

Free ebook Al cuore della biologia per il triennio delle scuole superiori con e con espansione online Full PDF

the novartis foundation series is a popular collection of the proceedings from novartis foundation symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results the novartis foundation originally known as the ciba foundation is well known to scientists and clinicians around the world advances in marine biology volume 79 the latest release in a series that has been providing in depth and up to date reviews on all aspects of marine biology since 1963 updates on many topics that will appeal to postgraduates and researchers in marine biology fisheries science ecology zoology and biological oceanography this latest release includes a review of patterns of multiple paternity across sea turtle rookeries parasites and pathogens in seabirds progress in marine genomics and bioinformatics the rise of sea turtle research and conservation and the potential impacts of offshore oil and gas activities on deep sea sponges and the habitats they form reviews articles on the latest advances in marine biology authored by leading figures in their respective fields of study presents materials that are widely used by managers students and academic professionals in the marine sciences riccardo chiaradonna filippo forcignanò e franco trabattoni presentazione francesco fronterotta do the gods play dice sensible sequentialism and fuzzy logic in plato s timaeus riccardo chiaradonna massimo marraffa ontology and the self ancient and contemporary perspectives gabriele galluzzo are matter and form parts aristotle s and neo aristotelian hylomorphism riin sirkel essence and cause making something be what it is marilù papandreou aristotle s hylomorphism and the contemporary metaphysics of artefacts gabriele de anna substance form and modality maddalena bonelli dipendenza e indipendenza ontologica la modernità della posizione peripatetica enrico postiglione aristotle on the distribution of consciousness diego zucca neo aristotelian biofunctionalism matteo pietropaoli λ οὐσία come presenza costante e l'esser vero come autentico essere heidegger interprete di aristotele metafisica Θ 10 aerobiology is the science that studies the biological component of the atmosphere and its effects on living systems and on the environment this term was used for the first time in 1935 but the attention of scientists to the biological component of the atmosphere goes back to 1769 when the italian biologist spallanzani carried out a series of experiments that disproved the

concept of spontaneous generation of life and proved the presence of viable microorganisms in the air aerobiology has marked characteristics of interdisciplinarity its application fields range from respiratory diseases to the airborne outbreak of animal and vegetal diseases and to the biodegradation of substances and materials the latter is the subject of this book the purpose of aerobiological research applied to the conservation of cultural heritage is to evaluate the risk of alteration by airborne microorganisms of materials forming artefacts of historical artistic and archaeological interest airborne spores and vegetative structures may develop on different substrates and may be a cause of degradation in relation to the types of materials the microclimatic situation and the pollution of the conservation environments the qualitative and quantitative evaluation of the biological component of air performed by means of targeted analysis campaigns and of the characteristics of materials and environments supplies indispensable information for the evaluation of the actual risk and the planning of interventions this book is divided into four main parts this handbook provides guidance on methods for use in fish ageing studies fish age among other biological parameters is one of the most relevant pieces of data to attain sustainable exploitation levels of fishery resources indeed most analytical methods used in stock assessment require knowledge of demographic structure according to age of stocks as well as to recruitment growth maturity natural mortality etc which are strictly linked to information on age and age structure the handbook was put together to deal with identified gaps which affect both the precision and the accuracy of estimations regarding ageing schemes criteria and methodologies used in preparing calcified structures it focuses on the general principles that underpin age analysis assignment of birth date preparation methods aging scheme reading and identification of true and false rings crucially it aims to contribute to the establishment of common analysis methods which can enable better calibration across the diverse institutes involved thereby improving the quality and reliability of results foreword the modern developments in mathematical biology took place roughly between 1920 and 1940 a period now referred to as the golden age of theoretical biology the eminent italian mathematician vito volterra played a decisive and widely acknowledged role in these developments volterra s interest in the application of mathematics to the non physical sciences and to biology and economics in particular dates back to the turn of the century and was expressed in his inaugural address at the university of rome for the academic year 1900 01 volterra 1901 nevertheless it was only in the mid twenties that volterra entered the field in person at the instigation of his son in law umberto d ancona who had confronted him with the problem of competition among animal species asking him whether a mathematical treatment was possible from that time on until his death in 1940 volterra produced a huge output of publications on the subject volterra s specific project was to transfer the model and the concepts of classical

