mexico has failed to achieve internal security and poses a serious threat to its neighbors this volume takes us inside the mexican state to explain the failure there but also reaches out to assess the impact of mexico s security failure beyond its borders the key innovative idea of the book security failure brings these perspectives together on an intermestic level of analysis it is a view that runs counter to the standard emphasis on the external trans national nature of criminal threats to a largely inert state mexico s security failure is both timely with mexico much in the news but also of lasting value it explains mexican insecurity in a full dimensional manner that hasn t been attempted before mexico received much scholarly attention a decade ago

with the onset of democratization since then the leading topic has become immigration however the security environment compelling many mexicans to leave has been dramatically understudied this tightly organized volume begins to correct that gap

in pluriversal politics arturo escobar engages with the politics of the possible and how established notions of what is real and attainable preclude the emergence of radically alternative visions of the future reflecting on the experience philosophy and practice of indigenous and afro descendant activist intellectuals and on current latin american theoretical political debates escobar chronicles the social movements mobilizing to defend their territories from large scale extractive operations in the region he shows how these movements engage in an ontological politics aimed at bringing about the pluriverse a world consisting of many worlds

each with its own ontological and epistemic grounding such a politics escobar contends is key to crafting myriad world making stories telling of different possible futures that could bring about the profound social transformations that are needed to address planetary crises both a call to action and a theoretical provocation pluriversal politics finds escobar at his critically incisive best
