Some Famous Buildings and Their Story 2018-01-13

excerpt from some famous buildings and their story being the results of recent research in london and elsewhere not the least interesting branch of modern research is that which opens for us new chapters in the history of our own country and shows us the character and ambitions in the lives of our ancestors the public have long been familiarised with the results of scientific inquiry into the organic structure and the habits of nature but the labours of the historian are too often hidden in treatises of too abstruse a form to attract the general reader and even where an attempt has been made to present these subjects of human interest in a more palatable form we too often have to lament a looseness of expression and an indifference to historical accuracy which defeat every good purpose in view about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Some Famous Buildings and Their Story 1928

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

Some Famous Buildings and Their Story 1906

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and

possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public to ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Modern Buildings 2012-01-01

describes how the early architects used the gothic classical and baroque traditions to develop a uniquely american style

Some Famous Buildings and Their Story; Being the Results of Recent Research in London and Elsewhere by Alfred W Clapham and Walter H Godfrey 1970

why did the colonial americans give over a significant part of their homes to a grand staircase why did the victorians drape their buildings ornate decoration and why did american buildings grow so tall in the last decades of the 19th century this book explores the history of american architecture from prehistoric times to the present explaining why characteristic architectural forms arose at particular times and in particular places

American Buildings and Their Architects 2018-10-14

an important consideration for energy efficient buildings is their primary energy requirements over the entire life cycle how to determine this what integrative factors influence the performance of a healthy and sustainable building this while it may be important for clients and architects to know is frequently not very transparent this book has been written to assist with clarifying target criteria and expanding horizons when it comes to ecological buildings it is meant as a handbook and source of reference for

clients architects planners and building operators to provide them with pertinent information about their design construction and operation how to do this in the most energy efficient and economical manner also there is feedback and documentation about prominent buildings like the hamburg dockland or the landesbank baden wuerttemberg in stuttgart they provide excellent architectural examples for detailed construction and design solutions further there are insightful interviews with architects and clients about many important buildings which help turn this book into an integrated source of reference for sustainable architecture a guideline for planning construction and operation of sustainable buildings a source of reference for clients architects planners and building operators innovative architectural examples with sustainable concepts and design

Some Famous Buildings and Their Story; Being the Results of Recent Research in London and Elsewhere. by Alfred W. Clapham and Walter H. Godfrey 1986

for years i have heard about buildings and their applications to group theory i finally decided to try to learn something about the subject by teaching a graduate course on it at cornell university in spring 1987 this book is based on the notes from that course the course started from scratch and proceeded at a leisurely pace the book therefore does not get very far indeed the definition of the term building doesn't even appear until chapter iv my hope however is that the book gets far enough to enable the reader to tackle the literature on buildings some of which can seem very forbidding most of the results in this book are due to j titts who originated the theory of buildings the main exceptions are chapter i which presents some classical material chapter vi which presents joint work of f bruhat and titts and chapter vii which surveys some applications due to various people it has been a pleasure studying titts's work i only hope my exposition does it justice

American Buildings and Their Architects: The colonial and neoclassical styles 1914

American Buildings and Their Architects 1970

this book investigates the design operation and use of contemporary transportable buildings and explores how functional performance can be assessed in small scale examples for public use alongside their relationship to other design elements the research focuses on three case studies chengdu hualin elementary school exxopolis and kreod that do not require a high technology building environment or complex construction skills transportable buildings are defined as those that are transported in a number of parts for assembly on site contemporary transportable buildings respond to ecological issues social impacts technological innovation and economic demands they can be used to measure a society s development in environmental sustainability innovation and economic growth through various forms small scale transportable buildings fulfil many temporary habitation needs in diverse roles such as non emergency transitional housing ephemeral exhibition buildings and seasonal entertainment facilities small scale public transportable and pre fabricated buildings will be a useful research text for academics and students in architecture design and sustainable building performance

American Buildings and Their Architects 1861

this is a comprehensive guide to all types of natural and man made disasters and their effect on buildings it gives overall guidance and a basic technical understanding of prevention mitigation and management of disaster and outlines a checklist of preventive design elements for each situation every category is illustrated with a case study which pin points the essential information that is crucial to architects and engineers in designing buildings with disaster prevention in mind the aim of the book is to give a clear understanding of the nature of events and problems and to enable readers to respond with knowledge to the unique demands placed on their designs a special emphasis is also placed on re building as an opportunity to start again for the specialists this is a process of constant learning and improving techniques in the light of events past

The Book of Farm-buildings 1999

in this practical guide the texas department of education provides advice and recommendations for designing and equipping schools to create the best possible learning environment for students it covers everything from site selection and construction to classroom layout and furniture selection this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

