to cull our numbers through our multitude of diseases of civilization our hunter gatherer contemporaries living in their traditional manner in their clan social groups widely distributed in their ecosystem have none of our diseases as our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows it has also brought us tremendous overpopulation and brought us near to ecological collapse we must face our need to restrict our reproduction or mother nature will do it for us a case in point infertility in america has increased 100 in just 34 years from 1982 to 2016 during the same period our sperm counts have fallen 60 no one is willing to look at the obvious cause neuro endocrine inhibition of human reproduction resulting from population density stress if any of this touches a nerve please find the time in your busy stressful day to stop for an hour and read this ground breaking book you may never have heard any of this information from any of your healthcare providers or the mass media big pharma rules the minds of your healthcare providers and the mass media at the end of my career as a practicing psychiatrist i had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions so i retired and spent the next 5 years writing this book i hope you find it as illuminating as i did doing the research on our epidemic of stress diseases no wonder that we are ever more anxious and depressed in spite of taking our 4 300 000 000 rx every year the real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work as well as birth control the alternative is increasing human disease and infertility from population density stress please read this book and tell me if you don t agree with my surprising conclusions good luck and god bless us one and all

this book is a compilation of what a neuropsychiatrist learned about the causes and cures of human diseases in his 41 year medical practice i treated 25 000 of my fellows and wrote 1 000 000 rx in the process the book is divided into 51 topics chapters and contains over 100 references it serves as an historical review of the field of stress research as well as animal crowding research as the two morphed together in my theory of population density stress human overpopulation is a fact as we have far exceeded the earth s carrying capacity for our species and mother nature is attempting to cull our numbers through our multitude of diseases of civilization our hunter gatherer contemporaries living in their traditional manner in their clan social groups widely distributed in their ecosystem have none of our diseases as our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows it has also brought us tremendous overpopulation and brought us near to ecological collapse we must face our need to restrict our reproduction or mother nature will do it for us a case in point infertility in america has increased 100 in just 34 years from 1982 to 2016 during the same period our sperm counts have fallen 60 no one is willing to look at the obvious cause neuro endocrine inhibition of human reproduction resulting from population density stress if any of this touches a nerve please find the time in your busy stressful day to stop for an hour and read this ground breaking book you may never have heard any of this information from any of your healthcare providers or the mass media big pharma rules the minds of your healthcare providers and the mass media at the end

of my career as a practicing psychiatrist i had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions so i retired and spent the next 5 years writing this book i hope you find it as illuminating as i did doing the research on our epidemic of stress diseases no wonder that we are ever more anxious and depressed in spite of taking our 4 300 000 000 rx every year the real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work as well as birth control the alternative is increasing human disease and infertility from population density stress please read this book and tell me if you don t agree with my surprising conclusions good luck and god bless us one and all