mechanics to biology constructing a sort of rational mechanics and an analytic mechanics of biological associations the new subject was thus to be equipped with a solid experimental or at least empirical basis also in this case following the tried and tested example of mathematical physics although very few specific features of this reductionist programme have actually survived volta's contribution was decisive as is now universally acknowledged in encouraging fresh studies in the field of mathematical biology recent years have seen a growing interest in the application of chalcogenide nanoparticles nps e g se te cdse and cdte nps in various industrial sectors including energy petroleum refining and in the field of biology and medicine moreover due to the high toxicity of chalcogen oxyanions their release into the environment is of great concern thus emphasis was given in this study on the development of a novel microbial synthesis process of chalcogenide nps by combining biological treatment of se te containing wastewaters with biorecovery in the form of se nps te nps and cdse nps enrichment of se oxyanion reducing microorganisms was carried out to simultaneously remove selenite se iv and cadmium cd ii from wastewaters by combining bioremediation of toxic se rich wastewater with the biorecovery of se as cdse nps the results showed compositional changes in the extracellular polymeric substances eps matrix of the anaerobic granular sludge upon exposure to cd ii and se iv and identified the roles of eps fractions in the biogenesis of cdse nps besides it was found that the eps on the surface of the biogenic se nps play a major role in lowering the bioavailability and toxicity of biogenic se 0 compared to chemogenic se 0 nps an upflow anaerobic sludge blanket uasb reactor was used for the first time to continuously remove tellurite from wastewater and recover biogenic te 0 includes section recent book acquisitions varies recent united states publications formerly published separately by the u s army medical library nanotechnologies and nanomaterials for diagnostic conservation and restoration of cultural heritage explores how advanced nanoscale techniques can help preserve artworks the book covers lab scale available techniques as well as advanced methods from neutron sources and x ray spectroscopy other sections highlight a variety of nanomaterials with potential uses in treatments for restoration and conservation with conservation consolidation and long term protection protocols analyzed in each case the final chapter presents case studies demonstrates how nanoscale techniques are used to conserve art and shows what happens when misinterpretation of data sources leads to misdiagnosis the book is intended for scientists from academic and professional conservators restorers who are involved in the conservation of artistic and historical artifacts and those who want to learn how nanotechnology can increase the efficiency of conservation and protection techniques cogently explains how nanotechnology is used in the preservation protection and restoration of artworks explores the best nanomaterials for a variety of situations shows how nanomaterials can be used in restoration for cleaning and

in conservation treatments includes guidelines to prevent the misinterpretation of diagnostic data to help avoid misdiagnosis the world guide to special libraries lists about 35 000 libraries world wide categorized by more than 800 key words including libraries of departments institutes hospitals schools companies administrative bodies foundations associations and religious communities it provides complete details of the libraries and their holdings and alphabetical indexes of subjects and institutions advances in marine biology volume 89 updates on many topics that will appeal to postgraduates and researchers in marine biology fisheries science ecology zoology and biological oceanography chapters in this new release include bio concretions of submarine caves and or on resting stages from plankton and the resurrection ecology shallow subtidal rocky reefs of the mediterranean from an economic crisis to a pandemic crisis the need for accurate marine monitoring data to take informed management decisions backcasting vs forecasting about the paradox of jevons sustainability the ecological transition and the translation of scientific knowledge into policy shark biology and conservation and more reviews articles surrounding the latest advances in marine biology authored by leading figures in their respective fields of study presents materials that are widely used by managers students and academic professionals in the marine sciences the future of the common fisheries policy depends on progress in the relevant areas of research this applies to the whole range of management decisions where precise reliable and complete data are essential to inform those who must decide on the pursuit of existing activities especially in the area of maritime fisheries and the development of promising new activities such as aquaculture every day the director general of dg xiv requires more and more information to prepare decisions which will affect the future of all those in the community who are dependent on fishing and aquaculture there is thus a high level of direct demand from dg xiv over and above this immediate and specific requirement for short and medium term applications research affects the competitiveness of the community this is one area which favours the collaboration across frontiers of all those who seek to advance knowledge but although dg xiv is uniquely placed to appreciate the importance of research into fisheries and aquaculture there is no question of succumbing to the temptation to directly control the scope of research or its conduct the notion of subsidiarity can best be understood by examining the existing structures in the member states the commission must act first and foremost as a catalyst by promoting the circulation of information and the coordination of research programmes lo scopo della psicologia dello sviluppo è descrivere e spiegare i cambiamenti nel comportamento e nelle attività psicologiche dal periodo prenatale fino alla vecchiaia il volume affronta in modo approfondito i principali temi della psicologia dello sviluppo dal periodo prenatale fino alla vecchiaia esaminandone sia gli aspetti biologici che quelli culturali nel testo sono presentate le più importanti teorie dello sviluppo in una