A History of American Architecture 2010-11-15

construction projects once they are completed are intended to exist in the skylines of cities and towns for decades sustainable technologies seek to take these existing structures and make them environmentally friendly and energy efficient design solutions for nzeb retrofit buildings is a critical

scholarly resource that examines the importance of creating architecture that not only promotes the daily function of these buildings but is also environmentally sustainable featuring a broad range of topics including renewable energy sources solar energy and energy performance this book is geared toward professionals students and researchers seeking current research on sustainable options for upgrading existing edifices to become more environmentally friendly

Green Building 1909

the city of nishapur located in eastern iran was a place of political importance in medieval times and a flourishing center of art crafts and trade this publication studies the buildings at the site at nishapur excavated by the iranian expedition of the metropolitan museum in 1935 40 and again in 1947 metropolitan museum of art website

Public School Buildings and Their Equipment 2000

buildings have often been studied whole in space but never before have they been studied whole in time how buildings learn is a masterful new synthesis that proposes that buildings adapt best when constantly refined and reshaped by their occupants and that architects can mature from being artists of space to becoming artists of time from the connected farmhouses of new england to i m pei s media lab from satisficing to form follows funding from the evolution of bungalows to the invention of santa fe style from low road military surplus buildings to a high road english classic like chatsworth this is a far ranging survey of unexplored essential territory more than any other human artifacts buildings improve with time if they re allowed to how buildings learn shows how to work with time rather than against it

Twentieth-century American Architecture 2013-06-29

essential information for the design of elementary and secondary schools building type basics for elementary and secondary schools second edition is your one stop reference for the essential information you need to confidently begin the design process and successfully complete the design for elementary and secondary schools large or small on time and within budget bradford perkins shares his firsthand knowledge in order to guide architects planners engineers and their clients through all aspects of the

design of school facilities this new edition is up to date with the latest developments in school design with a fresh look at technology s influence in the classroom along with current research that shows how school buildings can impact teaching and learning highly illustrated and filled with new school case studies with project photographs diagrams floor plans sections and details this book combines in depth coverage of the structural mechanical acoustic traffic and safety issues unique to schools with the nuts and bolts design guidelines that will start any project off on the right track and keep it there through completion this new edition offers numerous photographs diagrams plans and sections an expanded and detailed guide for programming school facilities a new chapter on circulation and basic planning options new material on current trends in school planning and design a new chapter on sustainable design ideas an updated chapter on technology in schools an expanded discussion of international school design opportunities and issues this conveniently organized quick reference is an invaluable guide for busy dedicated professionals who want to get moving quickly as they embark on a new project like every building type basics book it provides authoritative up to date information instantly and saves professionals countless hours of research

Buildings 2020-04-21

water has been an important topic in architecture and urban planning for years the revitalization of the waterfront has been a prevalent trend in cities around the world on the other hand architecture also had to respond to the threat of floods the theme of building with water is the use of water in architecture it presents buildings that explicitly refer to water in their design and form it establishes a typology of building by the water residential structures recreation facilities industry and infrastructure buildings for culture and art the various design parameters are explored in four essays subsequently twenty two international projects are presented organized according to their locations by a river a lake or the sea the authors concern is not to show luxurious buildings in privileged locations but rather presenting projects that seriously grapple with the main criterion of the location namely water in an ecologically sustainable way and respond to it with their design wasser ist seit jahren ein wichtiges thema in architektur und städtebau building with water thematisiert die verarbeitung von wasser im architektonischen entwurf es werden bauten vorgestellt die sich in ihrer gestaltung und form ausdrücklich auf wasser beziehen eine typologie des bauens am wasser wird erstellt wohnbauten verkehrs und industriebauten bauten für kultur und freizeit ebenso werden einleitend klassische beispiele des

bauens am im auf dem wasser gezeigt wie etwa château de chenonceaux an der loire falling water in pennsylvania von frank lloyd wright oder das salk institute in la jolla kalifornien von louis i kahn geordnet nach ihren standorten am fluss see oder meer werden dann etwa 20 internationale projekte vorgestellt es geht den autoren nicht darum luxuriöse bauten an privilegierten plätzen zu zeigen sondern projekte darzustellen deren entwurf sich ernsthaft und ökologisch verträglich mit dem hauptkriterium des standortes nämlich wasser auseinandersetzt und sich gestalterisch darauf bezieht

West Coast Creepy Buildings: Their Storied Past 2020-07-15

in the power of existing buildings academic sustainability expert robert sroufe and construction and building experts craig stevenson and beth eckenrode explain how to realize the potential of existing buildings and make them perform like new this step by step guide will help readers to understand where to start a project develop financial models and realize costs savings assemble an expert team and align goals with numerous sustainability programs the power of existing buildings will challenge you to rethink spaces where people work and play while determining how existing buildings can save the world the insights and practical experience of sroufe stevenson and eckenrode along with the project case study examples provide new insights on investing in existing buildings for building owners engineers occupants architects and real estate and construction professionals

Northwestern American Creepy Buildings: Their Storied Past 2018-04-09

this is the most comprehensive single volume on english architecture for the general reader it is a visual cornucopia and a tribute to the diversity of the english built environment which is among the richest and most diverse in the world over 700 buildings are described and illustrated and they range from the architectural icons to the less noticeable but equally fascinating buildings of england s towns and villages

