the essays in writing respond to contemporary debates over the proper role of the internet in higher education steering a middle course between polarized attitudes that often dominate the conversation the authors argue for the wise integration of web tools into what the liberal arts does best writing across the curriculum all academic disciplines value clear and compelling prose whether that prose comes in the shape of a persuasive essay scientific report or creative expression the act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer furthermore learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view indeed a new generation of web based tools for authoring annotating editing and publishing can dramatically enrich the writing process but doing so requires liberal arts educators to rethink why and how we teach this skill and to question those who

pan african banks are expanding rapidly across the continent creating cross border networks and having a systemic presence in the banking sectors of many sub saharan african countries 2023-07-10 10 groups are fostering financial development and economic integration flexible working and organisational change the integration of work and personal life

stimulating competition and efficiency introducing product innovation and modern management and information systems and bringing higher skills and expertise to host countries at the same time the rise of pan african banks presents new challenges for regulators and supervisors as networks expand new channels for transmission of macro financial risks and spillovers across home and host countries may emerge to ensure that the gains from cross border banking are sustained and avoid raising financial stability risks enhanced cross border cooperation on regulatory and supervisory oversight is needed in particular to support effective supervision on a consolidated basis this paper takes stock of the development of pan african banking groups identifies regulatory supervisory and resolution gaps and suggests how the imf can help the authorities address the related challenges

mosquitoes and black flies are a constant threat to health and comfort yet the modern chemical pesticides used to control them have cre ated serious ecological problems populations of resistant mosquitoes and black flies have evolved beneficial insects and natural predators have been destroyed and environmental pollution has increased worldwide therefore scientists have energetically sought new environmentally safe technologies to combat mosquitoes and black flies and the diseases they carry among the most effective alternative means of controlling these pests are the highly spe cific microbial agents derived from bacillus tburingiensis or bacillus spbaericus the microbial control of mosquitoes and black flies is a very important rapidly developing area of science entomologists and microbiologists have already achieved spectacular successes using b tburingiensis and b spbaericus against these pests recent discoveries of new bacterial isolates specific to new hosts and recent genetic improvements in these isolates have created the potential for wide scale use of these biological control agents efficient microbial control of mosquitoes and black flies can now be achieved but a proper knowledge of factors relating to the safe and effective use of these biological control agents is necessary the efficacy of b tburingiensis and b spbaericus is influenced by the inherent differential tol erance of the target mosquitoes or black flies by the formulation technology and application of these agents and by environmental factors especially sun light and temperature

Official Gazette

2013-02

this paper studies whether fdi firms employ more workers than domestic firms for each dollar of assets using the orbis database and its ownership structure information we show that in most economies domestic firms tend to employ more workers per asset than fdi firms the result remains robust across individual industries in the case study of the united kingdom the analysis of the switchers ownership changes from domestic to foreign or vice versa suggests that ownership changes do not have an immediate impact on the employment per asset this result suggests that different patterns of employment per asset seem to come from technological differences rather than from different ownership structures

Digital-Forensics and Watermarking

2014-07-08

this volume of eurasian studies in business and economics focuses on latest results from research in banking and finance accounting and corporate governance growth and development along with a focus on the energy sector the first part on accounting and corporate governance features articles on environmental accounting audit quality financial information and adoption of governance principles the banking and finance part looks at risk behavior in banks credit ratings during subprime crisis stakeholder management and stock market crises the book focuses then on the energy sector and analyzes macroeconomic impacts of electricity generation risk dimensions in wind energy the latest eu energy reforms and discusses prediction models

