by the end of the nineteenth century the world was ready to adopt the gold standard out of concerns of national power prestige and anti english competition yet although the gold standard allowed countries to enact a virtual single world currency the years before world war i were not a time of unfettered liberal economics and one world one market harmony outside of europe the gold standard became a tool for nationalists and protectionists primarily interested in growing domestic industry and imperial expansion this overlooked trend provocatively reassessed in steven bryan s well documented history contradicts our conception of the gold standard as a british based system infused with english ideas interests and institutions in countries like japan and argentina where nationalist concerns focused on infant industry protection and the growth of military power the gold standard enabled the expansion of trade and the goals of the age industry and empire bryan argues that these countries looked less to britain and more to north america and the rest of europe for ideological models not only does this history challenge our idealistic notions of the prewar period but it also reorients our understanding of the history that followed policymakers of the 1920s latched onto the idea that global prosperity before world war i was the result of a

system dominated by english liberalism their attempt to reproduce this triumph helped bring about the global downturn the great depression and the collapse of the interwar world

the oldest and most prestigious children s literature award the newbery medal has since 1922 been granted annually by the american library association to the children s book it deems most distinguished medal books enjoy an outsized influence on american children s literature figuring perennially on publishers lists on library and bookstore shelves and in school curricula as such they offer a compelling window into the history of us children s literature and publishing as well as into changing societal attitudes about which books are best for america s schoolchildren yet literary scholars have disproportionately ignored the medal winners in their research this volume provides a critically and historically grounded scholarly analysis of representative but understudied newbery medal books from the 1920s through the 2010s interrogating the disjunction between the books omnipresence and influence on the one hand and the critical silence surrounding them on the other dust off the gold medal makes a case for closing these scholarly gaps by revealing neglected texts insights into the politics of children s literature prizing and by demonstrating how neglected titles illuminate critical debates currently central to the field of children s literature in particular the essays shed light on the hidden elements of diversity apparent in the neglected newbery canon while illustrating how the books respond sometimes in quite subtle ways to contemporaneous concerns around race class gender disability nationalism and globalism

mr gold adroitly and expertly advocates the necessity of reading in our lives actually he goes as far as claiming that reading is a biological necessity in the same way as eating is reading is thinking imagining understanding feeling and healing it is an activity that is far from an escape or an avoidance of reality because it provides the reader the necessary relief from the ad hoc reacting and chaos of socialising by taking care of us leading us and letting us imagine alternative lives through the complex paths of experience and language in this sense reading truly is a therapeutic experience and mr gold gives numerous examples of patients he managed to cure by giving them novels to read because they are an experiential tool for re-seeing and reordering the reader's own confusing experience novels take on our confusion they bear our burdens and leave us to see the larger picture we cannot see because they offer another perspective reading being the most powerful and plentiful source of information it isn't surprising that a vital element for the survival of any totalitarian regime is to take control of what people read because language is power authors like aldus huxley george orwell and above all ray bradbury have masterfully illustrated this point in their novels the latter showing what happens to a civilisation in which television replaces literacy people may still be able to read but they are what we may call literary illiterates no doubt mr gold's message is clear we have to read for the salvation of our spirit
