a beautiful lost classic of nature writing which sits alongside tarka the otter watership down war horse and the story of a red deer this is the story of wulfgar the dark furred fox of dartmoor and of his nemesis scoble the trapper in the seasons leading up to the pitiless winter of 1947 as breathtaking in its descriptions of the natural world as it is perceptive its portrayal of damaged humanity it is both a portrait of place and a gripping story of survival uniquely straddling the worlds of animals and men brian carter s a black fox running is a masterpiece lyrical unforgiving and unforgettable

an intimate portrait of a mysterious and misunderstood animal tjernshaugen writes in an easy to read style that is full of insight and understanding i felt like i was sitting beside him as he described fox behavior rick mcintyre yellowstone wolf researcher and author of the rise of wolf 8 if you look into the fox s amber eyes you ll notice vertical pupils with such feline eyes in a slender canine body the fox is a relative of the dog and the wolf but it hunts alone like a cat the fox lives close to people both in the city and in the country but it s wild shy and secretive taking long walks in the early morning equipped with wildlife cameras and sometimes with his dog topsy by his side andreas tjernshaugen journeys into the forest hoping to encounter the foxes living just outside his small town in norway he knows the telltale signs of how to find a fox den how to identify a pawprint in the snow and the smells that foxes leave behind he meets a vixen he named blackback and he watches carefully as she and other foxes hunt play and live together as families throughout this captivating book tjernshaugen investigates the fox s place in our own cultural history such as reynard the fox the scandinavian inspiration for disney s robin hood and the fables of aesop which depict foxes as sly and cunning a reputation that may not be fully earned tjernshaugen argues what is true is the fox is wilder than other wildlife and largely survives in spite of our plans and regulations like an outlaw so i see it as a symbol of freedom and independence

tucked away in siberia there are furry four legged creatures with wagging tails and floppy ears that are as docile and friendly as any lapdog but despite appearances these are not dogs they are foxes they are the result of the most astonishing experiment in breeding ever undertaken imagine speeding up thousands of years of evolution into a few decades in 1959 biologists dmitri belyaev and lyudmila trut set out to do just that by starting with a few dozen silver foxes from fox farms in the ussr and attempting to recreate the evolution of wolves into dogs in real time in order to witness the process of domestication this is the extraordinary untold story of this remarkable undertaking most accounts of the natural evolution of wolves place it over a span of about 15 000 years but within a decade belyaev and trut s fox breeding experiments had resulted in puppy like foxes with

floppy ears piebald spots and curly tails along with these physical changes came genetic and behavioral changes as well the foxes were bred using selection criteria for tameness and with each generation they became increasingly interested in human companionship trut has been there the whole time and has been the lead scientist on this work since belyaev's death in 1985 and with lee dugatkin biologist and science writer she tells the story of the adventure science politics and love behind it all in how to tame a fox dugatkin and trut take us inside this path breaking experiment in the midst of the brutal winters of siberia to reveal how scientific history is made and continues to be made today to date fifty six generations of foxes have been domesticated and we continue to learn significant lessons from them about the genetic and behavioral evolution of domesticated animals how to tame a fox offers an incredible tale of scientists at work while also celebrating the deep attachments that have brought humans and animals together throughout time