Small-Scale Public Transportable and Pre-Fabricated Buildings

2007-06-01

this highly original and sophisticated look at architecture helps us to understand the cultural significance of the buildings that surround us it avoids the traditional style spotting approach in favour of giving an idea of what it is about buildings that moves us and what it is that makes them important artistically and culturally the book begins by looking at how architecture acquires meaning through tradition and concludes with the exoticism of the recent avant garde illustrations of particular buildings help to anchor the general points with specific examples from ancient egypt to the present day about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Introduction to Natural and Man-made Disasters and Their Effects on Buildings 2023-07-18

buildings buildings open to the public housing architectural design disabled people handicapped people aids for the disabled design circulation and space systems buildings entrances doors circulation spaces corridors stairs guard rails ramps signs lifts car parks buildings parking areas construction systems building regulations health and safety requirements fire safety in buildings

School Grounds, School Buildings and Their Equipment 2018-03-02

the open access book discusses human health and wellbeing within the context of built environments it provides a comprehensive overview of relevant sources of literature and user complaints that clearly demonstrate the consequences of lack of attention to health in current building design and planning current designing of energy efficient buildings is mainly focused on looking at energy problems and not on addressing health therefore even green buildings that place environmental aspects above health issues can be uncomfortable and unhealthy and can lead to public health problems the authors identify many health risk factors and their parameters and the interactions among risk factors and building design

elements they point to the need for public health specialists engineers and planners to come together and review built environments for human wellbeing and environmental sustainability the authors therefore present a tool for holistic decision making processes leading to short and long term benefits for people and their environment

Design Solutions for nZEB Retrofit Buildings 1987

excerpt from school grounds school buildings and their equipment many requests have been coming to the state department of education especially from rural and small town communities for plans information and suggestions relative to the construction and equipment of school buildings varying in size from one to eight class rooms about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Nishapur 1995-10-01

the world's greenest buildings tackles an audacious task among the thousands of green buildings out there which are the best and how do we know authors jerry yudelson and ulf meyer examined hundreds of the highest rated large green buildings from around the world and asked their owners to supply one simple thing actual performance data to demonstrate their claims to sustainable operations this pivotal book presents an overview of the rating systems and shows best in class building performance in north america europe the middle east india china australia and the asia pacific region practical examples of best practices for greening both new and existing buildings a practical reference for how green buildings actually perform at the highest level one that takes you step by step through many different design solutions a wealth of exemplary case studies of successful green building projects using actual performance data from which to learn interviews with architects engineers building owners and developers and industry experts to provide added insight into the greening process this guide uncovers some of the

pitfalls that lie ahead for sustainable design and points the way toward much faster progress in the decade ahead

How Buildings Learn 2010-04-26

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Building Type Basics for Elementary and Secondary Schools 2010-01-01

this volume throws light on the sick building syndrome in libraries and other public buildings and the extent to which it is influenced by the internal environment of libraries one of the signs of this disease is that the person suffers from a set of symptoms closely related to his her presence in the building without the identification of any clear causes and his her relief of these symptoms when he she are out of the building hence the book sheds on the extent to which the interior environment impacts upon the health of the people and the extent to which this is reflected in their performance the book can be used for teaching research and professional reference it concludes with the recommendation that is essential to observe environmental dimensions when designing library and public buildings taking into consideration the expected impact of sbs in library and public buildings on people the significance of the book derives from the fact that it is the first of its kind to examine the issue of the interior environment and sbs of library and public building worldwide

Building with Water 2019-11-12

in recent years the rapid pace of tall building construction has fostered a certain kind of placelessness with many new tall buildings being built out of scale context and place by analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire stimulate and engage understanding tall buildings contends that well designed tall buildings can rejuvenate cities ignite economic activity support social life and boost city pride although this book does not claim to possess all the solutions it does propose specific tall building design guidelines that may help to promote placemaking through this work it is the author s hope that ill conceived developments will become less common in the future and that good placemaking will become the norm not the exception this book is a must read for students and practitioners working to create better tall buildings and better urban environments

The Power of Existing Buildings 2006

precedents in architecture a timely update of the architectural classic on design analysis precedents in architecture fourth edition provides a vocabulary for architectural analysis that illuminates the works of leading architects and aids architects and designers in creating their own designs thirty eight leading architects are represented in this updated edition through an analysis of more than 100 buildings that are assessed using a diagrammatic technique applicable to any building this impressive collection includes fourteen new buildings and seven new innovative architects distinguished by the strength quality and interest of their designs it delivers valuable guidance in analyzing architectural history as an evolutionary process by exploring the commonality of design ideas reflected in a broad range of structures by internationally renowned architects both novices and seasoned professionals will find precedents in architecture fourth edition to be a very useful tool for enriching their design vocabulary and for the ongoing assessment of buildings found in today s evolving landscape
