percentage of evaluation has been carried out on transport policy and none by political scientists or social policy specialists the editors of this volume recognize that european integration has seen a drive to bring policy evaluation on to the transport agenda and has increased demands for strategic assessments it has become apparent that to gain a fuller understanding of the success of a transport programme a much more complex combination of analytical methods must be used and a set of guidelines specifically for the field of transport must be developed this book achieves this by bringing together a multidisciplinary team of analysts from throughout the eu to discuss in a much broader way the various types of assessment methods and how they can best be used to evaluate transport programmes and systems both individually and in combination