prospettiva storica e in particolare quelle di piaget vygotskij e bowlby che permettono di comprendere gli orientamenti della ricerca contemporanea e forniscono una sintesi moderna rispetto alle radicali posizioni innatiste e ambientaliste il testo presenta inoltre recenti ipotesi sostenute da evidenze sperimentali che hanno portato a parziali revisioni di queste teorie il volume fornisce in tal modo una visione complessiva e aggiornata delle questioni teoriche e metodologiche più rilevanti della psicologia dello sviluppo ed è consigliato per studenti universitari insegnanti operatori del settore genitori e per tutti coloro che sono interessati a questa disciplina l curatore di questa edizione ha inoltre apportato integrazioni e adattamenti specifici per il pubblico italiano a tal fine sono state anche illustrate recenti ricerche italiane rilevanti per i temi trattati nel testo a keyword listing of serial titles currently received by the national library of medicine seconda edizione revisionata il titolo richiama il motto veritatem tempus manuducit che harvey pose sul frontespizio del suo libro sulla circolazione del sangue opera che mise fine alla fisiologia antica e fondò la scienza moderna dopo un breve excursus nella biologia antica greca romana e del medioevo islamico e cristiano i successivi capitoli approfondiscono quell arco di tempo dal rinascimento all illuminismo durante il quale si pongono le premesse della moderna biologia con la rivoluzione darwiniana il progresso biologico si accelera e nell arco di poco più di cento anni giunge alla sua seconda grande rivoluzione quella molecolare successiva alla scoperta della doppia elica del dna la moderna biologia genetica e molecolare non è nata spontaneamente dal vuoto culturale preesistente ma alla sua nascita hanno concorso i contributi di menti poderose e molti secoli di ricerche È sciocco pensare come taluno fa che prima di darwin non sia esistita zoologia né genetica prima di mendel né biochimica e biologia molecolare prima della scoperta della doppia elica del dna sebbene libro sia nato nell intento di fornire l indispensabile cultura storica della biologia agli studenti del corso di laurea in scienze biologiche non vuole essere solo un testo universitario ma anche e piacerebbe dire soprattutto un testo di divulgazione che ha per oggetto quei tre millenni della storia della nostra cultura da aristotele ai nostri giorni second edition of a classic text on canine science and behavior incorporating two decades of new evidence and discoveries first multi year cumulation covers six years 1965 70

Biochemistry of Human Genetics 1976

aerobiology is the science that studies the biological component of the atmosphere and its effects on living systems and on the environment this term was used for the first time in 1935 but the attention of scientists to the biological component of the atmosphere goes back to 1769 when the italian biologist spallanzani carried out a series of experiments that disproved the concept of spontaneous generation of life and proved the presence of viable microorganisms in the air aerobiology has marked characteristics of interdisciplinarity its application fields range from respiratory diseases to the airborne outbreak of animal and vegetal diseases and to the biodegradation of substances and materials the latter is the subject of this book the purpose of aerobiological research applied to the conservation of cultural heritage is to evaluate the risk of alteration by airborne microorganisms of materials forming artefacts of historical artistic and archaeological interest airborne spores and vegetative structures may develop on different substrates and may be a cause of degradation in relation to the types of materials the microclimatic situation and the pollution of the conservation environments the qualitative and quantitative evaluation of the biological component of air performed by means of targeted analysis campaigns and of the characteristics of materials and environments supplies indispensable information for the evaluation of the actual risk and the planning of interventions this book is divided into four main parts

Supplemento alle Ricerche di biologia della selvaggina 2001

this handbook provides guidance on methods for use in fish ageing studies fish age among other biological parameters is one of the most relevant pieces of data to attain sustainable exploitation levels of fishery resources indeed most analytical methods used in stock assessment require knowledge of demographic structure according to age of stocks as well as to recruitment growth maturity natural mortality etc which are strictly linked to information on age and age structure the handbook was put together to deal with identified gaps which affect both the precision and the accuracy of estimations regarding ageing schemes criteria and methodologies used in preparing calcified structures it focuses on the general principles that underpin age analysis assignment of birth date preparation methods aging scheme reading and identification of true and false rings crucially it aims to contribute to the establishment of common analysis methods which can enable better calibration across the diverse institutes involved thereby improving the quality and reliability of results

Proceeding of the III Conference of European Researchers in Didactic of Biology (ERIDOB) 2018-07-14

foreword the modern developments in mathematical biology took place roughly between 1920 and 1940 a period now referred to as the golden age of theoretical biology the eminent italian mathematician vito volterra played a decisive and widely acknowledged role in these developments volterra s interest in the application of mathematics to the non physical sciences and to biology and economics in particular dates back to the turn of the century and was expressed in his inaugural address at the university of rome for the academic year 1900 01 volterra 1901 nevertheless it was only in the mid twenties that volterra entered the field in person at the instigation of his son in law umberto d ancona who had confronted him with the problem of competition among animal species asking him whether a mathematical treatment was possible from that time on until his death in 1940 volterra produced a huge output of publications on the subject volterra s specific project was to transfer the model and the concepts of classical mechanics to biology constructing a sort of rational mechanics and an analytic mechanics of biological associations the new subject was thus to be equipped with a solid experimental or at least empirical basis also in this case following the tried and tested example of mathematical physics although very few specific features of this reductionist programme have actually survived volterra s contribution was decisive as is now universally acknowledged in encouraging fresh studies in the field of mathematical biology

