also span a period of more than fifty years what unifies the various parts of the book is the spirit of searching for the clarification of basic concepts and methods and of articulating hidden ideas and tacit procedures part 1 includes papers published about 1930 which expound an idea that carnap after a short period of opposition in the circle fully adopted and under the name principle of tolerance he eloquently formulated it in great generality in his book logical syntax of language 1934 through which it was widely disseminated the new logic in chapter 1 furthermore includes the first report 1932 to a larger public of gödel s epochal discovery presented among the great logic results of all time chapter 2 is a translation of an often quoted 1930 paper presenting a detailed exposition and critique of intuitionism

Economics Department Working Paper 1969