Bacterial Control of Mosquitoes & Black Flies

2012-12-06

sequence analyses of numerous fungal genomes over the past two decades have provided us with extensive insights into the phylogenetic relationships of fungi and the distribution of genes and their inferred functions across the fungal kingdom it is now possible to answer questions about the origin of the fungal kingdom and fungal evolution with an analytical precision that was not possible before this fully revised and updated 2nd edition of the mycota vol 14 addresses major aspects of fungal evolution the book is divided into four sections covering the following main topics evolutionary roots of fungi evolution of pathogenic strategies evolution of mutualistic interactions evolution of metabolism and development in fungi fungi are among the oldest eukaryotic groups in the living world the aim of this book is to better understand the history and importance of fungi as well as the characteristics that distinguish them from their sister group the metazoa and how they integrate flexible working and organisational change the integration of work and personal life

like groups such as the slime molds and oomycetes many fungal species are important pathogens of animals and plants and have distinct but parallel pathogenicity strategies mutualistic interactions of fungi with other organisms are crucial for their survival in different ecological niches and have a great influence on their evolution and the design of their genomes metabolism is one of the most important features of life and the diversity of metabolic processes is best understood by considering evolution studies of fungal metabolism have traditionally focused on metabolites of particular interest namely mycotoxins pathogenicity factors antibiotics and other compounds with interspecific activity this volume will be of great interest to mycologists evolutionary biologists and fungal geneticists as well as to lecturers and students of microbiology and mycology

International Congress on Energy Efficiency and Energy Related Materials (ENEFM2013)

this book presents the latest research in hybrid intelligent systems it includes 57 carefully selected papers from the 16th international conference on hybrid intelligent systems his 2016 and the 8th world congress on nature and biologically inspired computing nabicc 2016 held on november 21 23 2016 in marrakech morocco his nabicc 2016 was jointly organized by the machine intelligence research labs mir labs usa hassan 1st university settat morocco and university of sfax tunisia hybridization of intelligent systems is a promising research field in modern artificial computational intelligence and is concerned with the development of the next generation of intelligent systems the conference s main aim is to inspire further exploration of the intriguing potential of hybrid intelligent systems and bio inspired computing as such the book is a valuable resource for practicing engineers scientists and researchers working in the field of computational intelligence and artificial intelligence

Do FDI Firms Employ More Workers than Domestic Firms for Each Dollar of Assets?

2020-03-13

this volume investigates nuclear energy policies in western europe over the entire post war period but with special attention to the two most recent decades the comparative analytical perspective draws on the interplay between voters attitudes challenging movements party competition and coalition formation spanning more than 60 years and 16 countries the researchers examine the underlying causal processes leading to the observed varieties of western european nuclear energy policies based on a mixed methods approach using both structured case studies as well as quantitative analyses the study shows that the nature of party competition under given institutional contexts is a key driver for as a rule tactically motivated governmental policy changes and stability respectively part i introduces the practical and theoretical relevance of the topic it outlines the reasoning of the major scientific contributions with regard to nuclear energy policies and offers a theoretical alternative to the previous literatures that has been predominantly movements oriented additionally it provides core economic and political indicators of the changing role of nuclear energy in the countries part ii consists of seven in depth case studies where the outlined theoretical perspective is applied part iii consists of a general summary short narratives of the countries not covered in case studies qualitative comparison and an assessment of the factors for policy change from multivariate analysis

Entrepreneurship, Business and Economics - Vol. 2

2016-03-23

this book outlines the currently available clinical epidemiological and experimental data on clostridium difficile infection cdi with special emphasis on studies and results achieved in europe the incidence and severity of cdi has increased significantly over the last decade and the book explains why c difficile recently reclassified as clostridioides difficile remains a significant challenge also from economic perspective to health care systems all over the world the different reservoirs of this ubiquitous microorganism are reviewed and the

different factors contributing to its virulence such as toxins and biofilm formation the rapid evolution of antibiotic resistance is clearly a concern and in a specific way can influence the cdi epidemiology additionally new emerging strains and comparative genomics studies are discussed for their relevance from epidemiological and evolutionary point of view the book also gives an overview on diagnostics therapy and surveillance all of which are still challenging therefore a closer look is taken on the effect of probiotics as an alternative to antibiotics for prevention and treatment of cdi fecal transplantation from healthy donors passive immunotherapies and vaccines for patients with recurrences are also discussed in dedicated chapters the book closes with a summary of the history and the achievements of the european society of clinical microbiology and infectious diseases study group for clostridium difficile esgcd written by the current and past presidents of the society it is the aim of this book to raise awareness on cdi and to disseminate updated information on its prevention diagnosis and treatment