Advances in Marine Biology 1955

recent years have seen a growing interest in the application of chalcogenide nanoparticles nps e g se te cdse and cdte nps in various industrial sectors including energy petroleum refining and in the field of biology and medicine moreover due to the high toxicity of chalcogen oxyanions their release into the environment is of great concern thus emphasis was given in this study on the development of a novel microbial synthesis process of chalcogenide nps by combining biological treatment of se te containing wastewaters with biorecovery in the form of se nps te nps and cdse nps enrichment of se oxyanion reducing microorganisms was carried out to simultaneously remove selenite se iv and cadmium cd ii from wastewaters by combining bioremediation of toxic se rich wastewater with the biorecovery of se as cdse nps the results showed compositional changes in the extracellular polymeric substances eps matrix of the anaerobic granular sludge upon exposure to cd ii and se iv and identified the

roles of eps fractions in the biogenesis of cdse nps besides it was found that the eps on the surface of the biogenic se nps play a major role in lowering the bioavailability and toxicity of biogenic se 0 compared to chemogenic se 0 nps an upflow anaerobic sludge blanket uasb reactor was used for the first time to continuously remove tellurite from wastewater and recover biogenic te 0

advances in marine biology volume 89 updates on many topics that will appeal to postgraduates and researchers in marine biology fisheries science ecology zoology and biological oceanography chapters in this new release include bio concretions of submarine caves and or on resting stages from plankton and the resurrection ecology shallow subtidal rocky reefs of the mediterranean from an economic crisis to a pandemic crisis the need for accurate marine monitoring data to take informed management decisions backcasting vs forecasting about the paradox of jevons sustainability the ecological transition and the translation of scientific knowledge into policy shark biology and conservation and more reviews articles surrounding the latest advances in marine biology authored by leading figures in their respective fields of study presents materials that are widely used by managers students and academic professionals in the marine sciences

Biologia 2050. Chimica di base per lo studio della biologia. Per le Scuole superiori 2013-03-07

the future of the common fisheries policy depends on progress in the relevant areas of research this applies to the whole range of management decisions where precise reliable and complete data are essential to inform those who must decide on the pursuit of existing activities especially in the area of maritime fisheries and the development of promising new activities such as aquaculture every day the director general of dg xiv requires more and more information to prepare decisions which will affect the future of all those in the community who are dependent on fishing and aquaculture there is thus a high level of direct demand from dg xiv over and above this immediate and specific requirement for short and medium term applications research affects the competitiveness of the community this is one area which favours the collaboration across frontiers of all those who seek to advance knowledge but although dg xiv is uniquely placed to appreciate the importance of research into fisheries and aquaculture there is no question of succumbing to the temptation to directly control the scope of research or its conduct the notion of subsidiarity can best be understood by examining the existing structures in the member states the commission must act first and foremost as a catalyst by promoting the circulation of information and

the coordination of research programmes

The Biology of Numbers 2018-04-27

lo scopo della psicologia dello sviluppo è descrivere e spiegare i cambiamenti nel comportamento e nelle attività psicologiche dal periodo prenatale fino alla vecchiaia il volume affronta in modo approfondito i principali temi della psicologia dello sviluppo dal periodo prenatale fino alla vecchiaia esaminandone sia gli aspetti biologici che quelli culturali nel testo sono presentate le più importanti teorie dello sviluppo in una prospettiva storica e in particolare quelle di piaget vygotskij e bowlby che permettono di comprendere gli orientamenti della ricerca contemporanea e forniscono una sintesi moderna rispetto alle radicali posizioni innatiste e ambientaliste il testo presenta inoltre recenti ipotesi sostenute da evidenze sperimentali che hanno portato a parziali revisioni di queste teorie il volume fornisce in tal modo una visione complessiva e aggiornata delle questioni teoriche e metodologiche più rilevanti della psicologia dello sviluppo ed è consigliato per studenti universitari insegnanti operatori del settore genitori e per tutti coloro che sono interessati a questa disciplina l curatore di questa edizione ha inoltre apportato integrazioni e adattamenti specifici per il pubblico italiano a tal fine sono state anche illustrate recenti ricerche italiane rilevanti per i temi trattati nel testo
